## Introduction

This publication provides information about both the health status of the population in South Carolina and the number of healthcare professionals actively practicing across the state. This information is presented in several different ways:

- area summary tables reporting the number of healthcare professionals with a primary practice in that area, the age and racial profile of the population in that area, a selection of vital statistics and health status indicators for that area, information about healthcare facilities, and a selection of statistics related to socio-economic conditions that are closely associated with healthcare status and outcomes
- maps showing the distribution of healthcare professionals by the zip code location of their primary practice setting
- maps showing the concentration of healthcare professionals having their primary practice in each county, relative to the population in that county
- tables which show, for each county in the state, the total number of healthcare practitioners who report having either their primary or secondary practice location within that county

This information has been compiled by The Office for Healthcare Workforce Analysis and Planning in the South Carolina AHEC Program Office, Medical University of South Carolina. We are a neutral entity dedicated to coordinating the development and publication of workforce policy-relevant research across the spectrum of health professions in South Carolina. Currently funded by The Duke Endowment, our primary goal is the development and analysis of accurate, reliable information on the supply of healthcare professionals and the demand for health services in South Carolina in order to support a wide array of workforce planning efforts.

Readers interested in additional information on any of the licensed health professions included in this publication are welcome to contact us directly through our website: [www.officeforhealthcareworkforce.org](http://www.officeforhealthcareworkforce.org). This report may also be downloaded free of charge from our website.

## Sources and Limitations of the Data

### *Health Professions Data*

The health professions data used in this report are collected every other year during the license renewal process by the regulatory boards that oversee each of the following professions: Certified Nurse Anesthetists, Certified Nurse Midwives, Clinical Nurse Specialists, Dental Hygienists, Dental Technicians, Dentists, Licensed Practical Nurses, Nurse Practitioners, Occupational Therapists, Occupational Therapy Assistants, Optometrists, Pharmacists, Pharmacy Technicians, Physical Therapists, Physical Therapy Assistants, Physicians, Physician Assistants, Registered Nurses, and Respiratory Care

Practitioners. The data collection process is organized and administered through the South Carolina Department of Labor, Licensing and Regulation, Division of Professional and Occupational Licensing Boards. Although the amount of data collected during the renewal process is slightly different for each licensed group, each licensure database includes basic demographic, practice, and location information for every healthcare professional licensed to practice in the state.

The South Carolina Budget and Control Board Office of Research and Statistics (ORS) is the official repository for statistical data as it relates to health professionals licensure information in South Carolina. The ORS provided the summary counts of healthcare providers for each county in the state used to create the maps and tables in this report. Regional aggregations were computed by the staff of the Office for Healthcare Workforce Analysis and Planning.

The maps included in this publication are based on either the county or zip code in which a provider reported having his or her primary practice, that is, the practice site in which they spend the majority of their time.<sup>1</sup> The dot density maps, based on primary practice site zip codes, are intended to convey how our healthcare workforce is concentrated or distributed throughout the state. The dots in the maps are randomly assigned within the zip code borders and do not reflect the actual practice location of the providers in the way that street-level address information might do. However, using zip codes rather than county location improves the quality of information being conveyed by making use of geographic areas smaller than the county. The second set of maps, based on the county location of the provider's primary practice, show how concentrated a particular health profession is, relative to the size of the population, at the county level.

### ***Definitions and Limitations***

State law requires that practitioners in each of the health professions profiled in this report obtain a license to practice. For that reason, the data reported here are based on an accurate count of the supply of licensed practitioners. However, because practitioners may change their work status over time by temporarily leaving the workforce to care for family members, by retiring, moving to another state but maintaining their South Carolina license, or maintaining their license but working in another field, simply counting the number of licensed individuals could be misleading. To avoid that problem, ***the counts of licensed healthcare professionals reported here include only those individuals holding an active license to practice and actively practicing in their field within the state of South Carolina.*** Note that this definition may include educators, researchers and administrators who do not engage in direct patient care but are still actively engaged in their profession.

The result is a conservative count of the healthcare workforce due to the fact that new licensees (those immigrating into South Carolina from another state, or new graduates receiving their initial license to practice in South Carolina) may not be required to report their employment or practice status in their initial license application, and thus might not be captured in the workforce definition until they have gone through the license renewal process. Depending on when a new licensee receives their initial license to practice, they may be a productive part of the workforce for as much as two years before they are reflected in official workforce counts. However, it is also true that healthcare providers retire, die, or leave practice every day for a variety of reasons as well. These two groups tend to balance each other out in a stable workforce. Understanding

<sup>1</sup> Some healthcare providers practice in more than one location.

whether a specific health profession is growing or shrinking requires tracking these in- and out-migrations over time.

The time periods on which our workforce counts are based differ for each professional group. The license renewal process for each of the health professions occurs on a biennial cycle. The South Carolina Department of Labor, Licensing and Regulation, Division of Professional and Occupational Licensing Boards governs license renewals in South Carolina. However, the timelines for license renewal are specified within the practice acts of each professional or occupational licensing board. This produces a staggering effect in the data collection periods, meaning that it is not possible to produce a true 'snapshot' of the healthcare workforce in South Carolina at a single point in time. And the fact that licensee information is usually updated on a biennial cycle rather than an annual cycle makes it difficult to get a timely estimate of the workforce since people are constantly entering and leaving the workforce over that two year time period.

The table below shows the time periods during which information was gathered for each of the groups included in this report. Some regulatory boards may allow a grace period that, in effect, extends the license renewal period beyond the official end date. Such allowance policies vary from one regulatory board to another. Currently it is not possible to assess the impact such grace periods might have on the counts reported here, but it is assumed such impact would be small.

<b>Profession</b>	<b>License Renewal Period on Which Counts are Based</b>
Clinical Nurse Specialists	February 1 - April 30, 2010
Certified Registered Nurse Anesthetists	February 1 - April 30, 2010
Dentists	October 15 - December 31, 2010
Dental Hygienists	October 15 - December 31, 2010
Dental Technicians	October 15 - December 31, 2010
Licensed Practical Nurses	February 1 - April 30, 2010
Nurse Midwives	February 1 - April 30, 2010
Nurse Practitioners	February 1 - April 30, 2010
Occupational Therapists	January 1 - March 15, 2011
Occupational Therapy Assistants	January 1 - March 15, 2011
Optometrists	August 1 - September 30, 2011
Pharmacists	March 1 - April 30, 2011
Pharmacy Technicians	April 1 - June 30, 2011
Physical Therapists	October 15 - December 31, 2010
Physical Therapy Assistants	October 15 - December 31, 2010
Physicians	April 15 - June 30, 2011
Physician Assistants	October 1 - December 31, 2011
Registered Nurses	February 1 - April 30, 2010
Respiratory Care Practitioners	January 1 – May, 30, 2011

For the purposes of this report, doctors of medicine (MDs) and doctors of osteopathy (DOs) are grouped together. Both types of physicians are awarded the same privilege to practice by the South Carolina Board of Medicine. Physicians are classified by their self-reported specialty area. Physician counts include physicians involved in post-graduate medical (residency) training programs. Resident physicians, who hold an active license to practice in the state, contribute a significant amount of care to South Carolina citizens. The 1,245 residents who were actively practicing in the state at the time this information was collected made up 11.7% of the entire physician workforce.

The 272 Physicians whose primary practice is in federal or military facilities and who indicate their employer as "Federal, Military" or "Federal, Civilian" are designated in this report as Federal Physicians. They have been broken out as a separate category in the report tables and maps, which is common practice in workforce analysis. However, those physicians who reported their employer as Federal, but had their primary practice in a federally-qualified community health center or rural health center are counted among the civilian physician workforce, because they provide services to the civilian population.

### ***Population Data Source***

The information on area population by age and race is based on results of the 2010 census. County-level age and race tables were downloaded from the U.S. Census Bureau website. Regional aggregations were created by the Office for Healthcare Workforce Analysis and Planning staff.

### ***Demographic, Health Facility and Economic Data***

This publication also includes information on health, vital statistics, hospitals and nursing homes, and socio-demographic data. Definitions of each statistic and its source can be found in Appendix I: Data Definitions and Sources. The statistics on the percentage of adults with heart disease, hypertension, diabetes, and those who currently smoke, have a sedentary lifestyle or are overweight or obese were all drawn from results of the Behavioral Risk Factor Surveillance Survey in South Carolina. In order to improve the estimates at the county level, data was pooled from the 2008, 2009 and 2010 survey responses to produce the county-level estimates in this book. Regional and state-level estimates are based on the 2010 survey results.

Socio-economic data on households with incomes under \$25,000, and percentage of the population with a high school education or less were based on data collected through the Behavioral Risk Factor Surveillance Survey in South Carolina. County-level estimates were created from pooled across the years 2008, 2009, and 2010 to avoid problems with small sample sizes at the county level. State and regional estimates are based solely on the 2010 survey results.

The count of hospital beds includes general beds only and does not include beds reserved for specialty care such as neonatal intensive care units, psychiatric, rehabilitation, or substance abuse. The bed count for skilled nursing facilities includes both regular nursing home beds and institutional beds. Both the hospital and nursing home bed counts are based on published reports by the DHEC Division of Health Licensing cited in Appendix I. The hospital discharge information was

obtained from the SC Hospital Discharge System database maintained and published by the SC Budget and Control Board Office of Research and Statistics, Health and Demographics Section. We are reporting the percentage of county residents that were able to receive hospital care within their home county in 2010.

A new data source was used this year for the measure of percentage of adults without health insurance. Beginning with this edition we are using Small Area Health Insurance Estimates developed by the U.S. Census Bureau. In this book we are reporting only on the percentage of adults aged 18 – 64 without health insurance. However, in August 2012, SAHIE released 2010 estimates of health insurance coverage by age, sex, race, Hispanic origin, and income categories at the state-level and by age, sex, and income categories at the county-level. That more detailed information can be found on their website: <http://www.census.gov/did/www/sahie/>.

In addition to reporting information for each county in the state, the information has also been aggregated into regional summaries. There are several different regional definitions included that are used by one or more governmental agencies for planning or program implementation purposes, such as the AHEC regions, the DHEC regions, perinatal care regions, and Workforce Investment Board regions. We also include two different definitions of the urban and rural areas of our state. The source and definitions for each regional categorization can be found in Appendix I, while a list of the counties included in each region can be found in Appendix II: Regional Definitions.

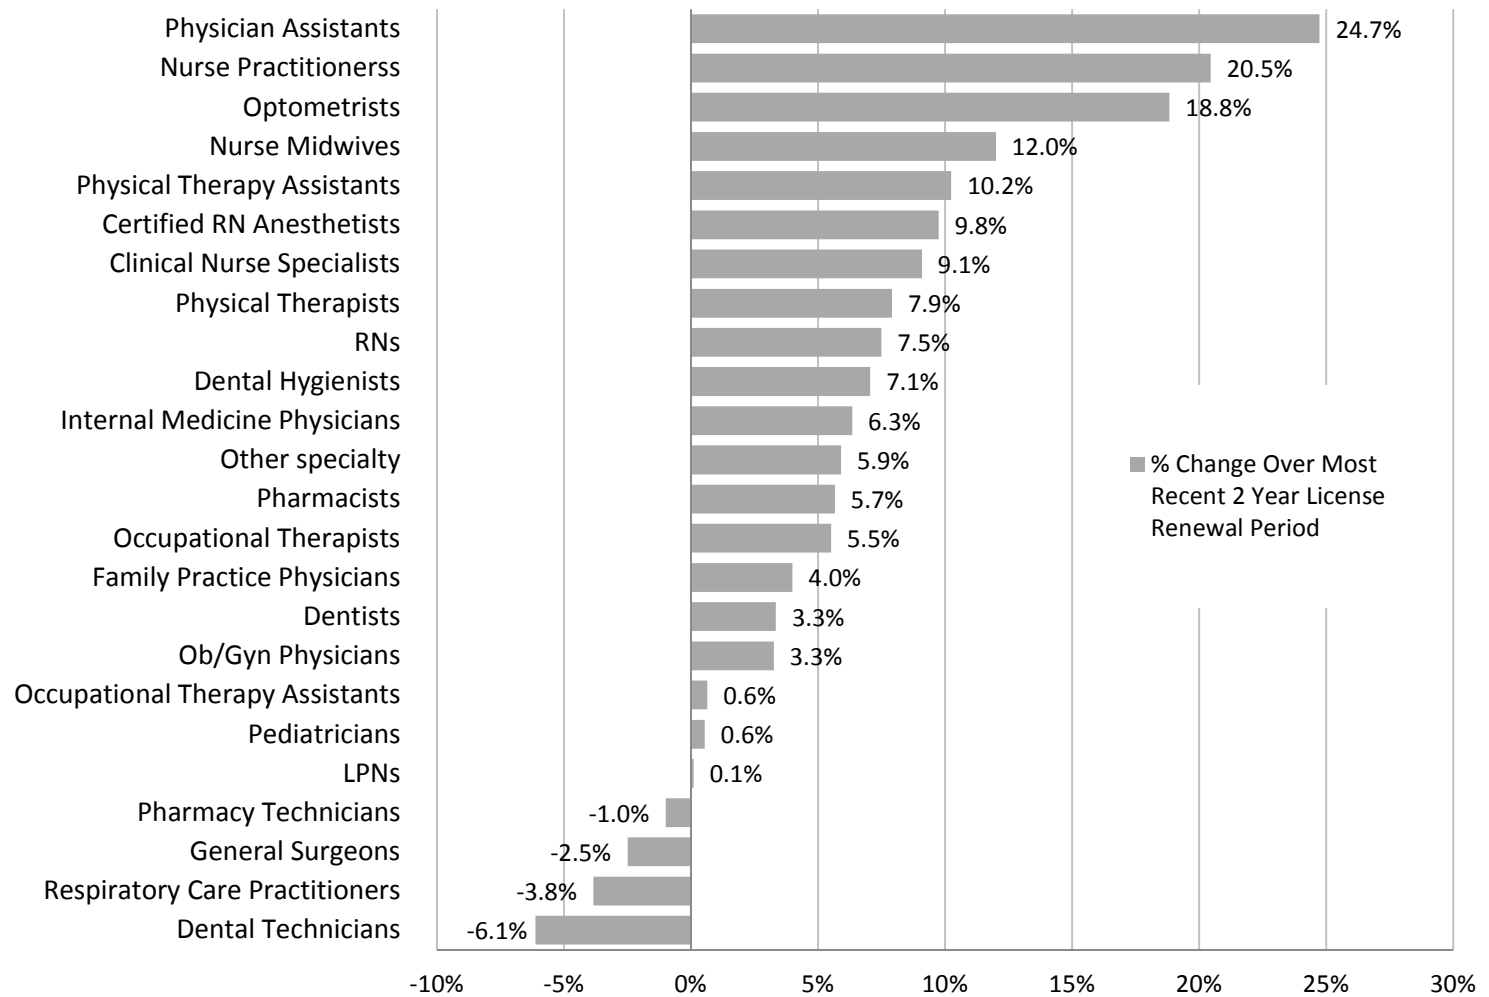

## **Recent Changes in the Healthcare Workforce in South Carolina**

This is the third edition of the South Carolina Health Professions Data Book and the first in which it is possible to trace changes over time in the size of the state's healthcare workforce. The chart on the following page summarizes the percentage growth or decline in the number of practitioners who are actively engaged in practicing their profession within the boundaries of South Carolina. The change is measured over the period from 2008 to 2011 which encompasses a single update in the licensure data files for all but one professional group. Optometrists provide information to their licensing board each year. Their growth rate is measured across the period from 2009 to 2011.

Physician Assistants and Nurse Practitioners are the two fastest growing segments of the healthcare workforce in South Carolina, based on percentage growth in the number who are actively practicing within the state. Optometrists, Nurse Midwives, and Physical Therapy Assistants also had double-digit growth rates over the most recent two year reporting period. Most groups have had more modest growth. A few have not changed significantly, and a few have declined in number.

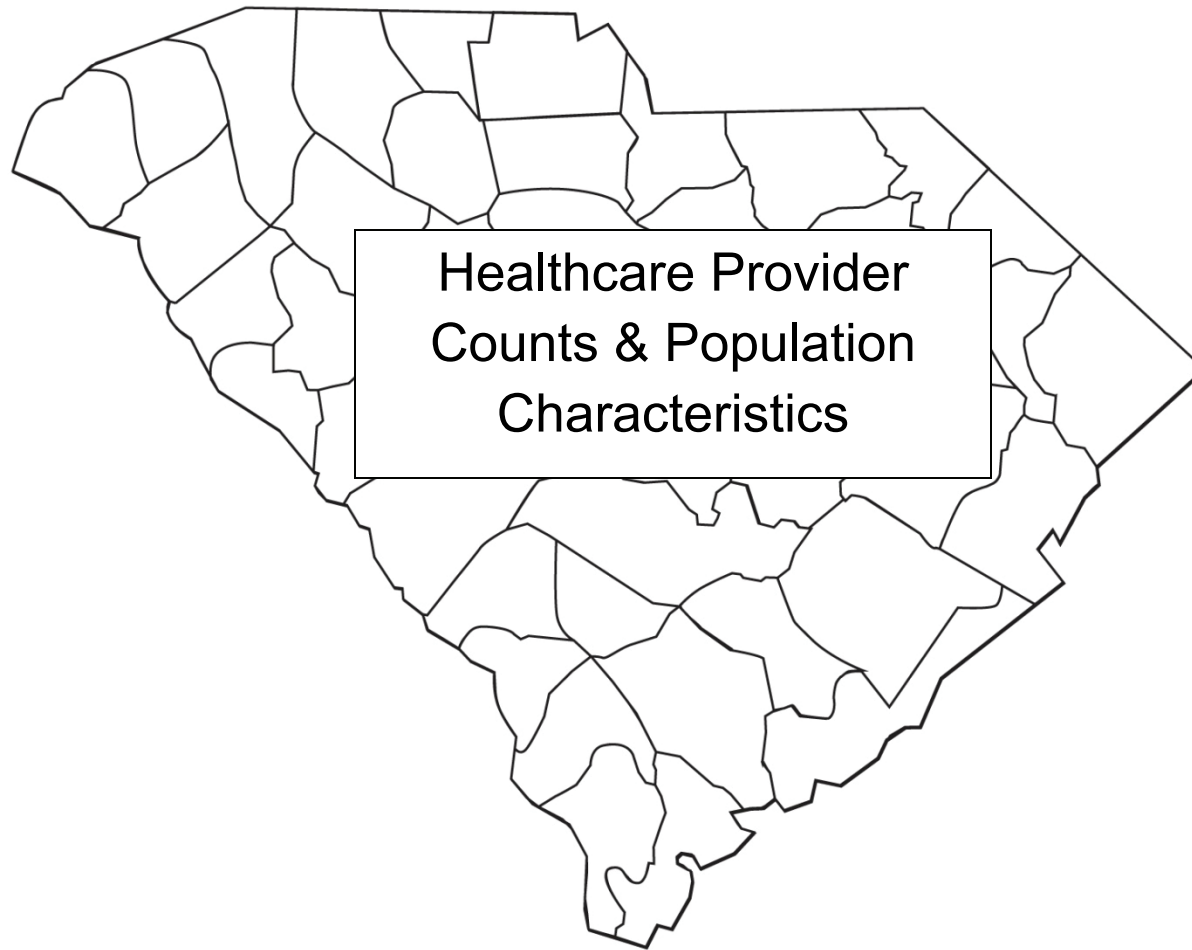

Among the physician sub-specialties being reported in this book, most have increased. The exceptions are Pediatricians who saw less than a 1% growth rate between 2008 and 2011 and the number of practicing General Surgeons which declined by 2.5% during that same period.

### Percentage Change in the Size of Selected Occupations in the Healthcare Workforce in South Carolina 2008 - 2011

Most occupations listed in this chart renew their license to practice every two years. Some had renewal periods in 2008 and 2010, others in 2009 and 2011. Those that had annual renewal periods have been measured over the 2008 - 2011 period.

# Counties of South Carolina

## Total Physicians in South Carolina by Primary Practice Location

*This information is based on all Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits one Physician who did not have a valid South Carolina zip code. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Total Physicians Per 10,000 Population

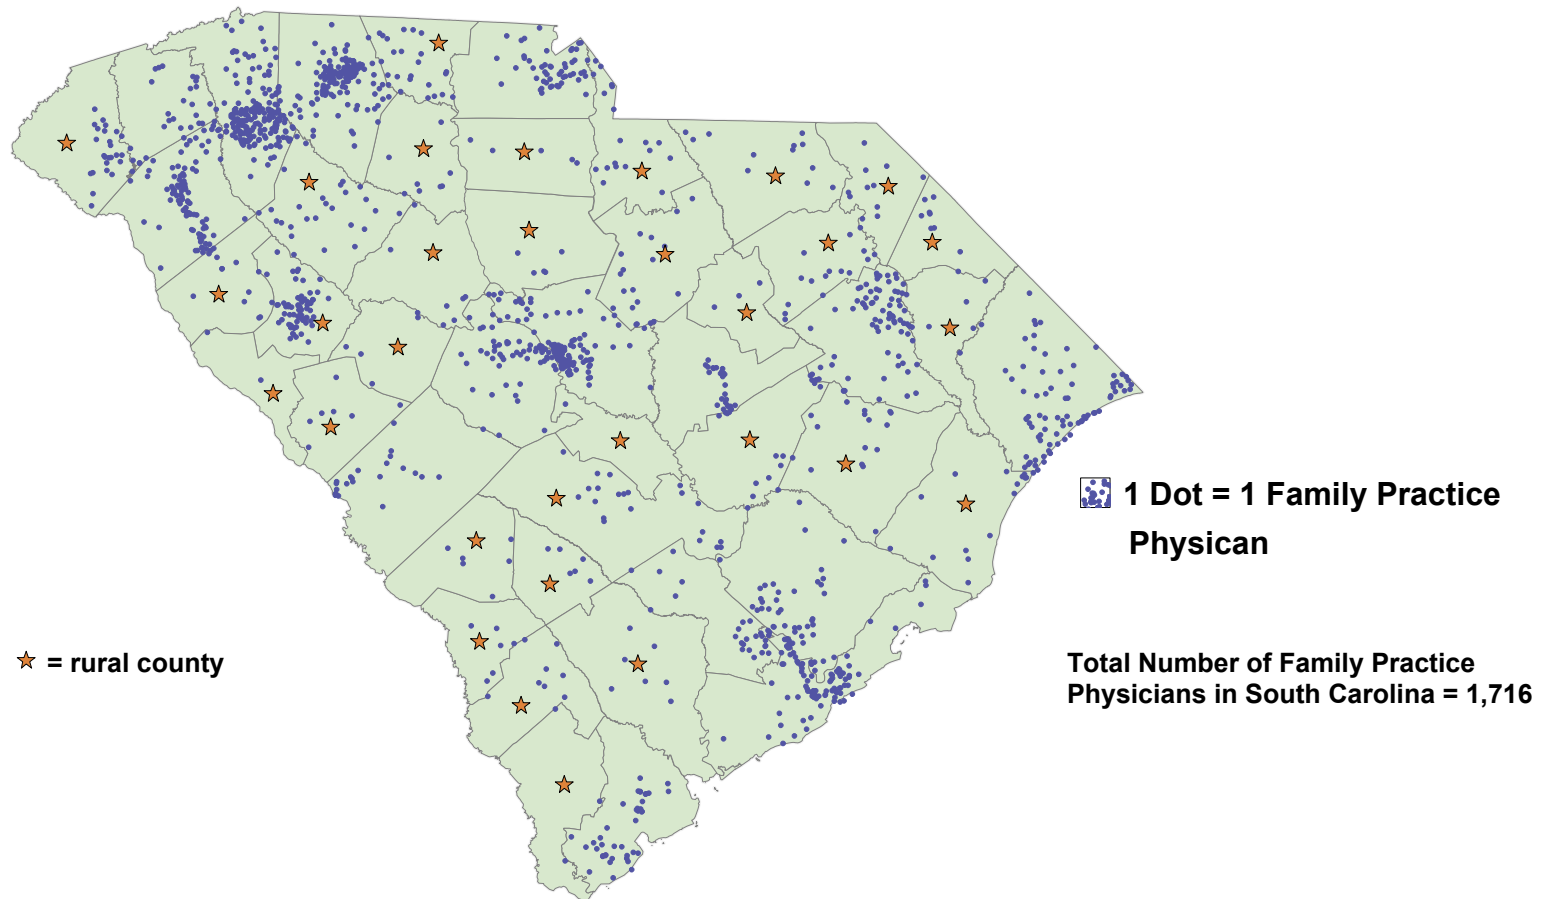

**Counties in SC range from a low of 1.3 to a high of 74.0 Physicians per 10,000 county residents**

- 50.0 to 74.0 (1)**
- 21.0 to 40.9 (6)**
- 15.0 to 20.9 (8)**
- 8.0 to 14.9 (15)**
- 1.3 to 7.9 (16)**

**Note:** The ( ) shows the total number of counties with this range.

*This information is based on all Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## Family Practice Physicians in South Carolina by Primary Practice Location

*This information is based on all Family Medicine and General Practitioner Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Family Practice Physicians Per 10,000 Population

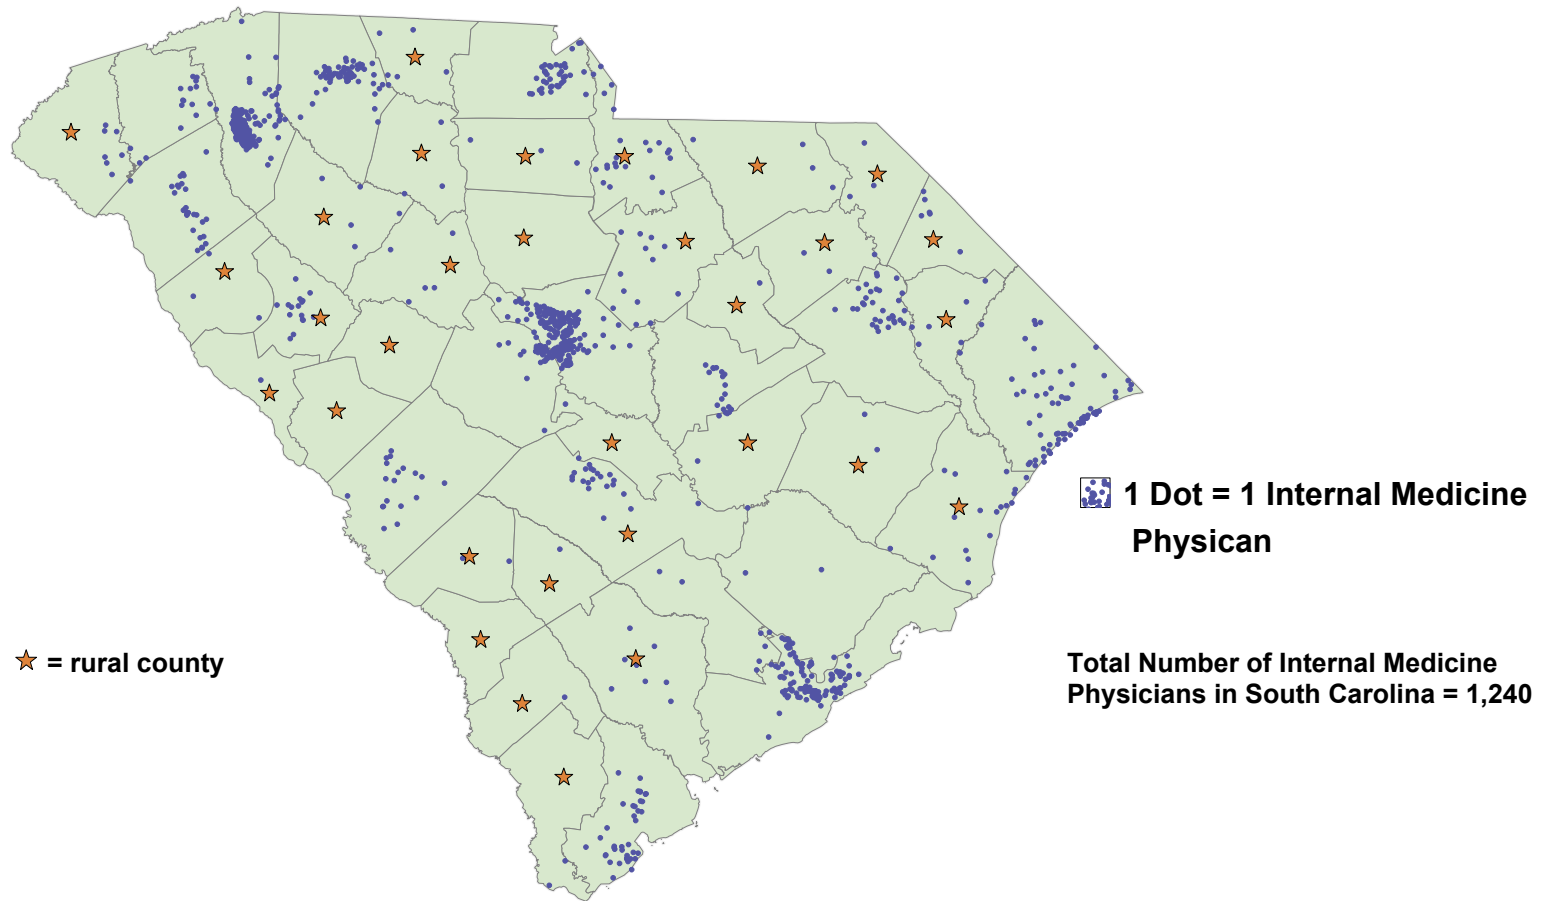

**Counties in SC range from a low of 0.7 to a high of 10.3 Family Practice Physicians per 10,000 county residents**

- 7.0 to 10.3 (2)**
- 5.0 to 6.9 (4)**
- 3.0 to 4.9 (20)**
- 0.7 to 2.9 (20)**

**Note:** The ( ) shows the total number of counties with this range.

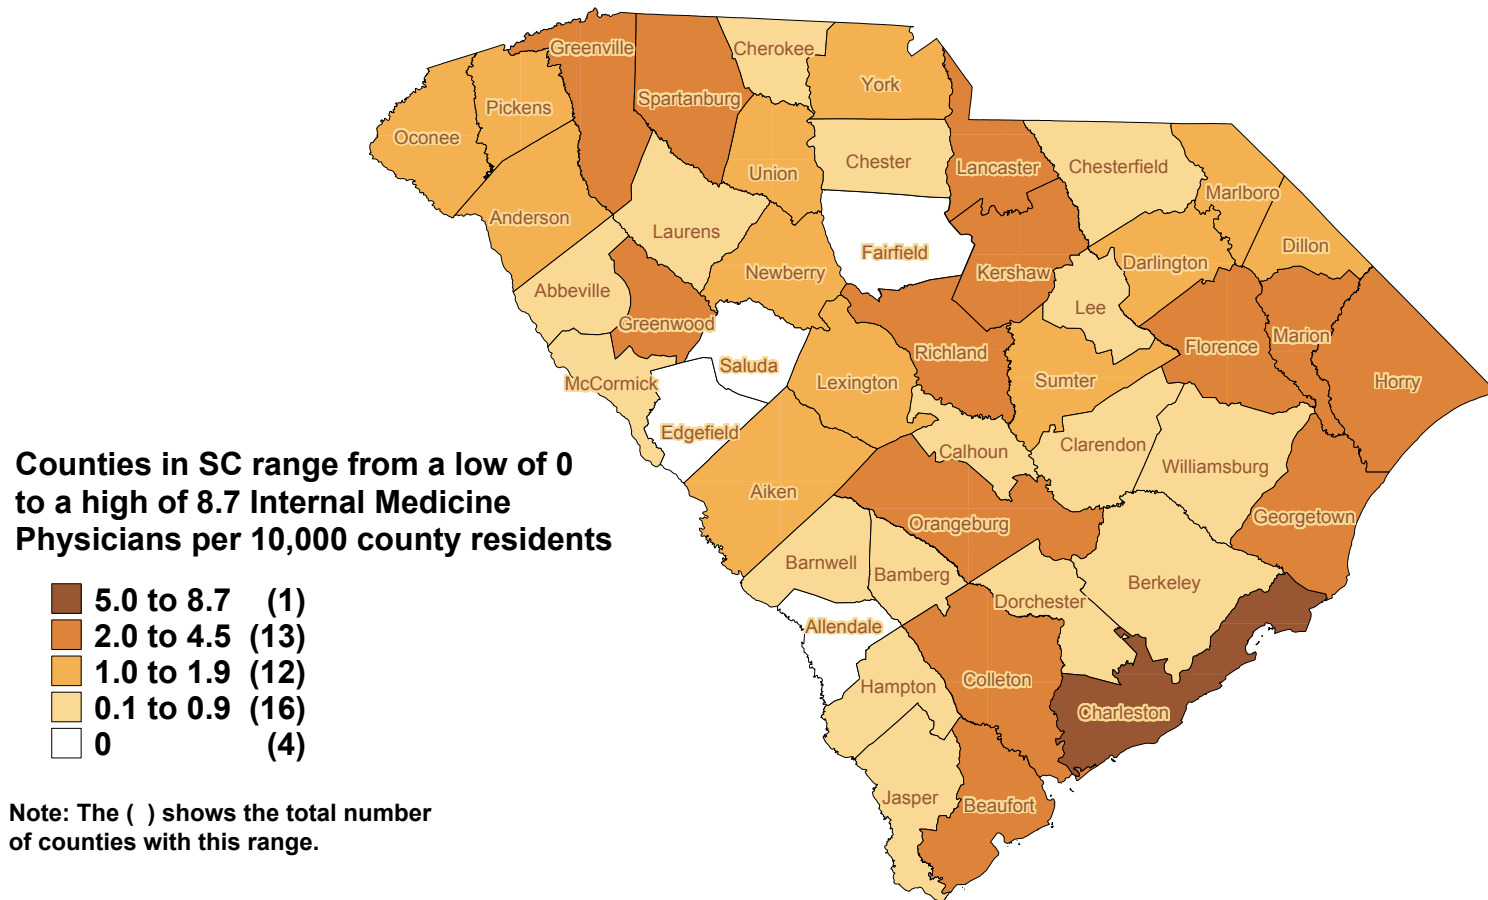

*This information is based on all Family Medicine and General Practice Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## Internal Medicine Physicians in South Carolina by Primary Practice Location

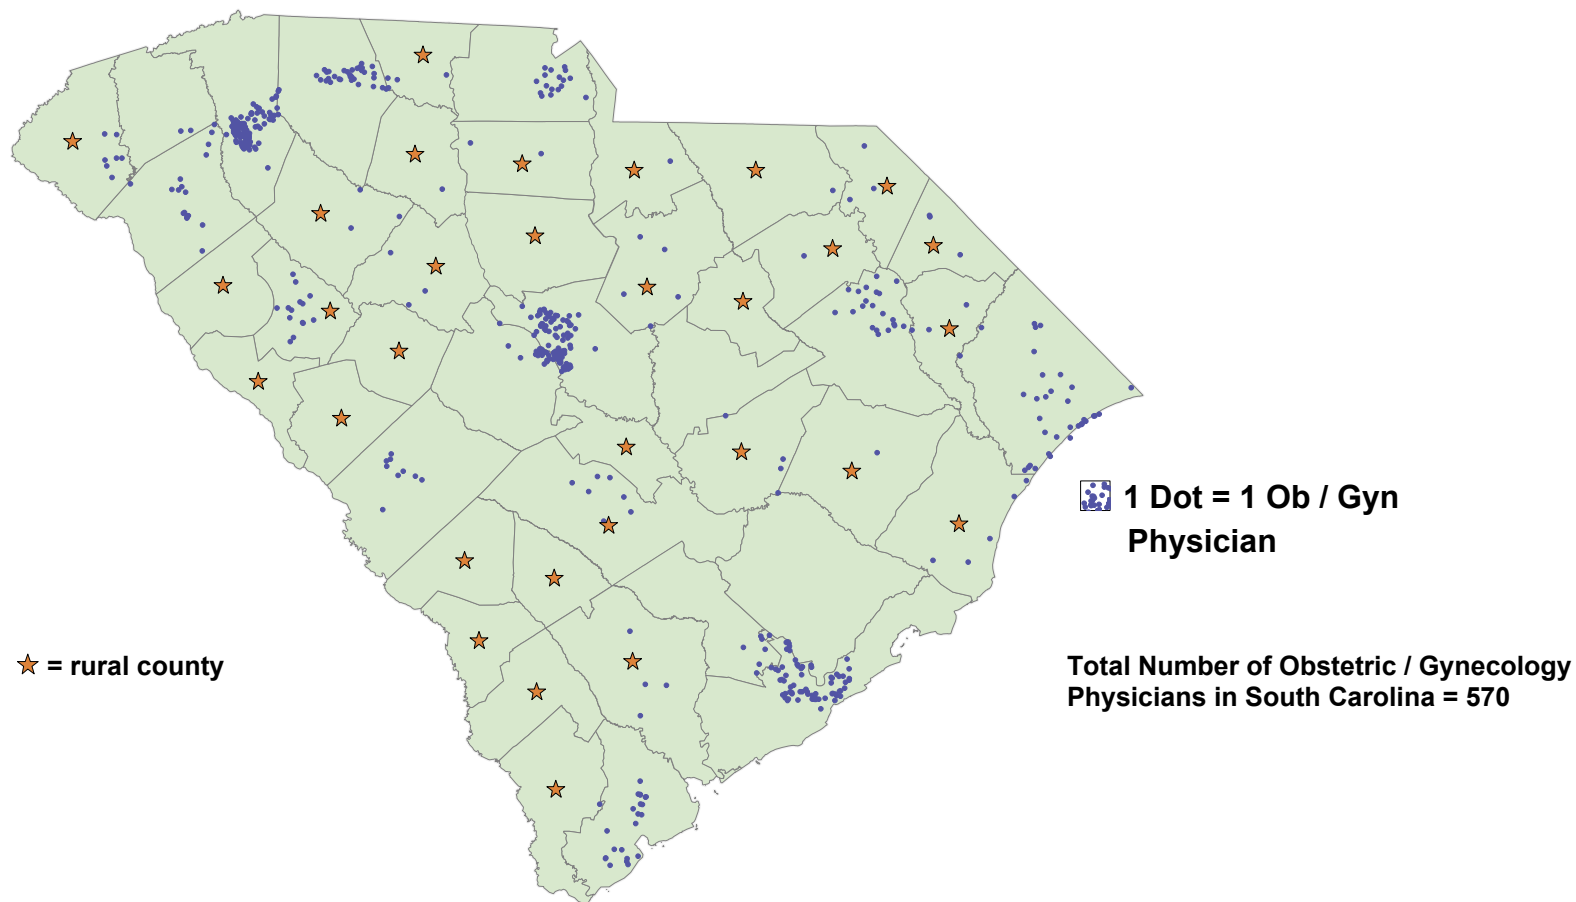

*This information is based on all Internal Medicine Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Internal Medicine Physicians Per 10,000 Population

*This information is based on all Internal Medicine Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

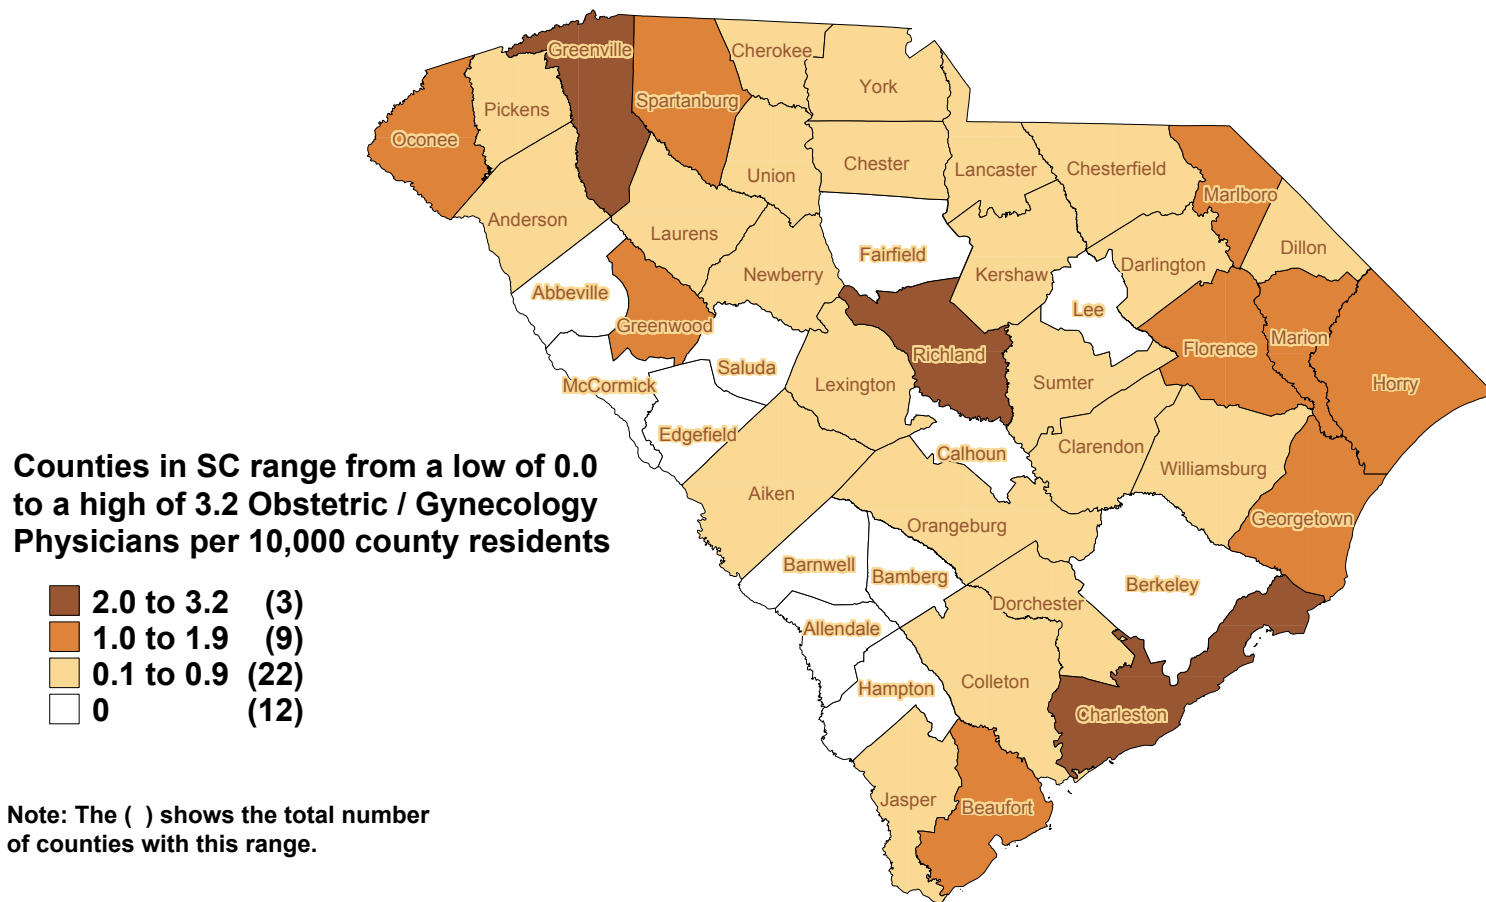

## Obstetric / Gynecology Physicians in South Carolina by Primary Practice Location

*This information is based on all Obstetric / Gynecology Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

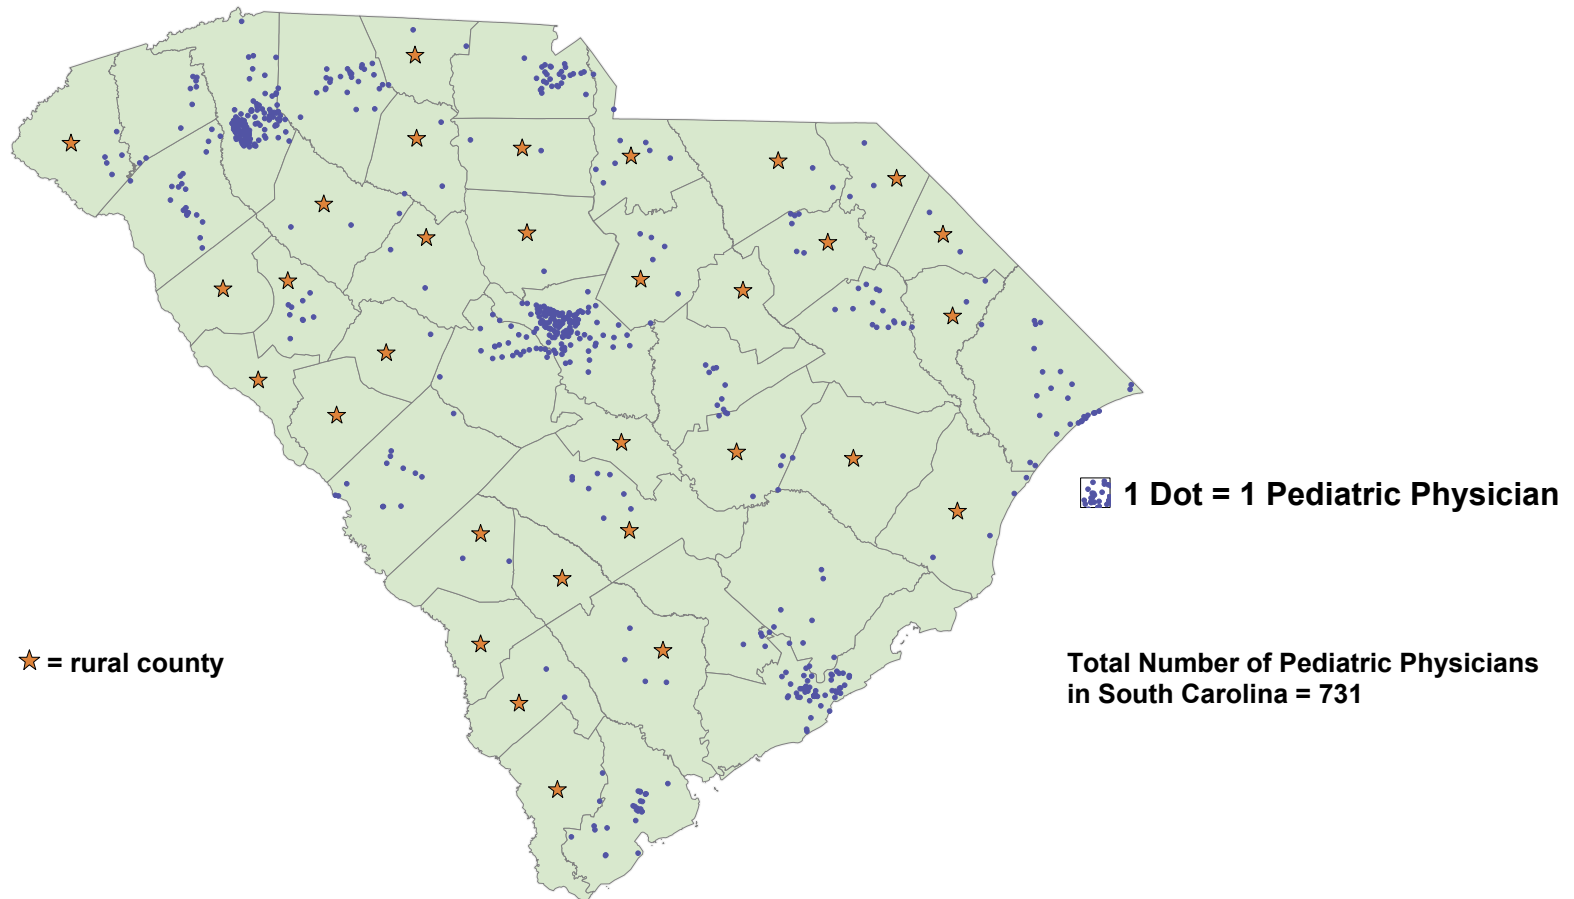

## Concentration of Obstetric / Gynecology Physicians Per 10,000 Population

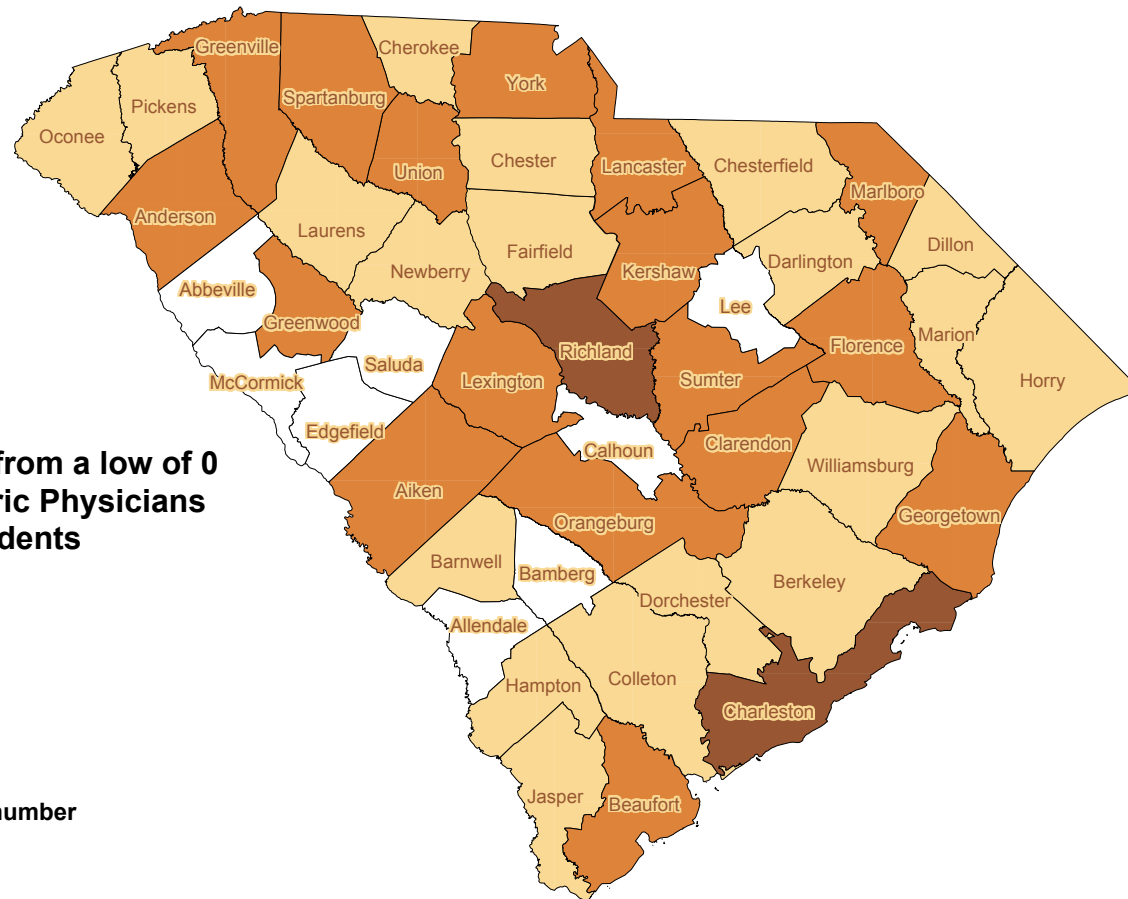

*This information is based on all Obstetric / Gynecology Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## Pediatric Physicians in South Carolina by Primary Practice Location

*This information is based on all Pediatric Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Pediatric Physicians Per 10,000 Population

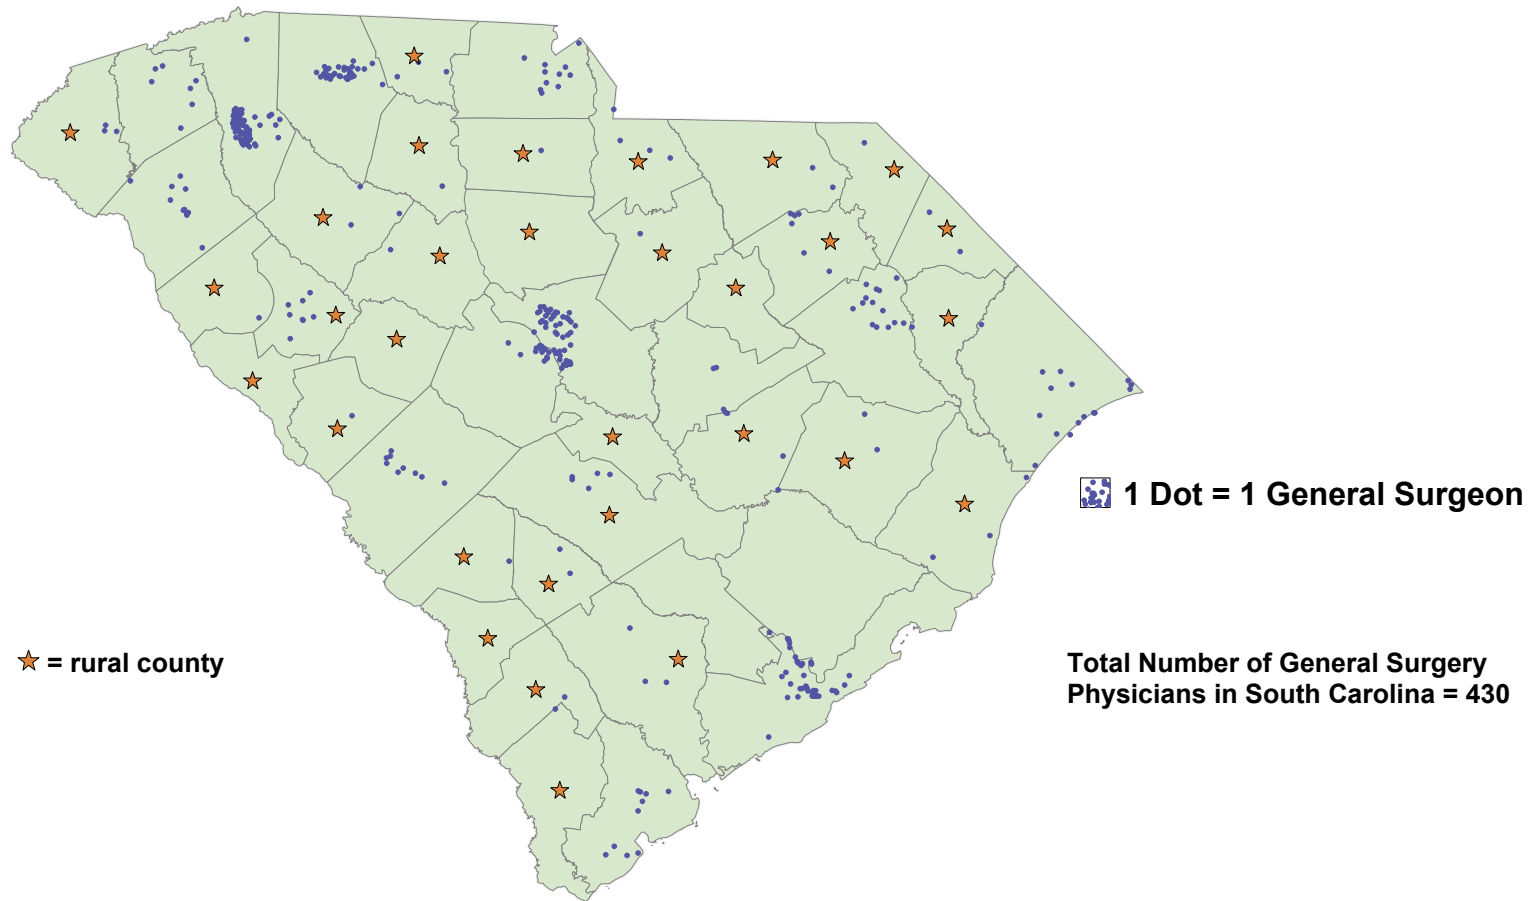

Counties in SC range from a low of 0 to a high of 4.3 Pediatric Physicians per 10,000 county residents

- 3.0 to 4.3 (2)
- 1.0 to 2.9 (17)
- 0.1 to 0.9 (19)
- 0 (8)

Note: The ( ) shows the total number of counties with this range.

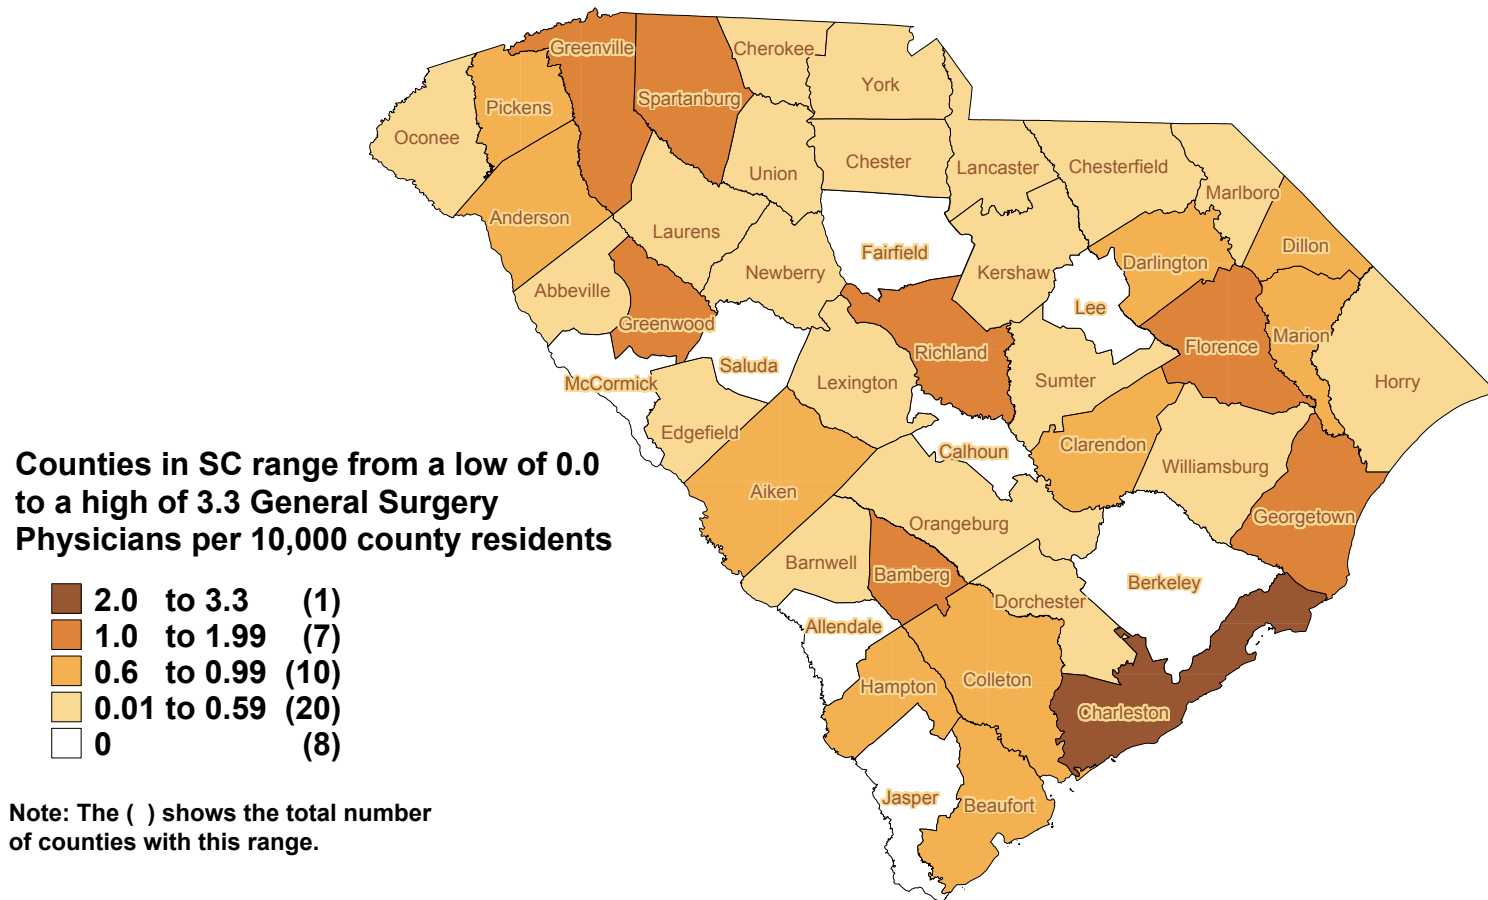

*This information is based on all Pediatric Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## General Surgery Physicians in South Carolina by Primary Practice Location

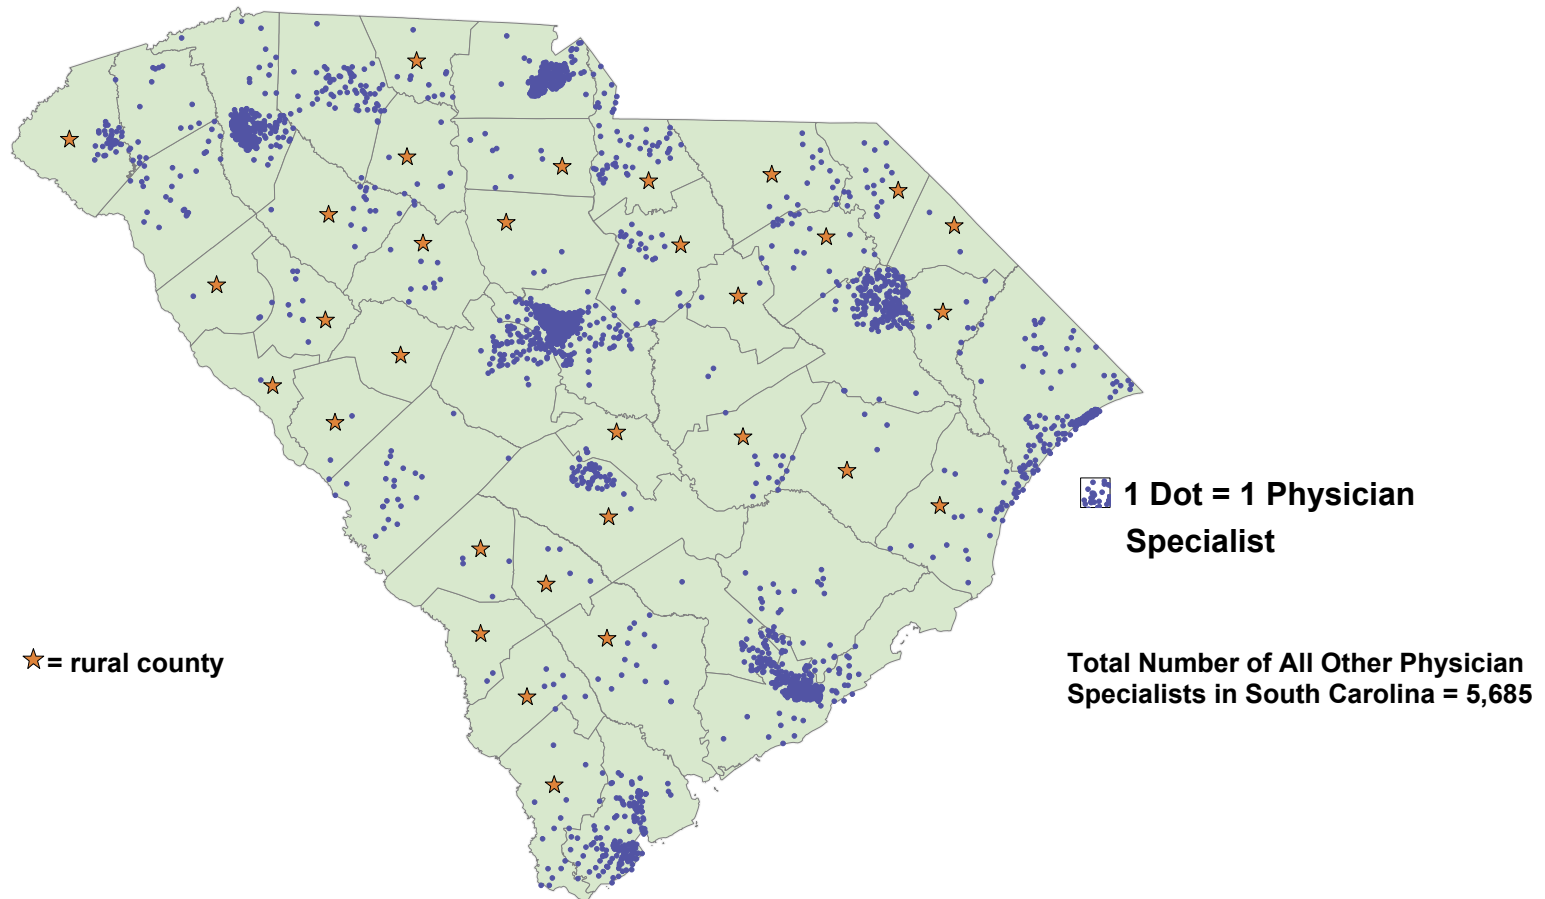

*This information is based on all General Surgery Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of General Surgery Physicians Per 10,000 Population

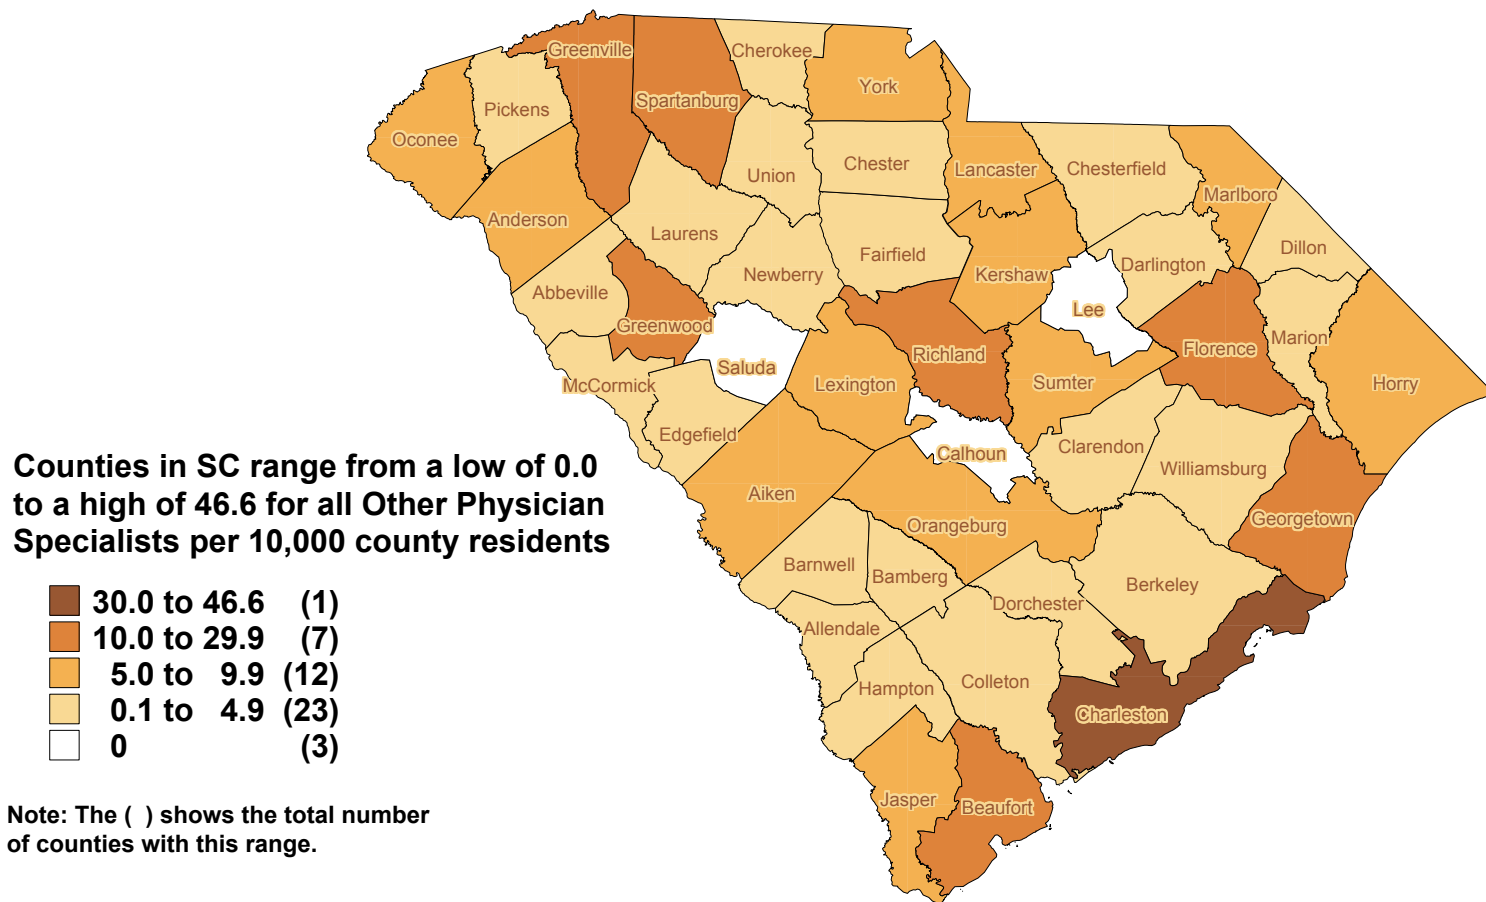

*This information is based on all General Surgery Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## All Other Physician Specialists in South Carolina by Primary Practice Location

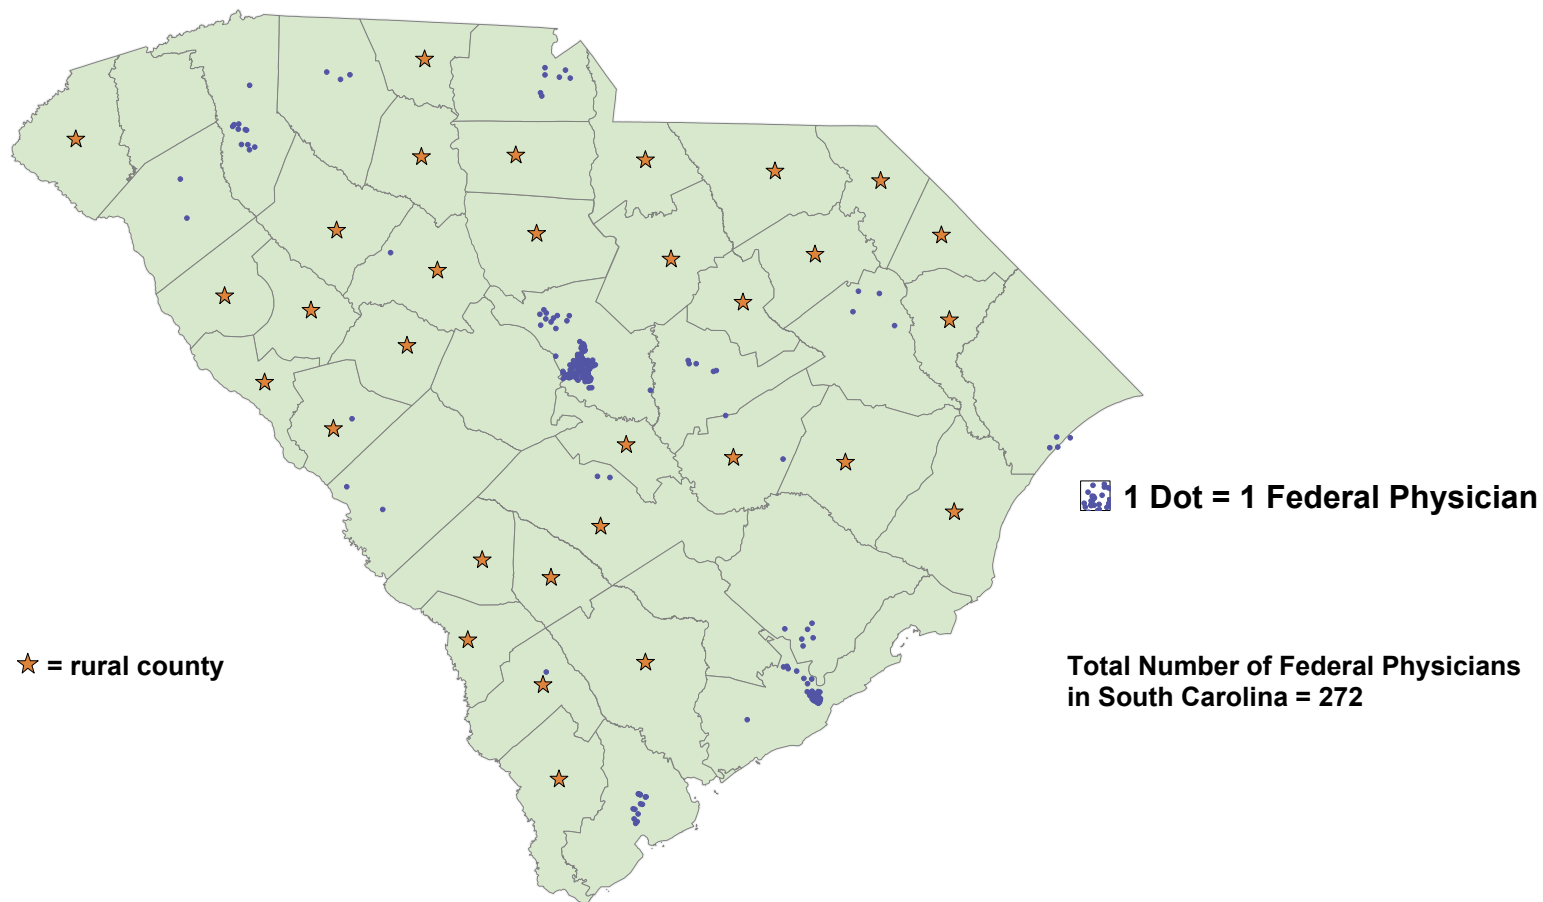

*This information is based on all Physicians who report their specialty area anything other than General Practice, Family Medicine, Internal Medicine, Pediatrics, Obstetrics, Gynecology, or General Surgery, with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of All Other Physician Specialists Per 10,000 Population

*This information is based on all Physicians who reported their specialty area as anything other than General Practice, Family Medicine, Internal Medicine, Pediatrics, Obstetrics, Gynecology, or General Surgery, with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

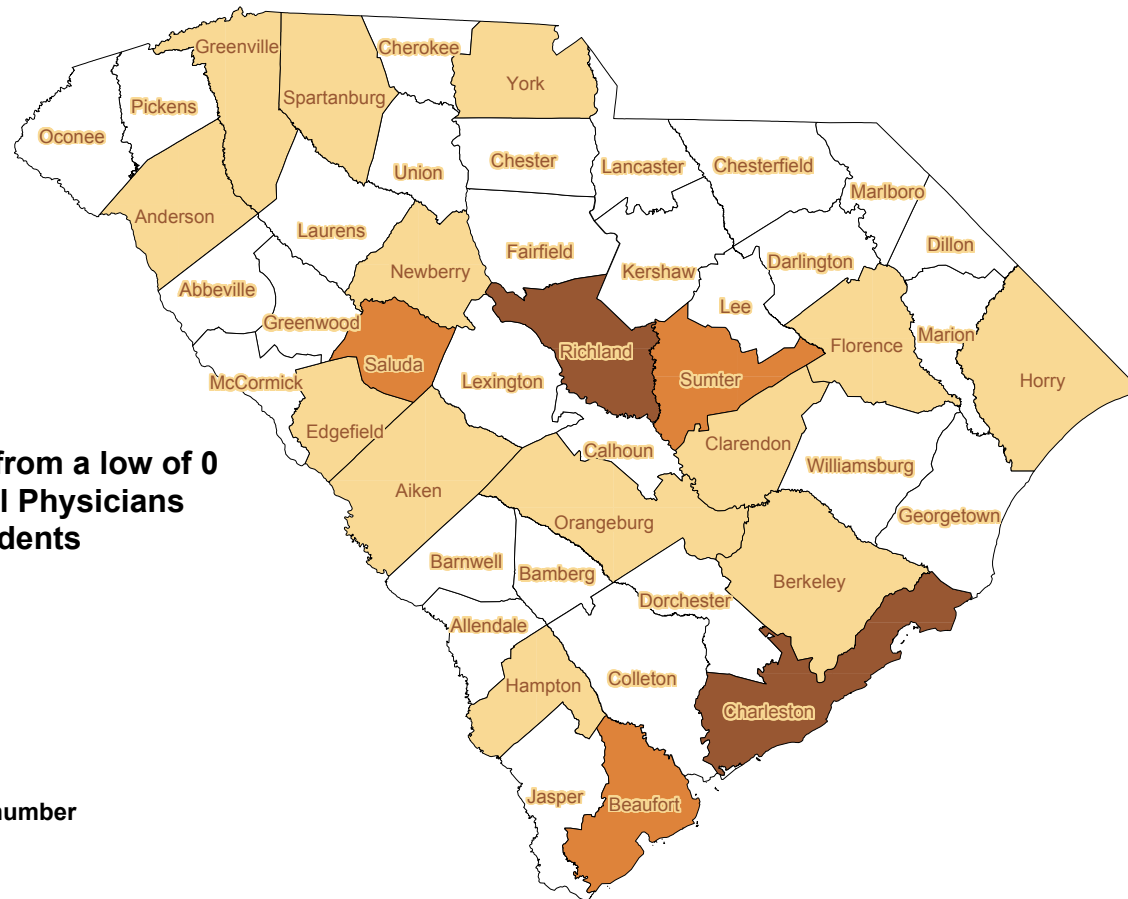

## Federal Physicians in South Carolina by Primary Practice Location

*This information is based on all Federal Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

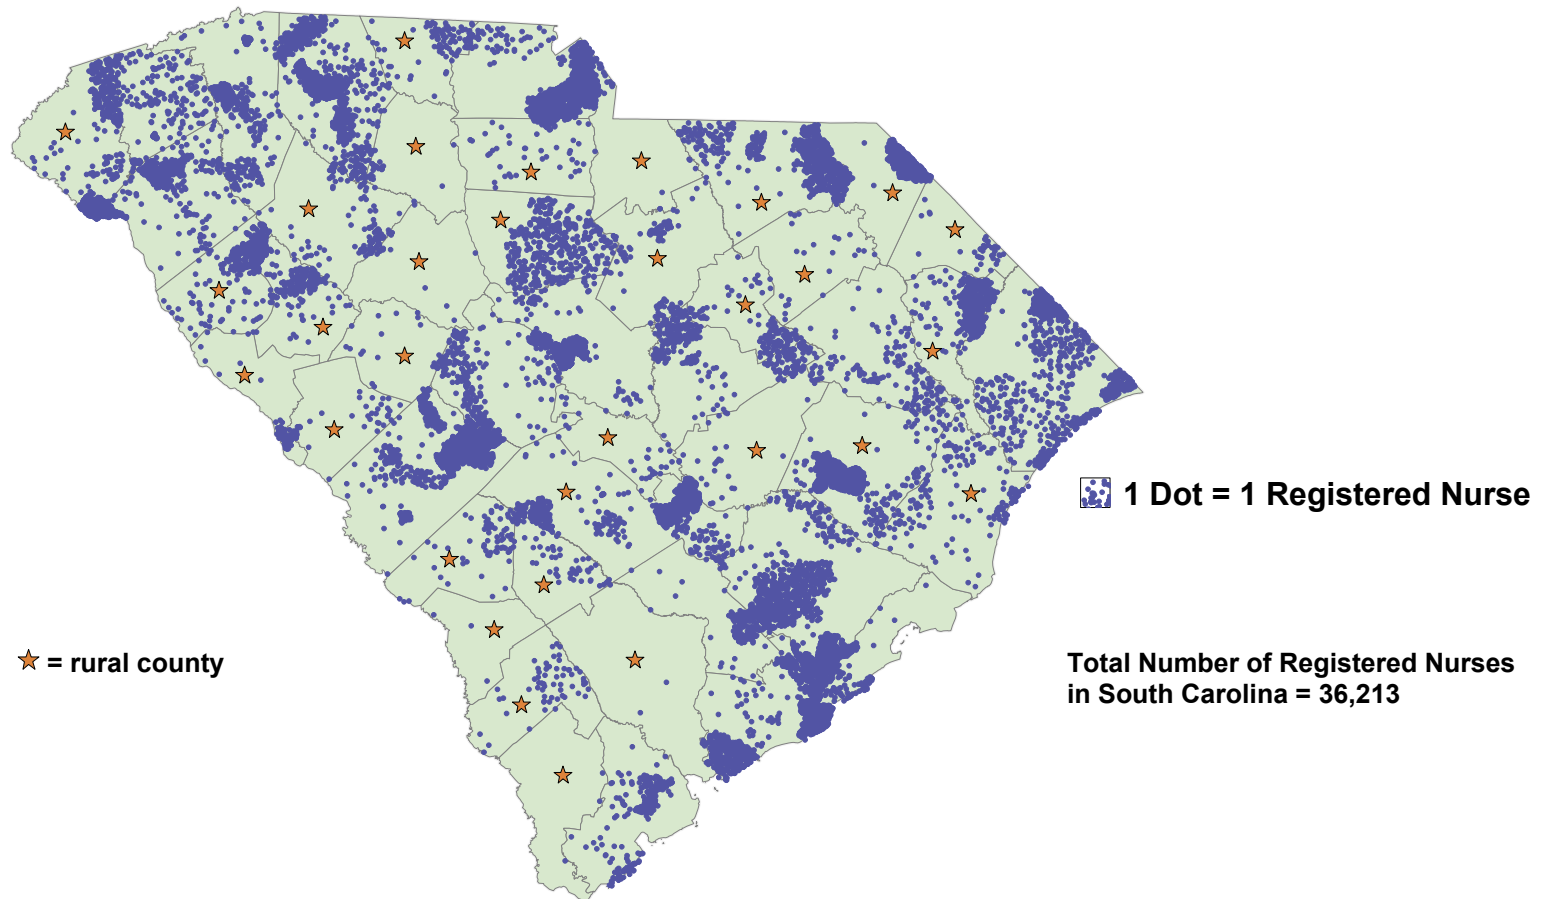

## Concentration of Federal Physicians Per 10,000 Population

*This information is based on all Federal Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2011. The county practice locations are those reported as the primary practice site.*

## Registered Nurses in South Carolina by Primary Practice Location

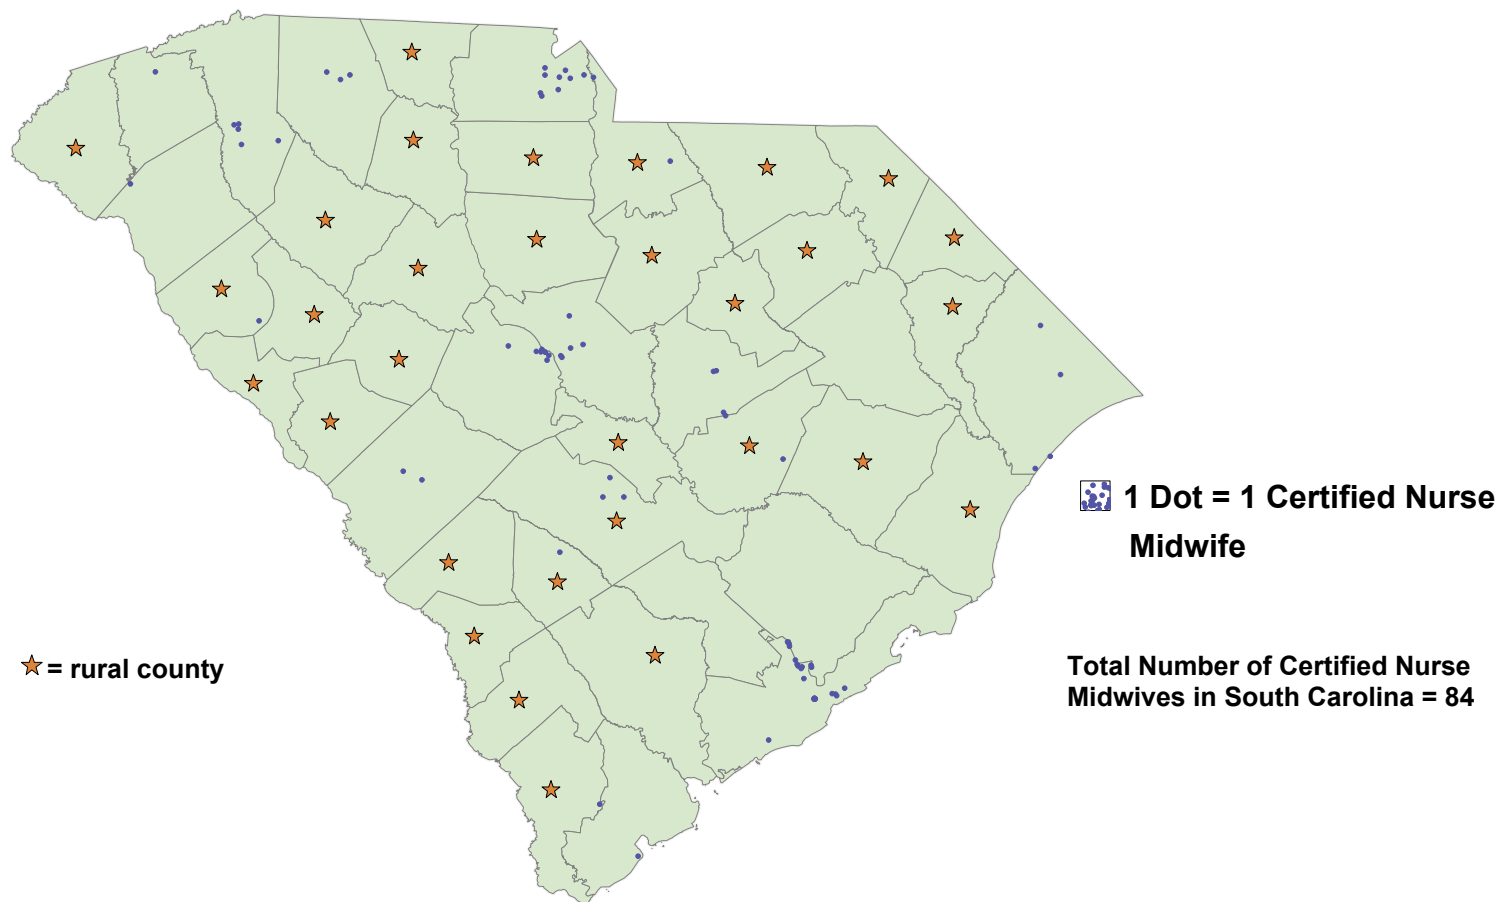

*This information is based on all Registered Nurses, except Advanced Practice Nurses, with an active license to practice and a practice location in South Carolina, as reported during the license renewal period ending 04/30/2010. Locations plotted here are primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street address of the practice. Six Registered Nurses without a valid South Carolina zip code were omitted from this map. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Registered Nurses Per 10,000 Population

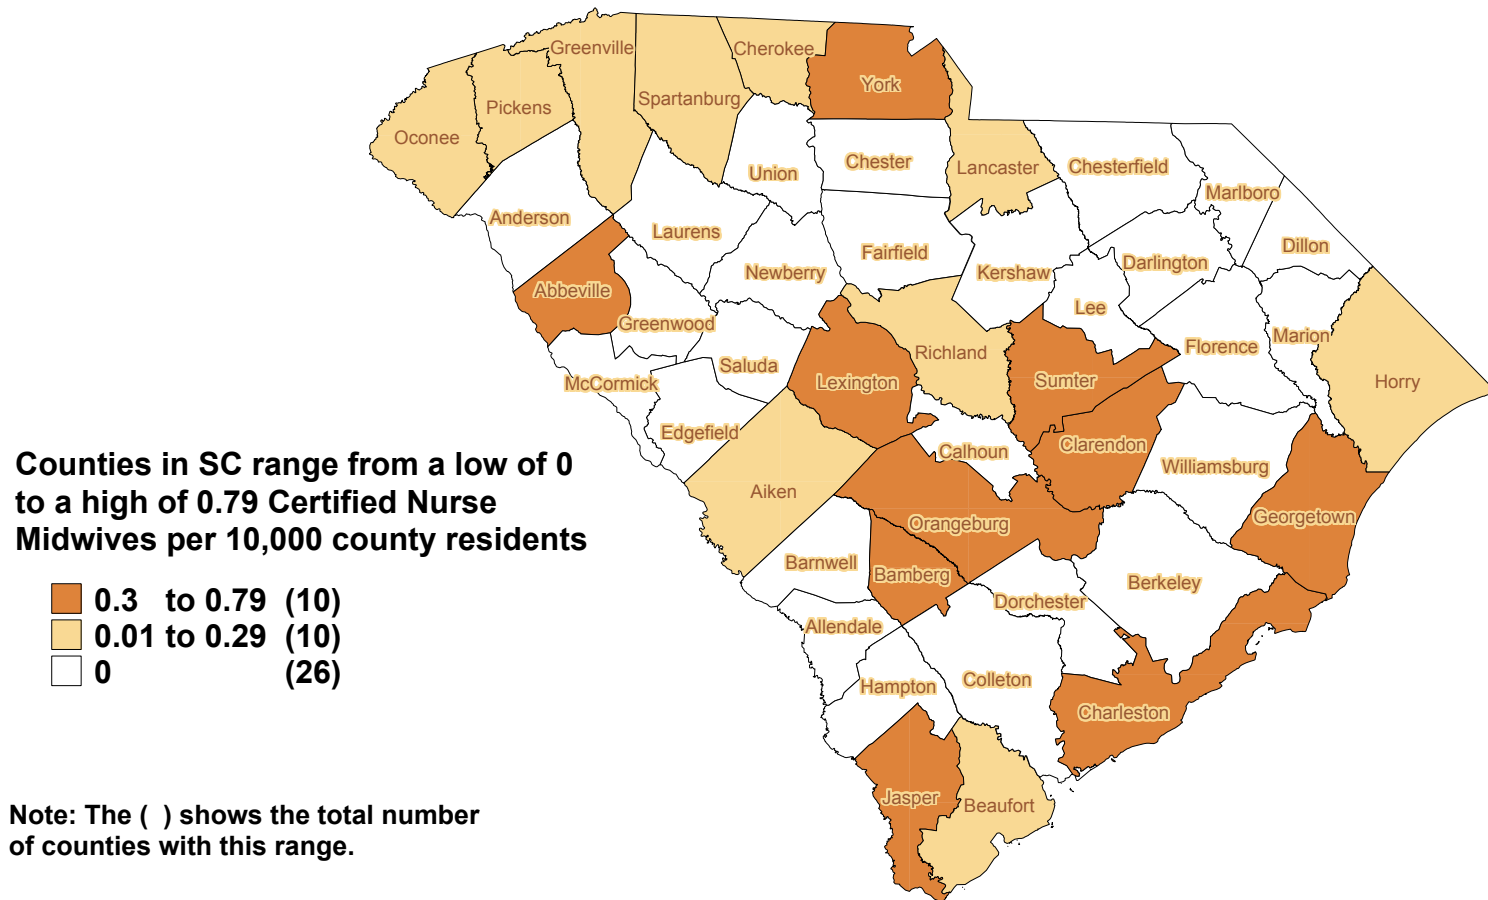

*This information is based on all Registered Nurses, except Advanced Practice Nurses, with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

## Certified Nurse Midwives in South Carolina by Primary Practice Location

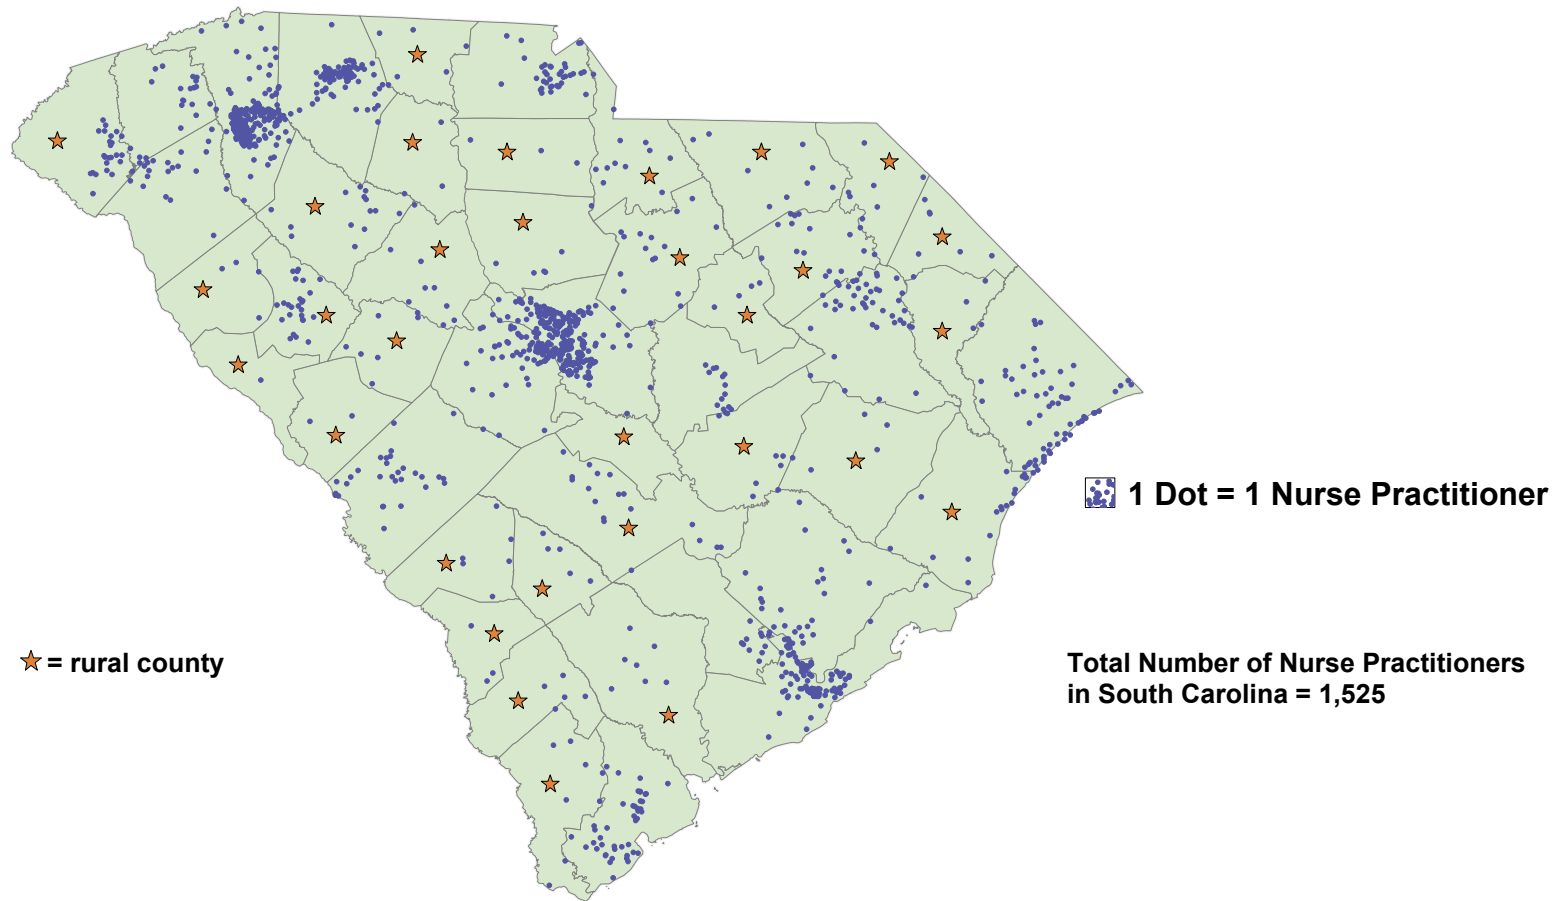

*This information is based on all Certified Nurse Midwives with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Certified Nurse Midwives Per 10,000 Population

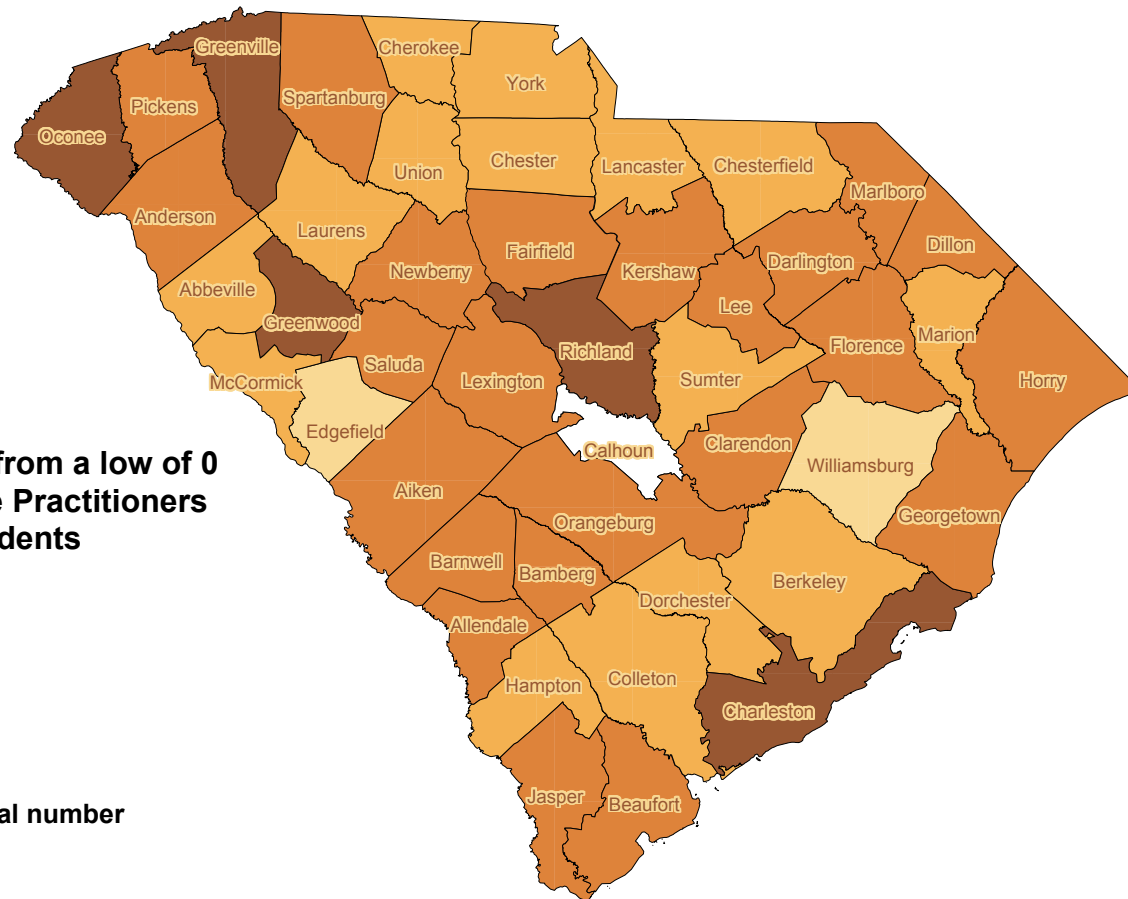

*This information is based on all Certified Nurse Midwives with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

## Nurse Practitioners in South Carolina by Primary Practice Location

*This information is based on all Nurse Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Nurse Practitioners Per 10,000 Population

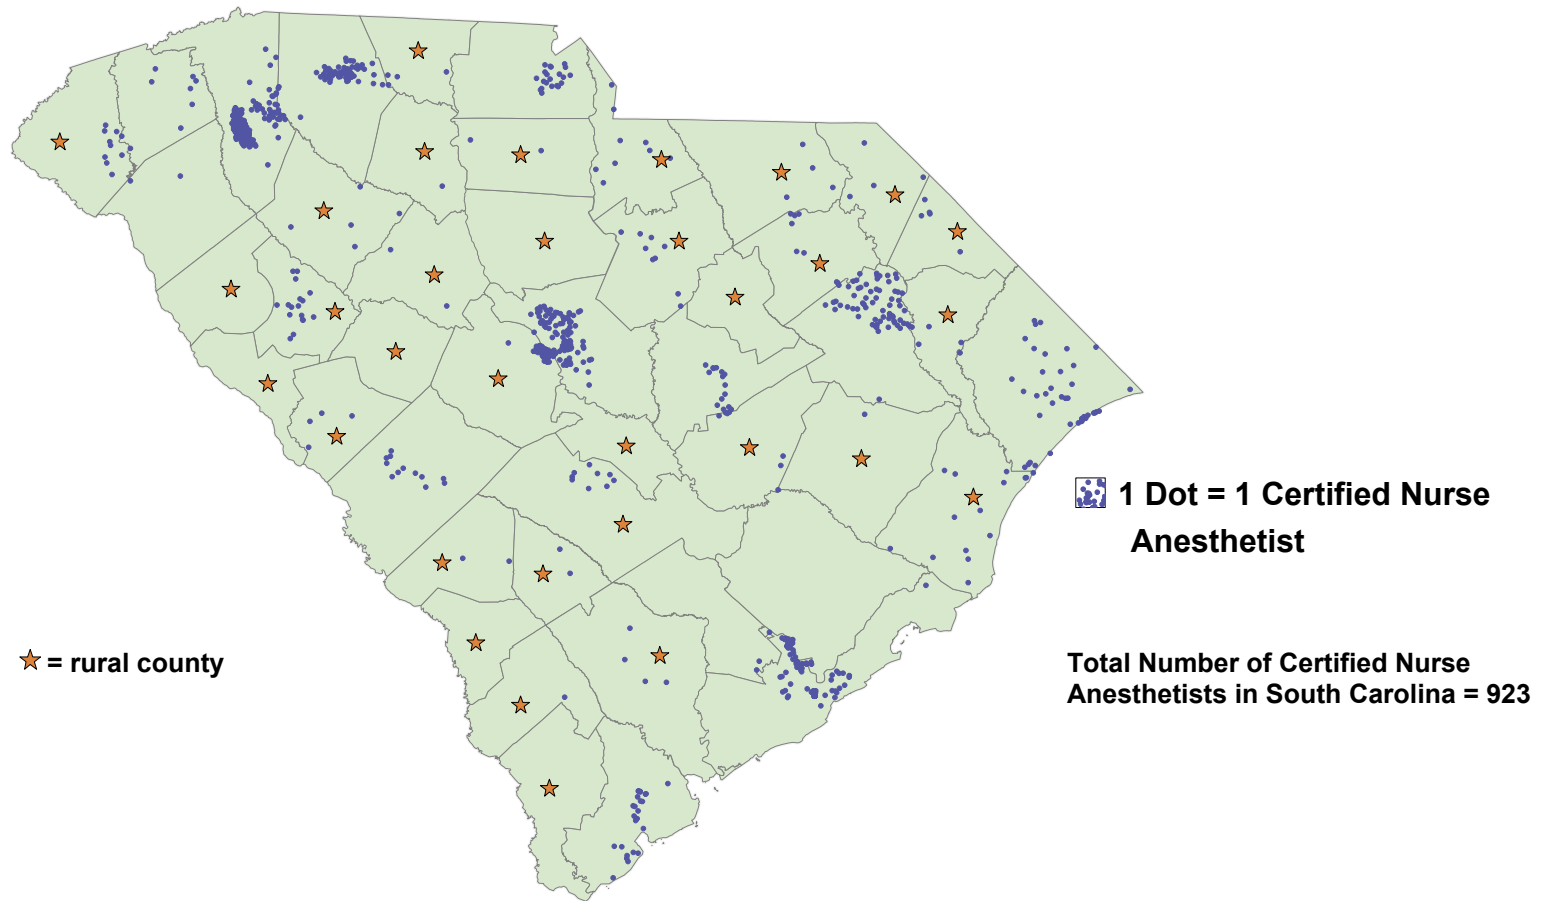

Counties in SC range from a low of 0 to a high of 7.50 Nurse Practitioners per 10,000 county residents

- 4.0 to 7.50 (5)
- 2.0 to 3.99 (23)
- 1.0 to 1.99 (15)
- 0.1 to 0.99 (2)
- 0 (1)

Note: The ( ) shows the total number of counties with this range.

*This information is based on all Nurse Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

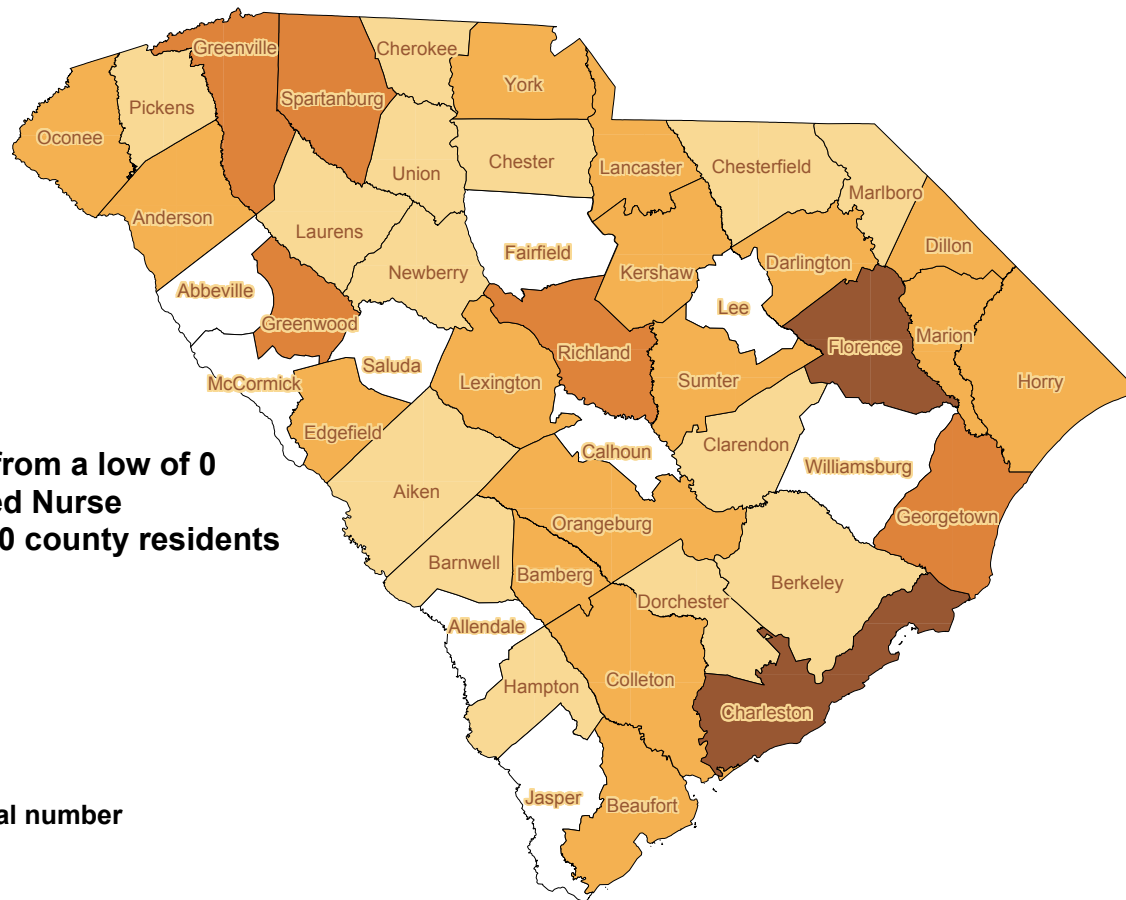

## Certified Nurse Anesthetists in South Carolina by Primary Practice Location

*This information is based on all Certified Nurse Anesthetists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice.*

## Concentration of Certified Nurse Anesthetists Per 10,000 Population

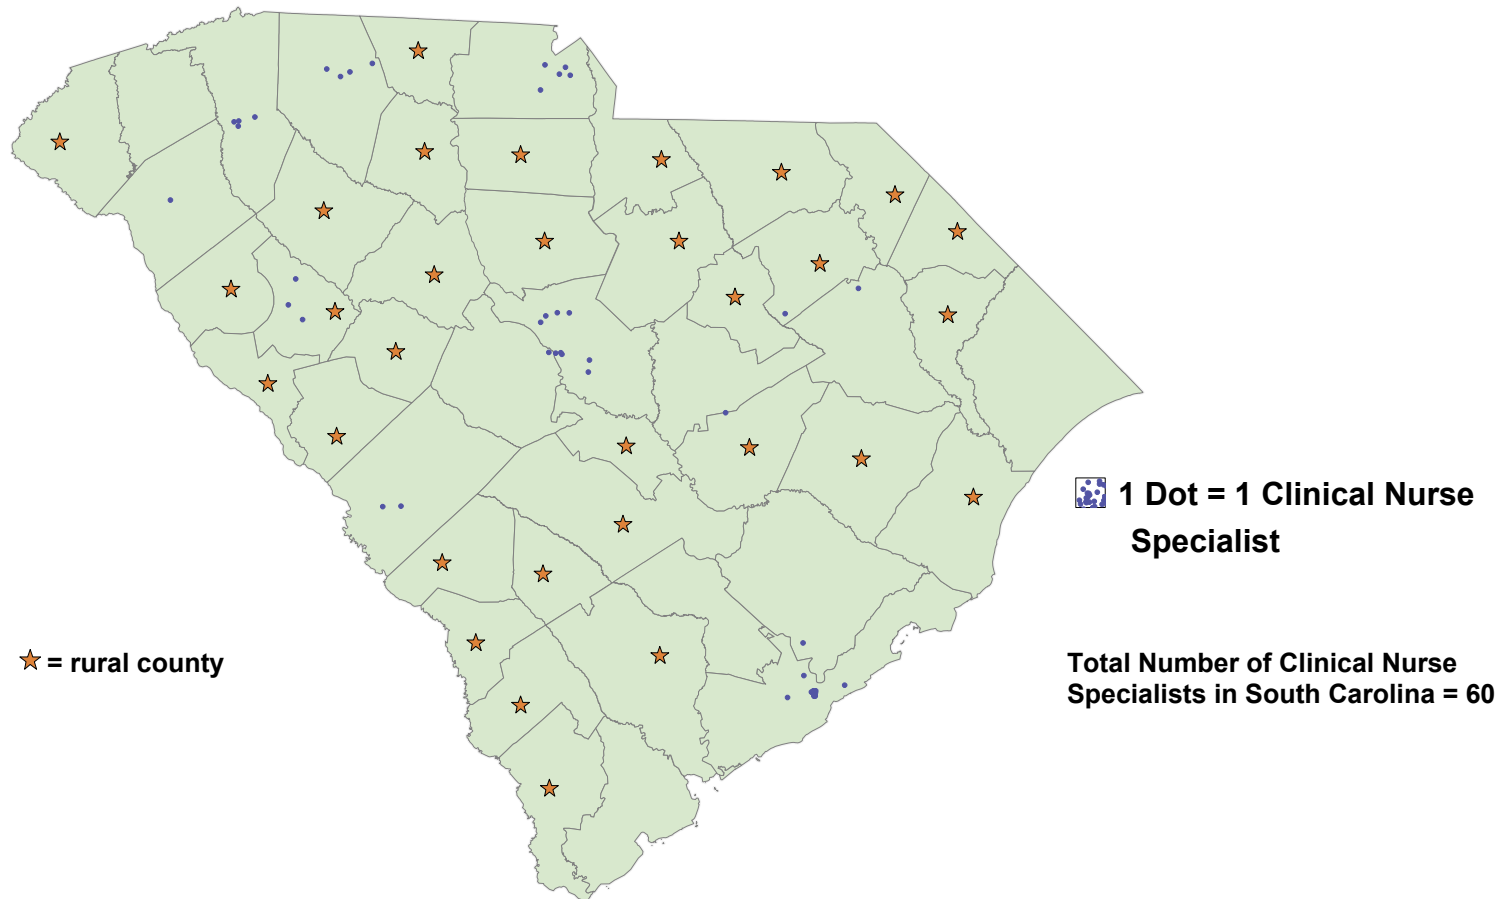

**Counties in SC range from a low of 0 to a high of 5.1 Certified Nurse Anesthetists per 10,000 county residents**

- 4.0 to 5.1 (2)
- 2.0 to 3.9 (5)
- 1.0 to 1.9 (16)
- 0.1 to 0.9 (14)
- 0 (9)

**Note:** The ( ) shows the total number of counties with this range.

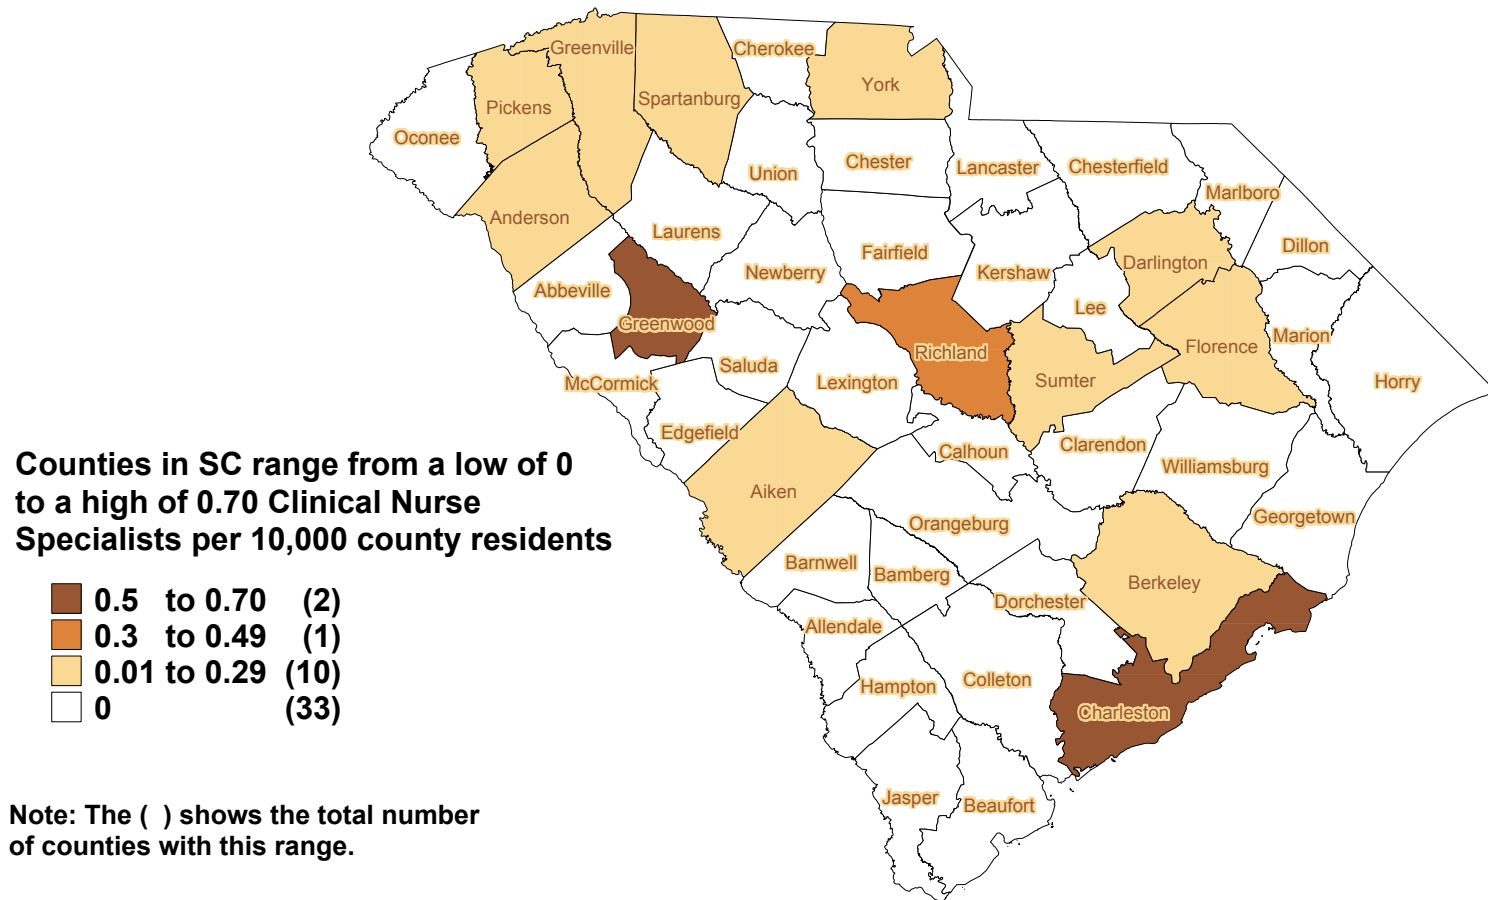

*This information is based on all Certified Nurse Anesthetists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

## Clinical Nurse Specialists in South Carolina by Primary Practice Location

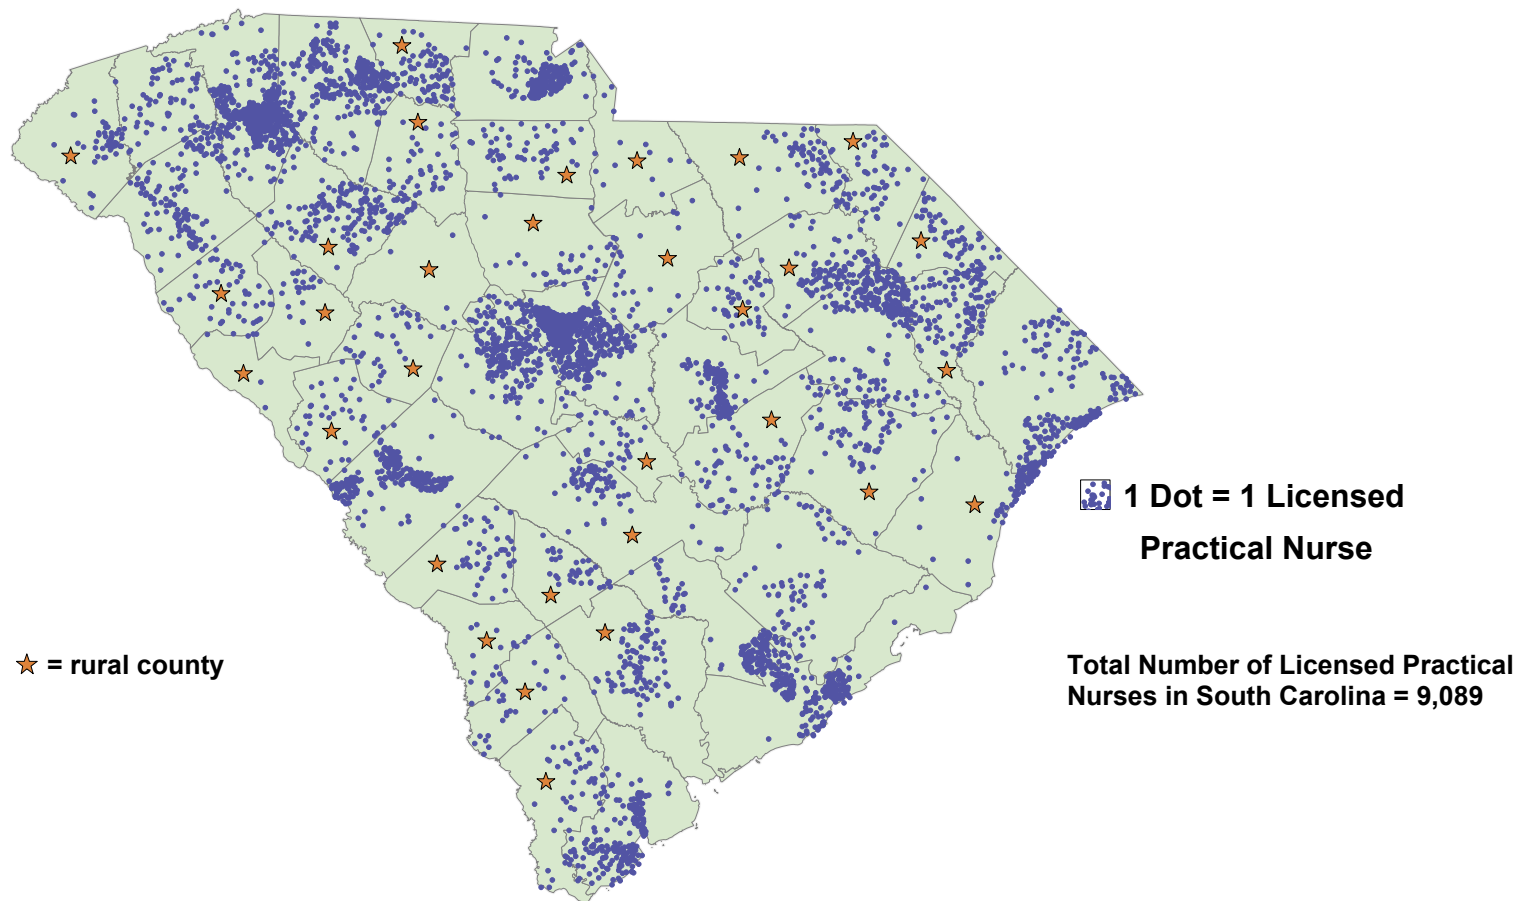

*This information is based on all Clinical Nurse Specialists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Clinical Nurse Specialists Per 10,000 Population

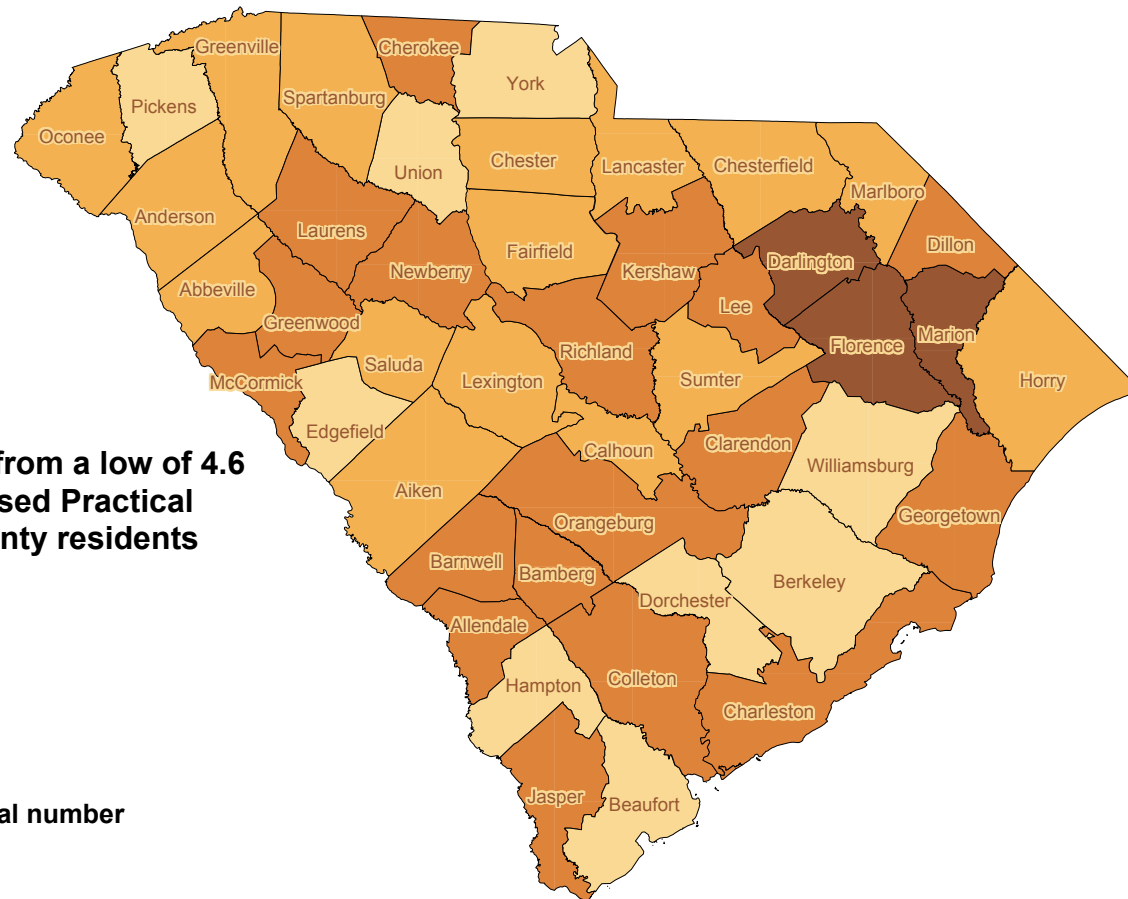

*This information is based on all Clinical Nurse Specialists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

## Licensed Practical Nurses in South Carolina by Primary Practice Location

*This information is based on all Licensed Practical Nurses with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Licensed Practical Nurses Per 10,000 Population

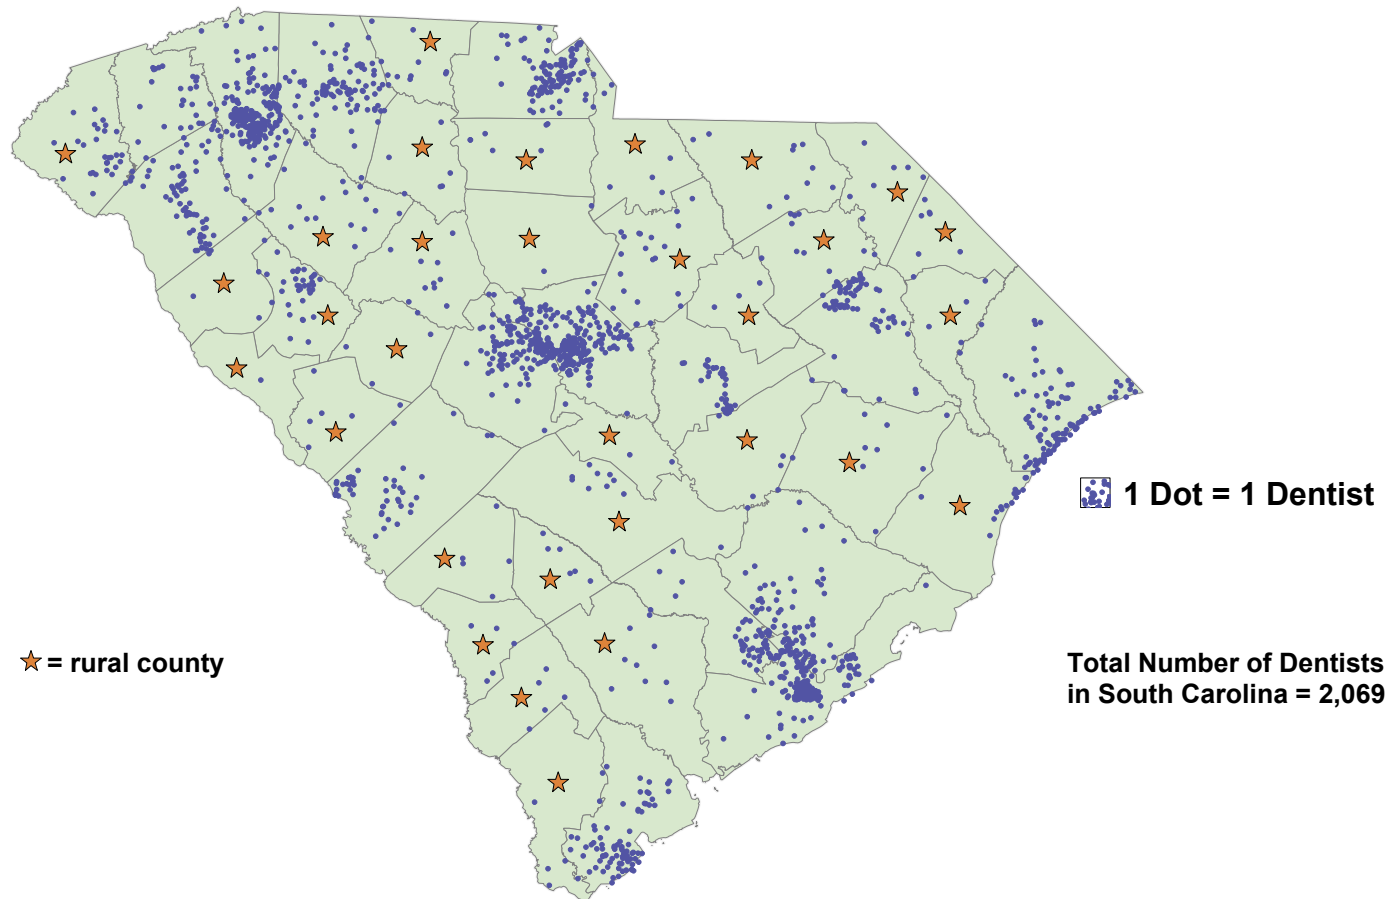

**Counties in SC range from a low of 4.6 to a high of 43.0 Licensed Practical Nurses per 10,000 county residents**

- 30.0 to 43.0 (3)**
- 20.0 to 29.9 (18)**
- 15.0 to 19.9 (16)**
- 4.6 to 14.9 (9)**

**Note: The ( ) shows the total number of counties with this range.**

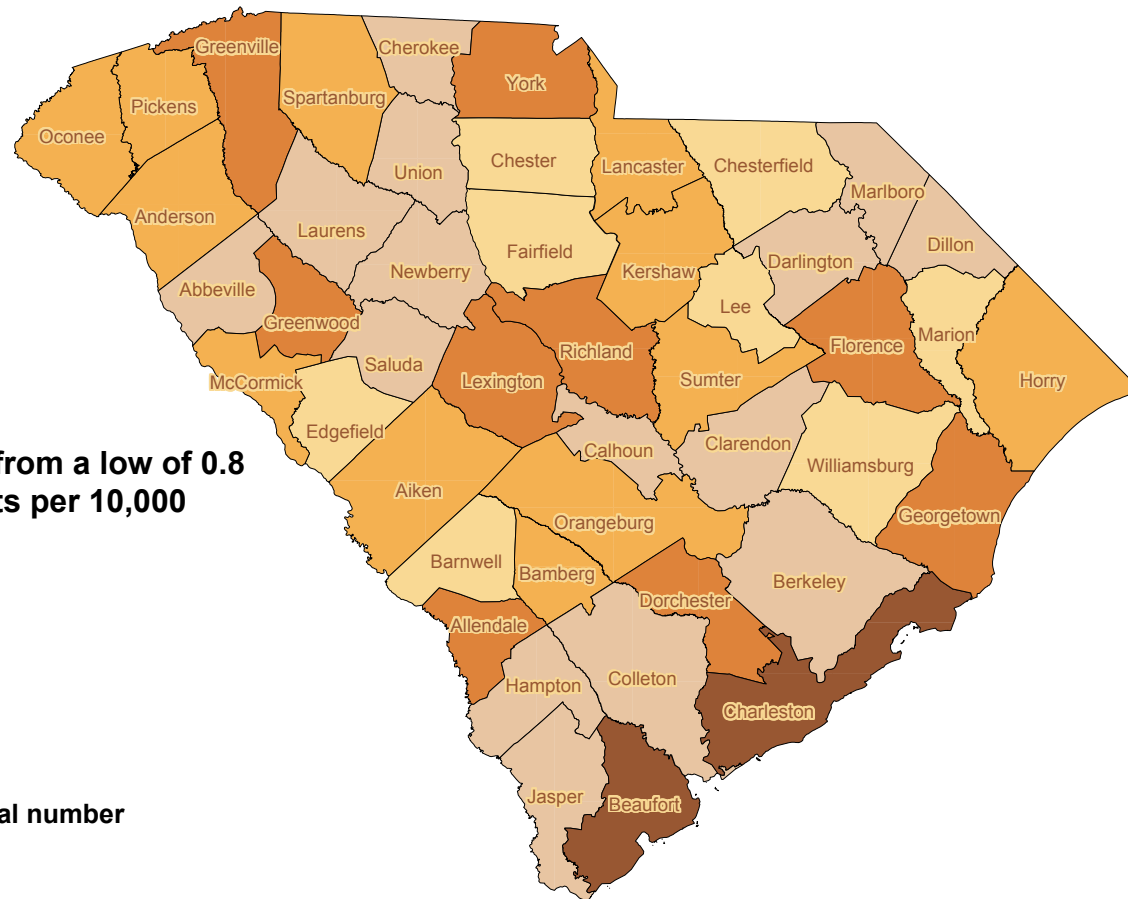

*This information is based on all Licensed Practical Nurses with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2010. The county practice locations are those reported as the primary practice site.*

## Dentists in South Carolina by Primary Practice Location

*This information is based on all Dentists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 2 Dentists who did not have a valid South Carolina zip code. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Dentists Per 10,000 Population

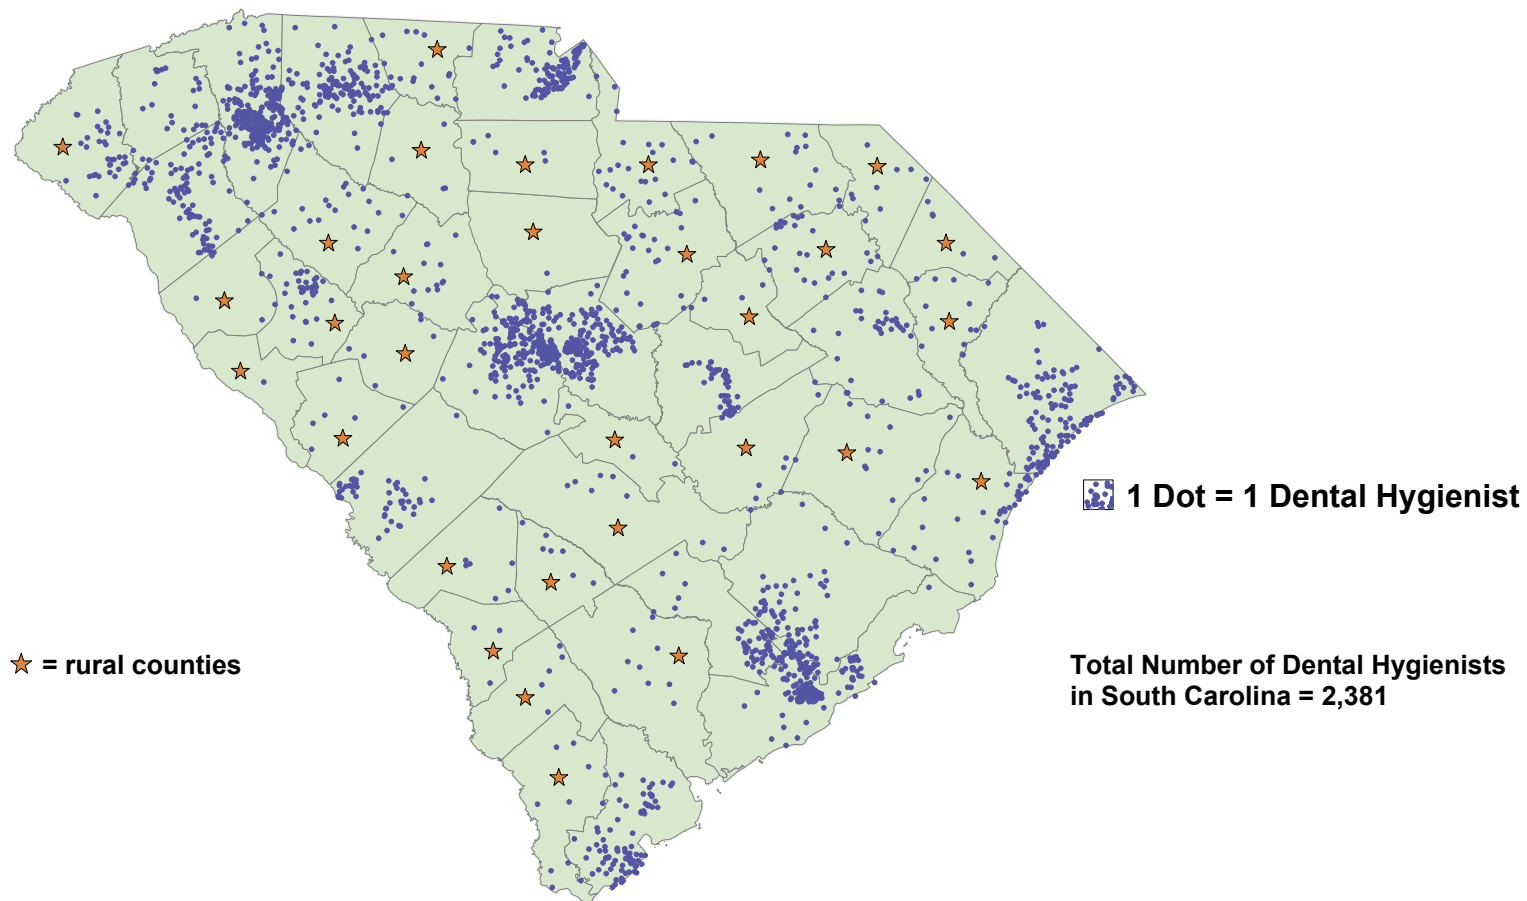

Counties in SC range from a low of 0.8 to a high of 8.8 Dentists per 10,000 county residents

- 7.0 to 8.8 (2)
- 4.5 to 6.9 (9)
- 3.0 to 4.4 (12)
- 2.0 to 2.9 (15)
- 0.8 to 1.9 (8)

Note: The ( ) shows the total number of counties with this range.

*This information is based on all Dentists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. The county practice locations are those reported as the primary practice site.*

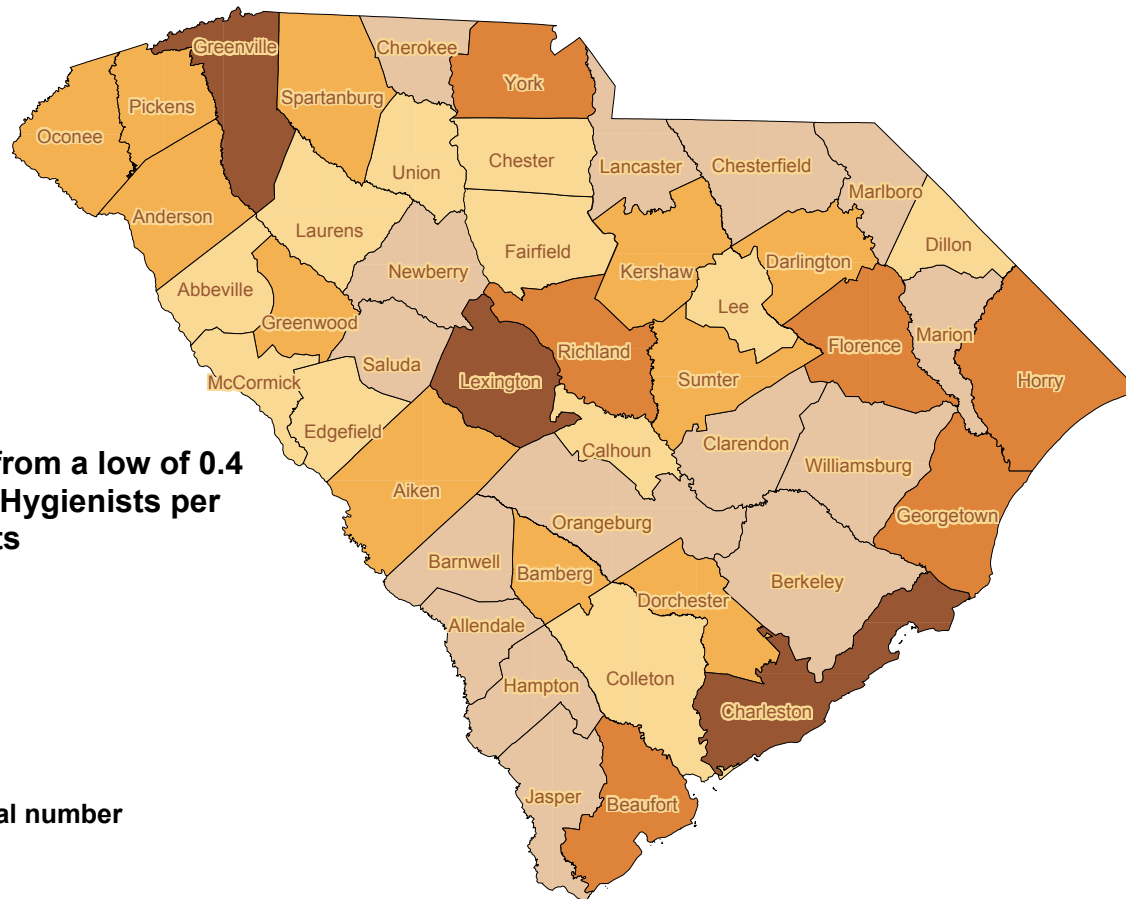

## Dental Hygienists in South Carolina by Primary Practice Location

*This information is based on all Dental Hygienists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 2 Dental Hygienists who did not have a valid South Carolina zip code. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Dental Hygienists Per 10,000 Population

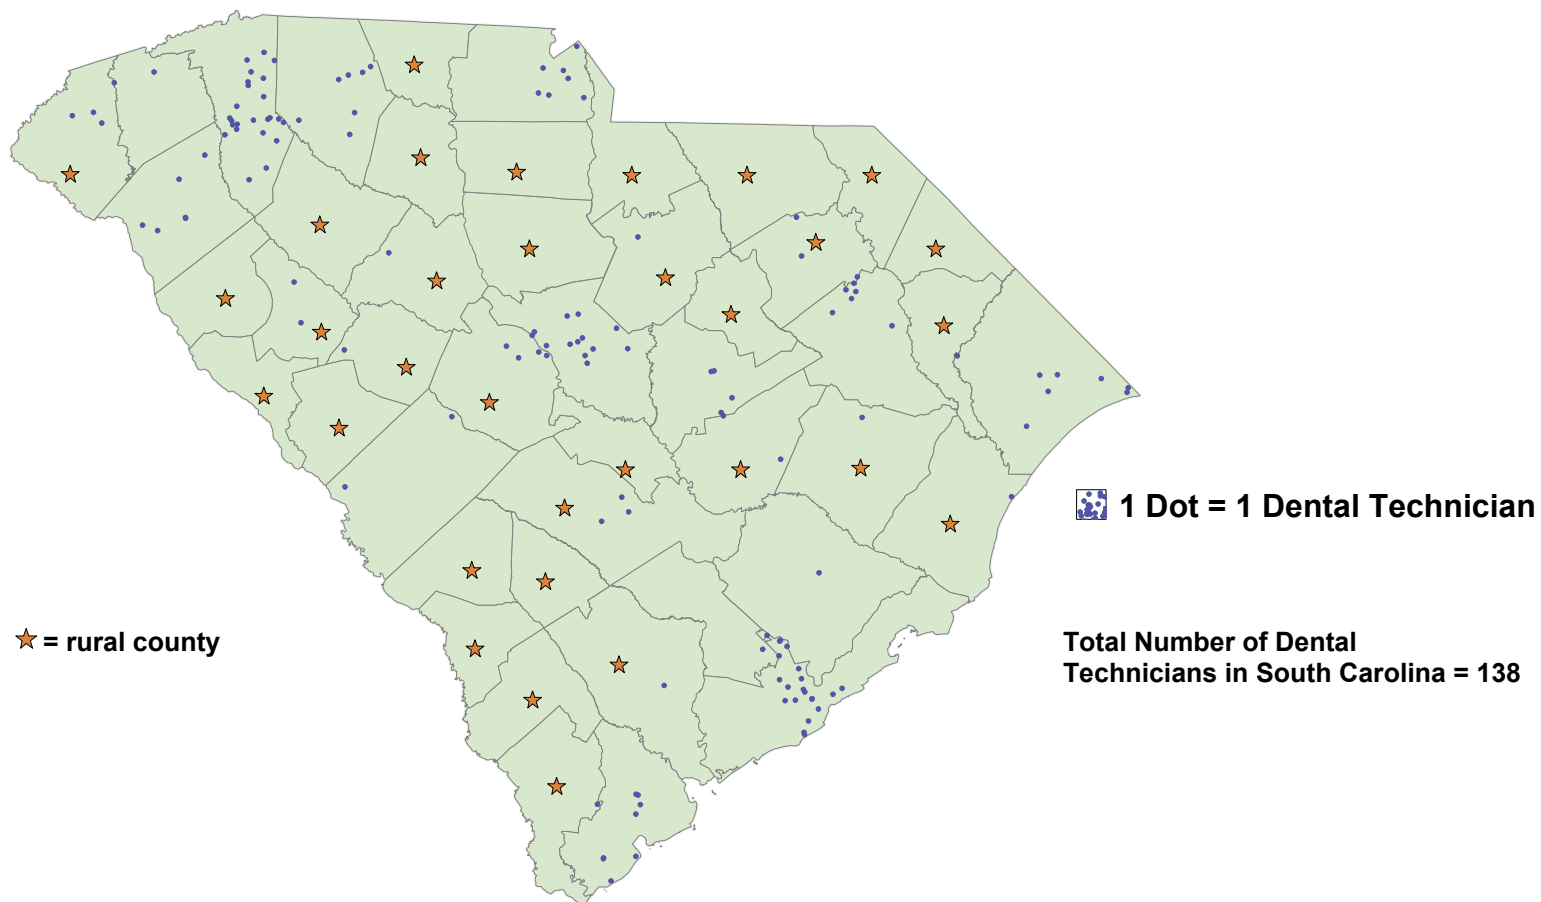

Counties in SC range from a low of 0.4 to a high of 7.7 Dental Hygienists per 10,000 county residents

- 7.0 to 7.7 (3)
- 5.5 to 6.9 (6)
- 4.0 to 5.4 (11)
- 2.5 to 3.9 (15)
- 0.4 to 2.4 (11)

Note: The ( ) shows the total number of counties with this range.

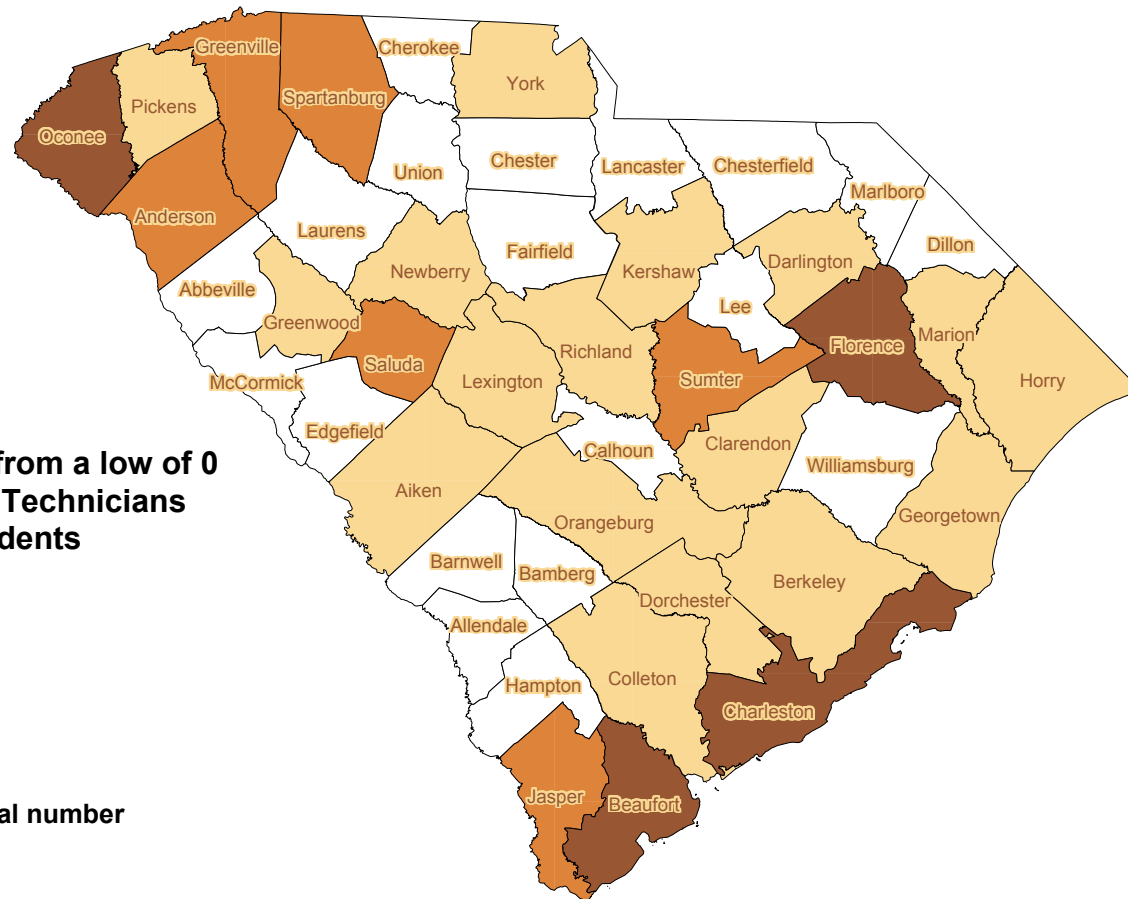

*This information is based on all Dental Hygienists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. The county practice locations are those reported as the primary practice site.*

## Dental Technicians in South Carolina by Primary Practice Location

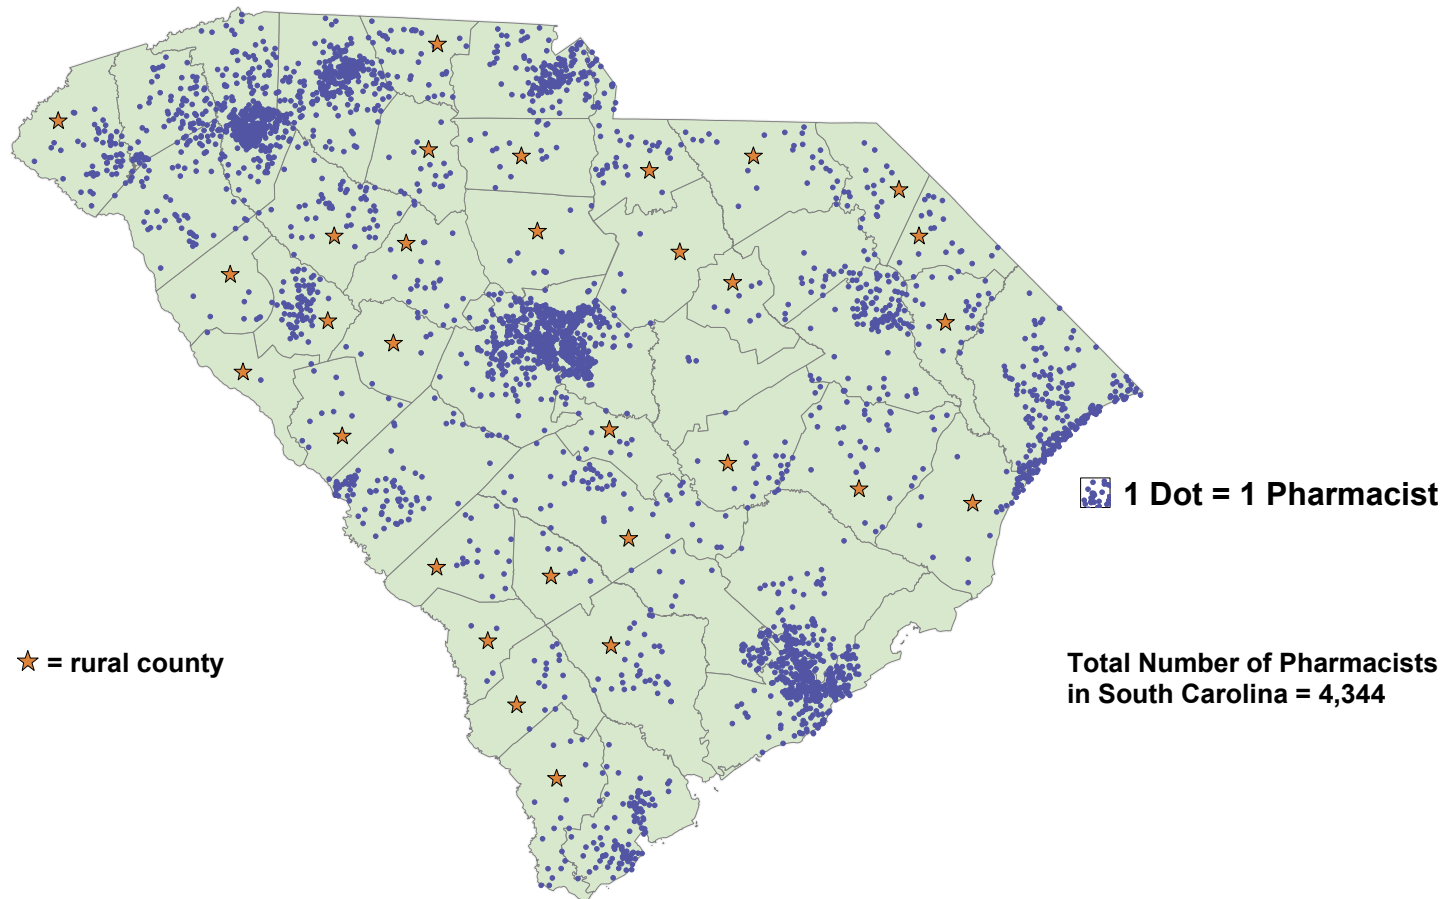

*This information is based on all Dental Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Dental Technicians Per 10,000 Population

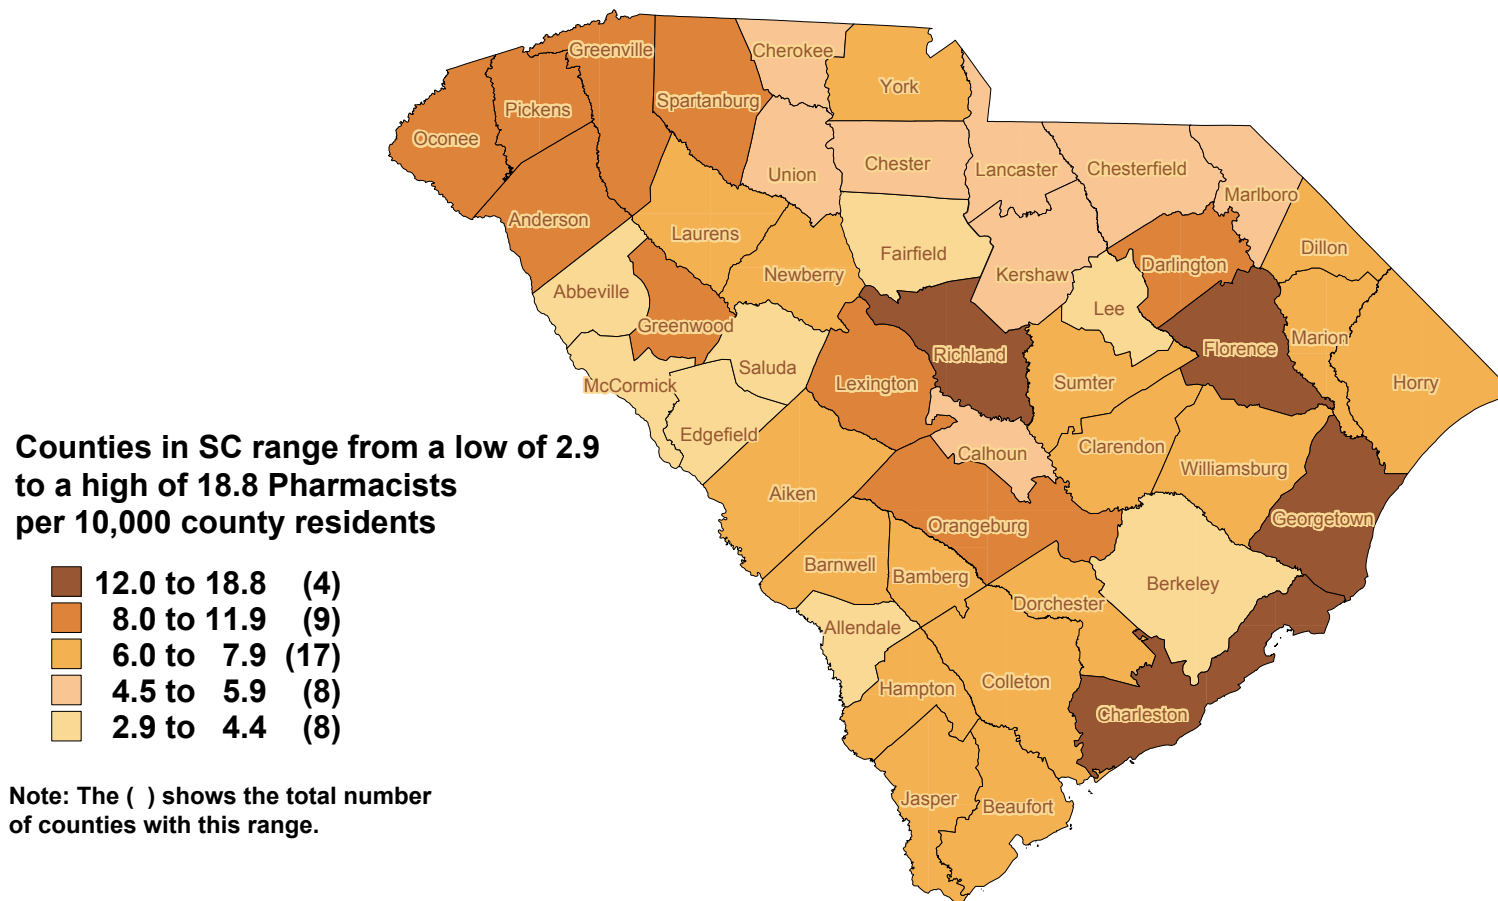

*This information is based on all Dental Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. The county practice locations are those reported as the primary practice site.*

## Pharmacists in South Carolina by Primary Practice Location

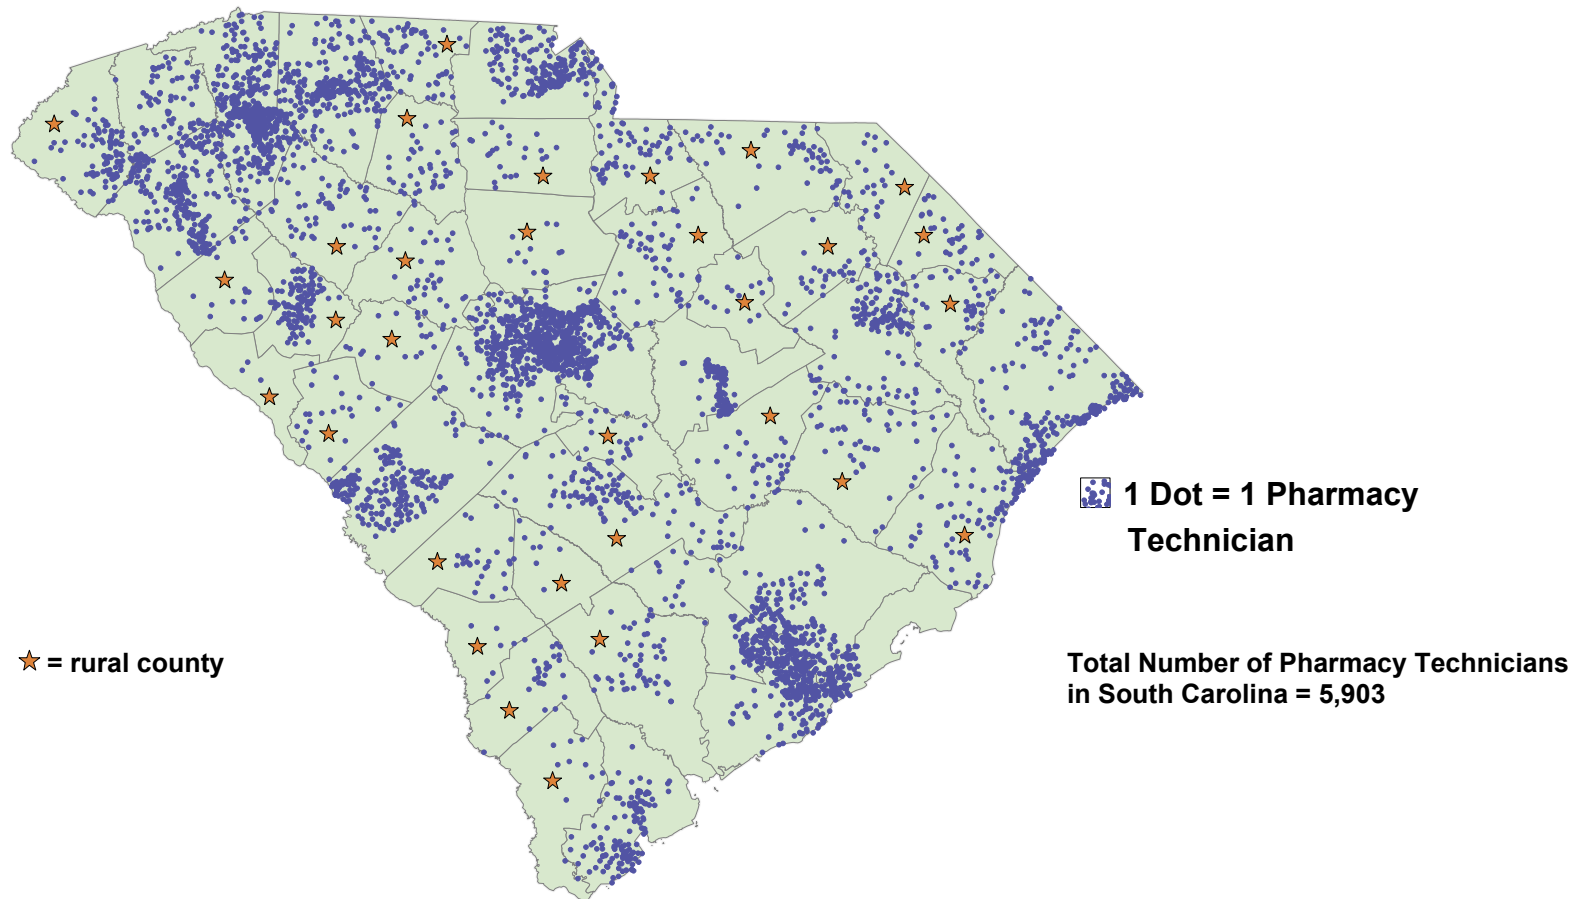

*This information is based on all Pharmacists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Pharmacists Per 10,000 Population

*This information is based on all Pharmacists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2011. The county practice locations are those reported as the primary practice site.*

## Pharmacy Technicians in South Carolina by Primary Practice Location

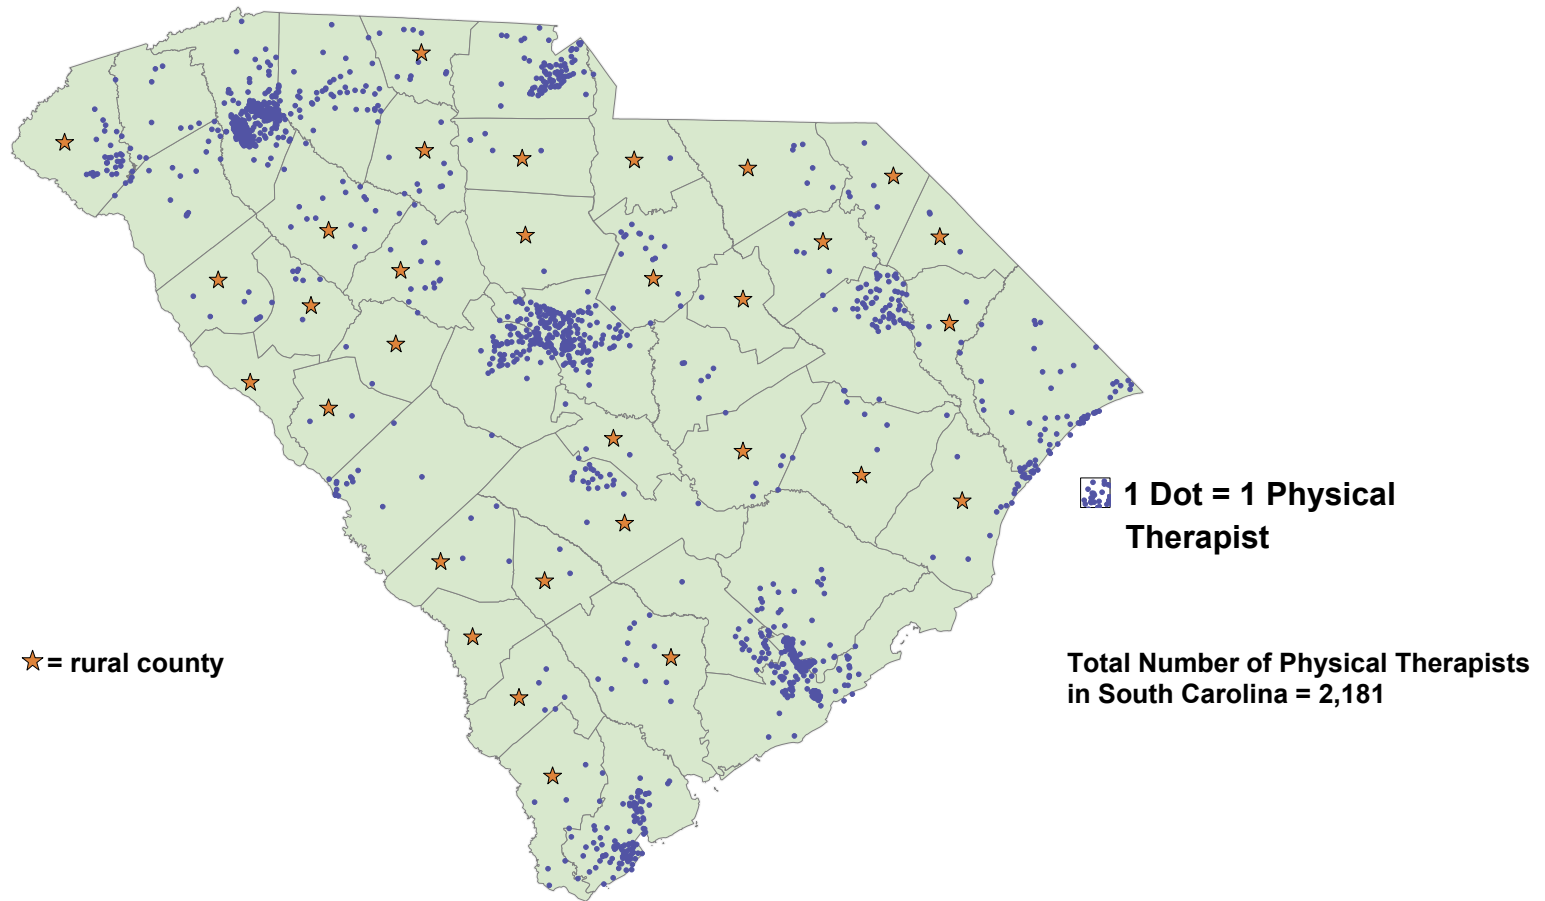

*This information is based on all Pharmacy Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 05/31/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Pharmacy Technicians Per 10,000 Population

*This information is based on all Pharmacy Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 05/31/2011. The county practice locations are those reported as the primary practice site.*

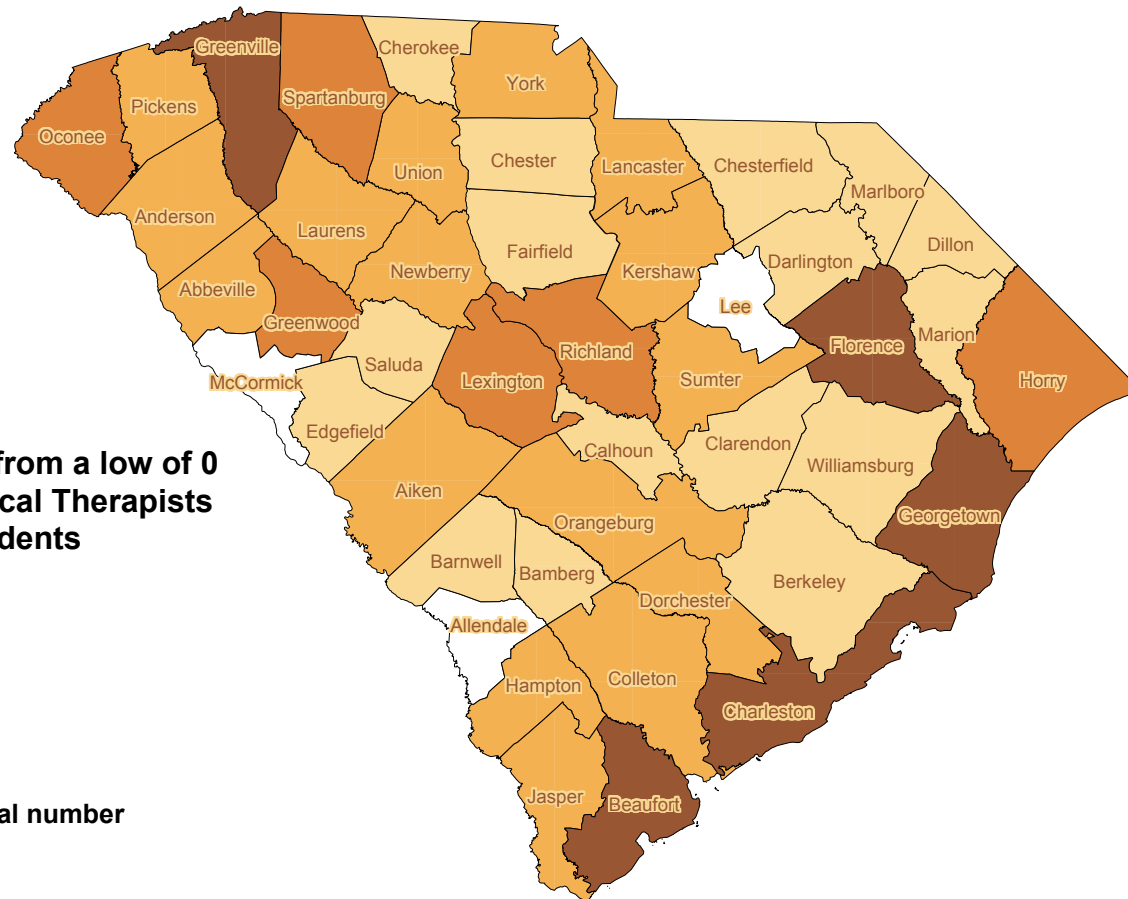

## Physical Therapists in South Carolina by Primary Practice Location

*This information is based on all Physical Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Physical Therapists Per 10,000 Population

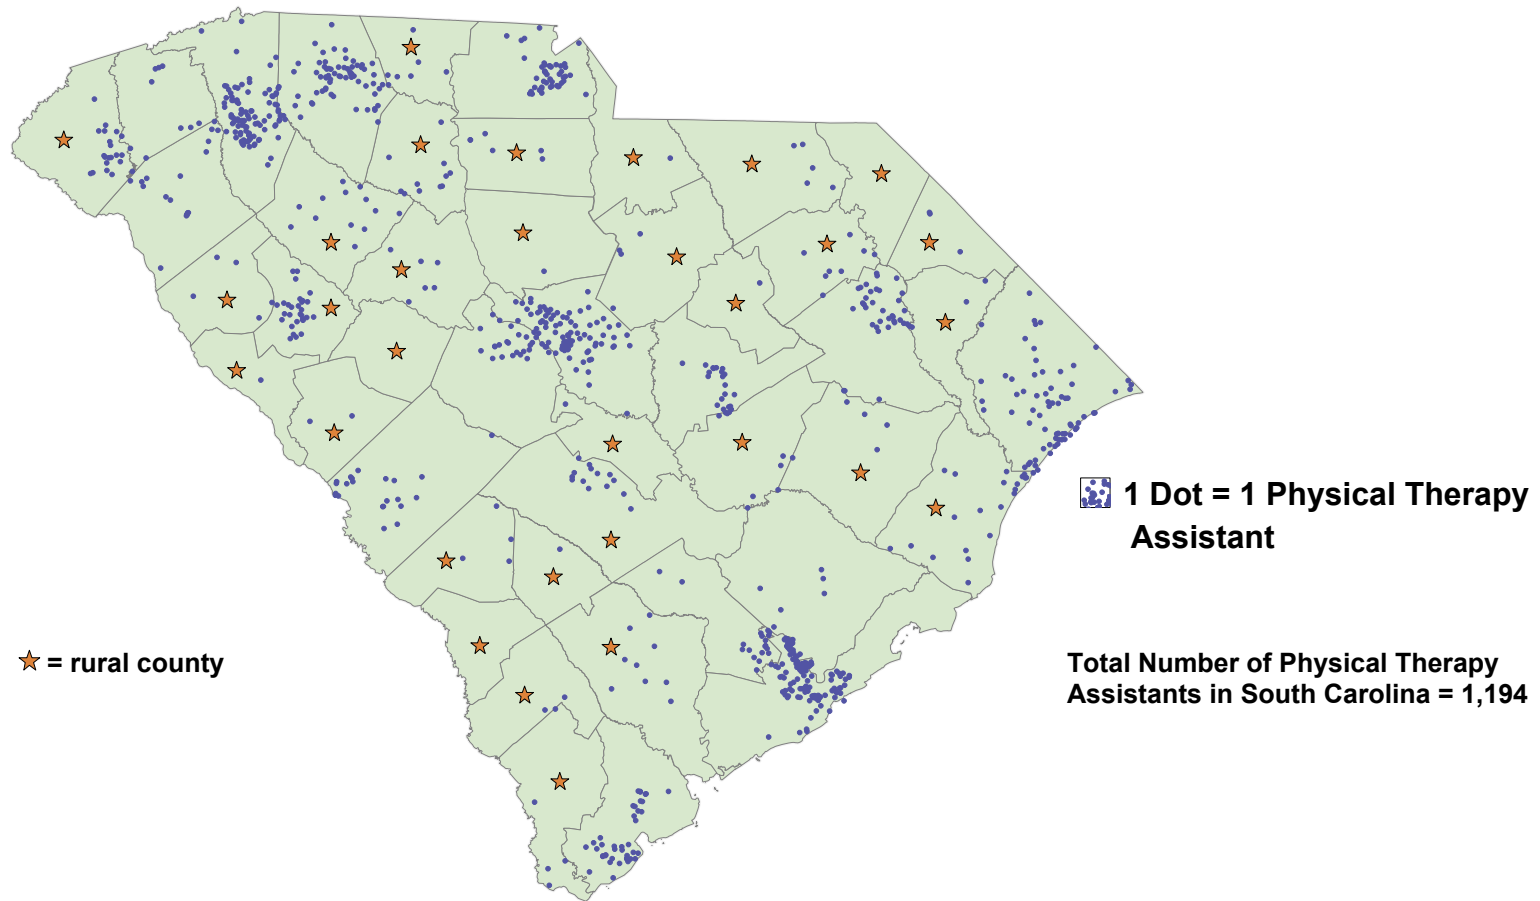

Counties in SC range from a low of 0 to a high of 10.8 Physical Therapists per 10,000 county residents

- 7.0 to 10.8 (5)
- 4.0 to 6.9 (6)
- 2.0 to 3.9 (16)
- 0.1 to 1.9 (16)
- 0 (3)

Note: The ( ) shows the total number of counties with this range.

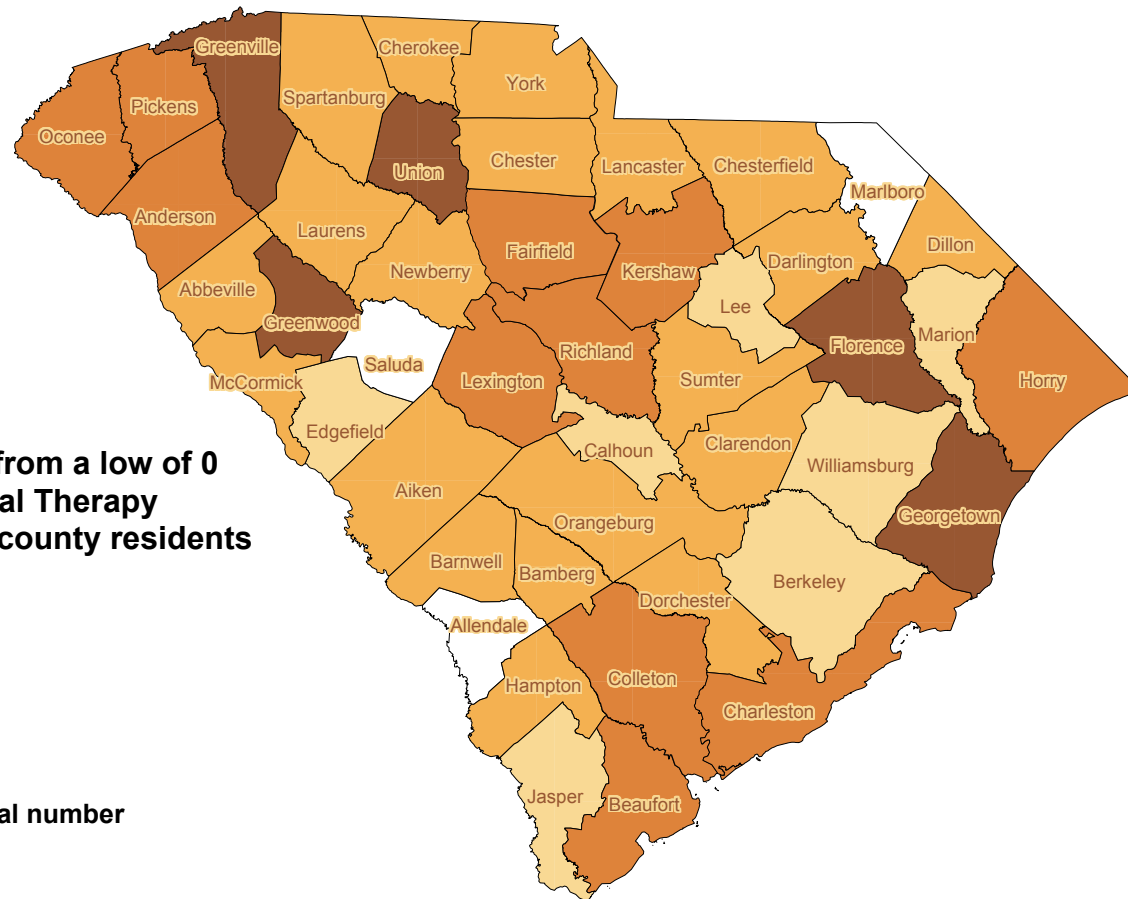

*This information is based on all Physical Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. The county practice locations are those reported as the primary practice site.*

## Physical Therapy Assistants in South Carolina by Primary Practice Location

*This information is based on all Physical Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Physical Therapy Assistants Per 10,000 Population

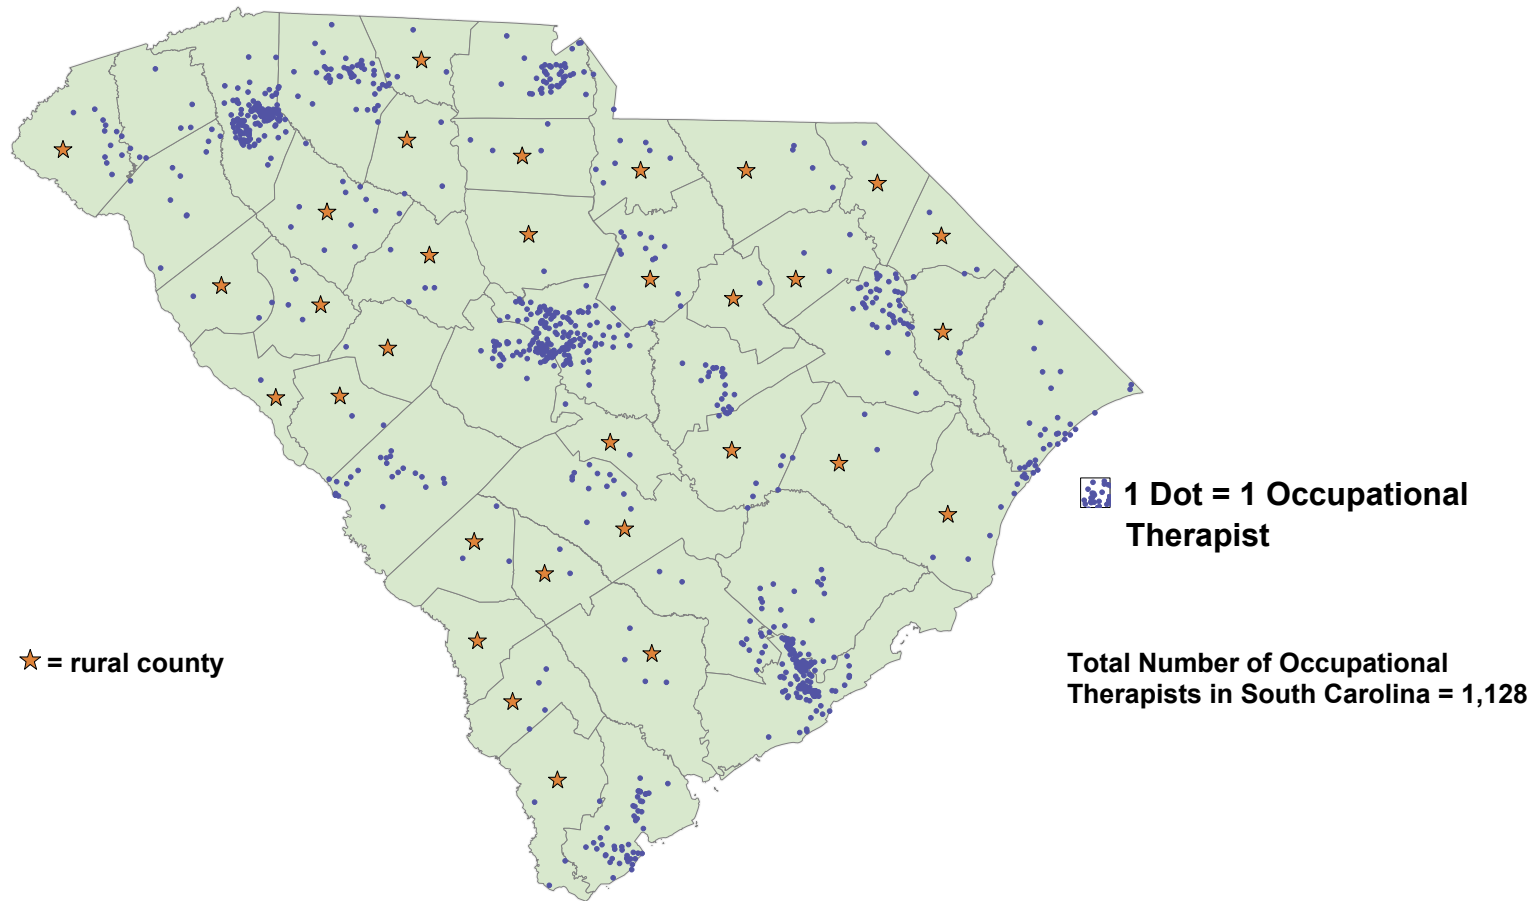

Counties in SC range from a low of 0 to a high of 5.2 Physical Therapy Assistants per 10,000 county residents

- 3.0 to 5.2 (5)
- 2.0 to 2.9 (11)
- 1.0 to 1.9 (20)
- 0.1 to 0.9 (7)
- 0 (3)

Note: The ( ) shows the total number of counties with this range.

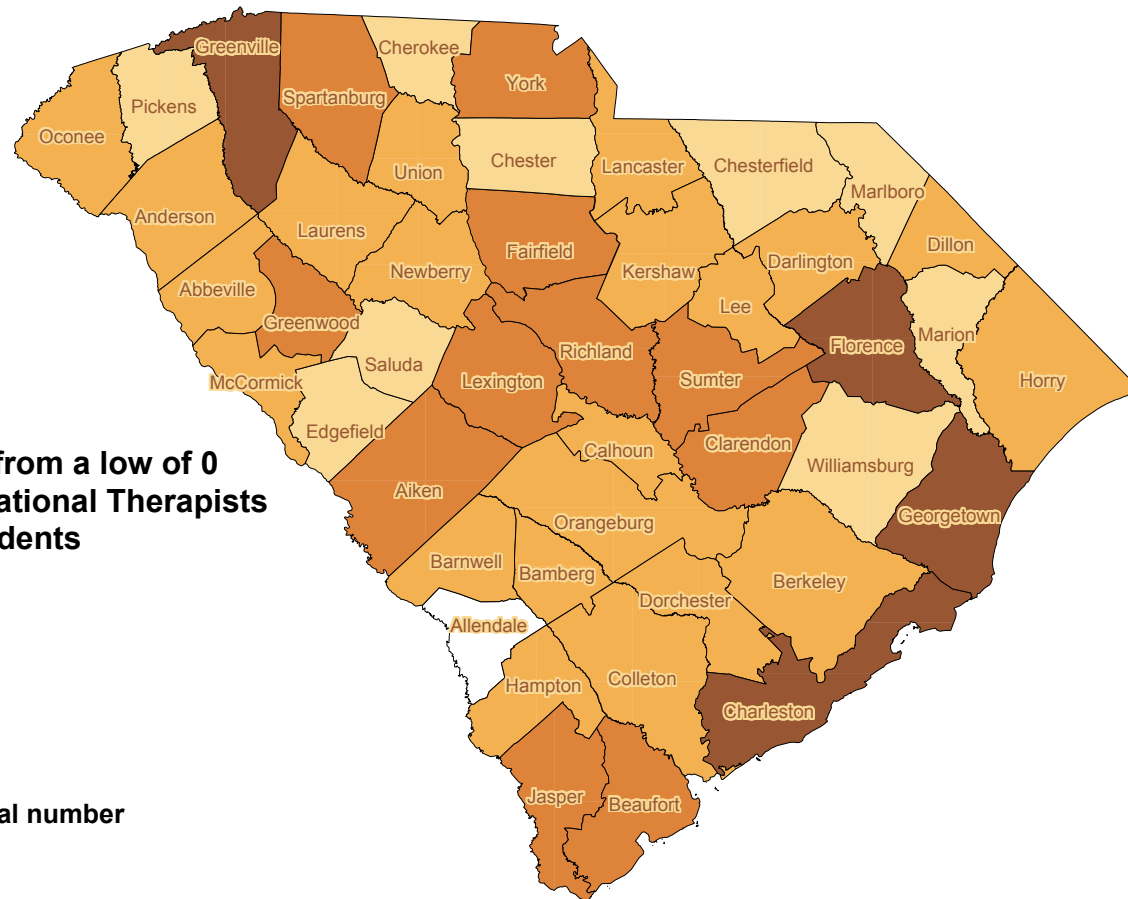

*This information is based on all Physical Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2010. The county practice locations are those reported as the primary practice site.*

## Occupational Therapists in South Carolina by Primary Practice Location

*This information is based on all Occupational Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Occupational Therapists Per 10,000 Population

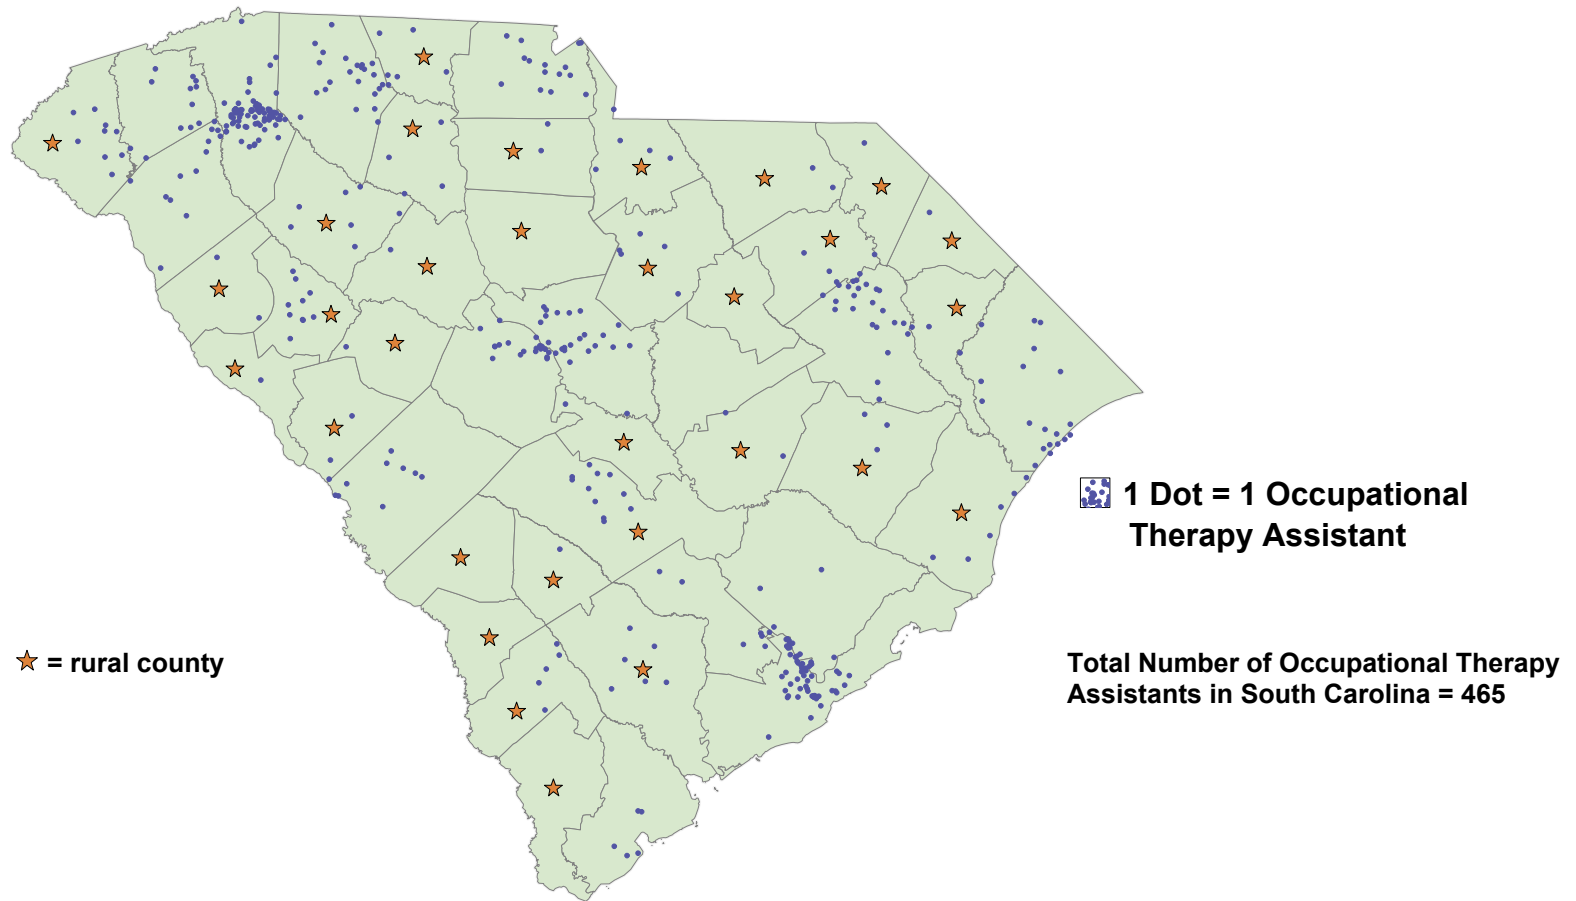

Counties in SC range from a low of 0 to a high of 5.9 Occupational Therapists per 10,000 county residents

- 3.6 to 5.9 (4)
- 2.0 to 3.5 (11)
- 1.0 to 1.9 (21)
- 0.1 to 0.9 (9)
- 0 (1)

Note: The ( ) shows the total number of counties with this range.

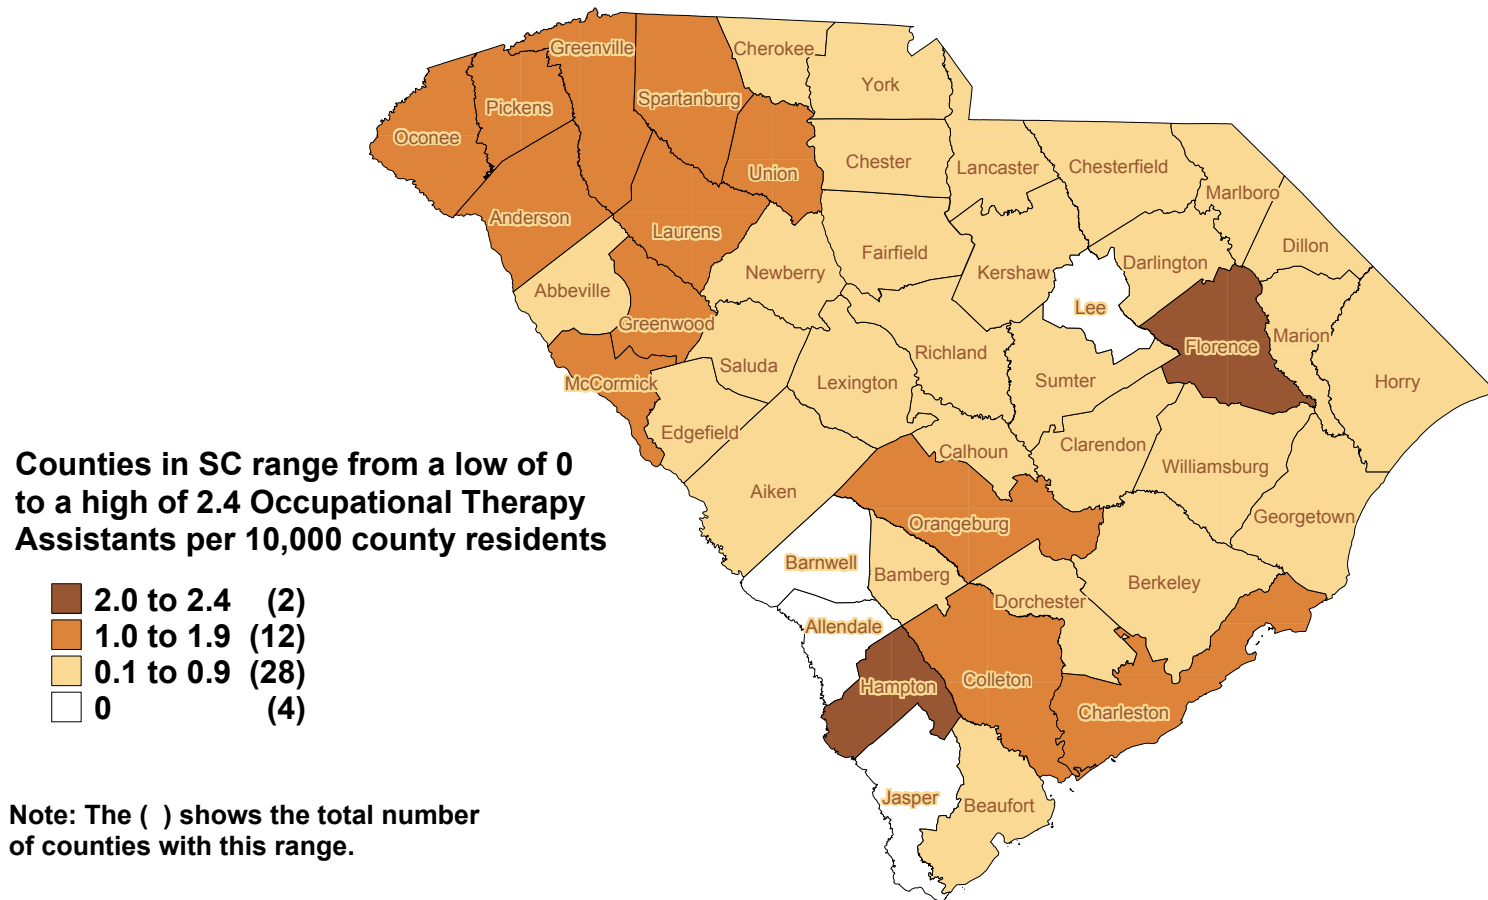

*This information is based on all Occupational Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. The county practice locations are those reported as the primary practice site.*

## Occupational Therapy Assistants in South Carolina by Primary Practice Location

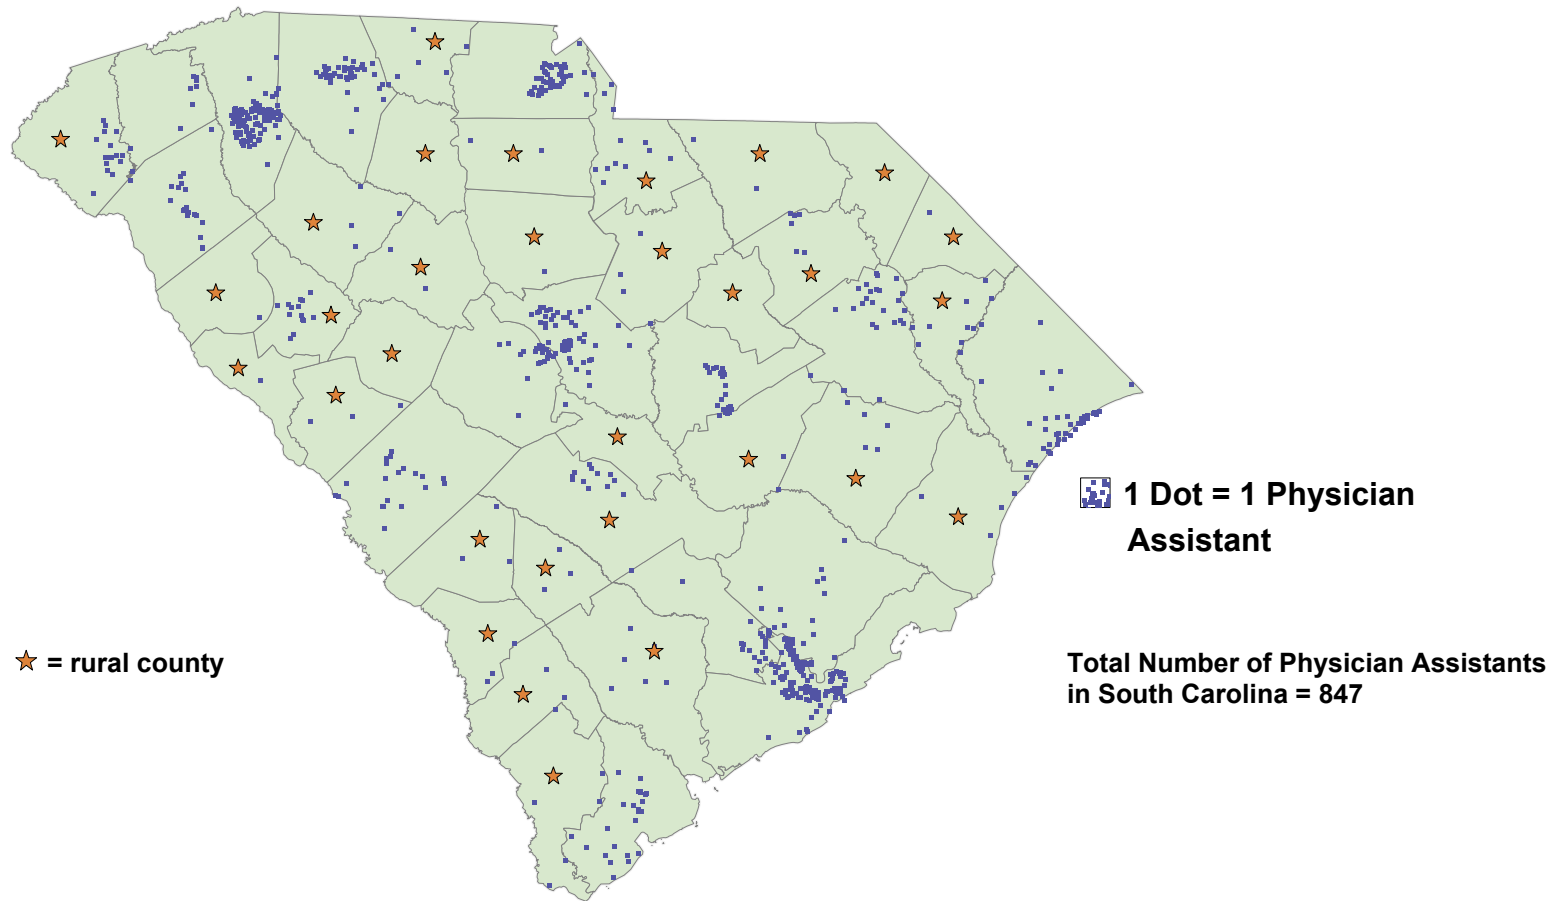

*This information is based on all Occupational Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Occupational Therapy Assistants Per 10,000 Population

*This information is based on all Occupational Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. The county practice locations are those reported as the primary practice site.*

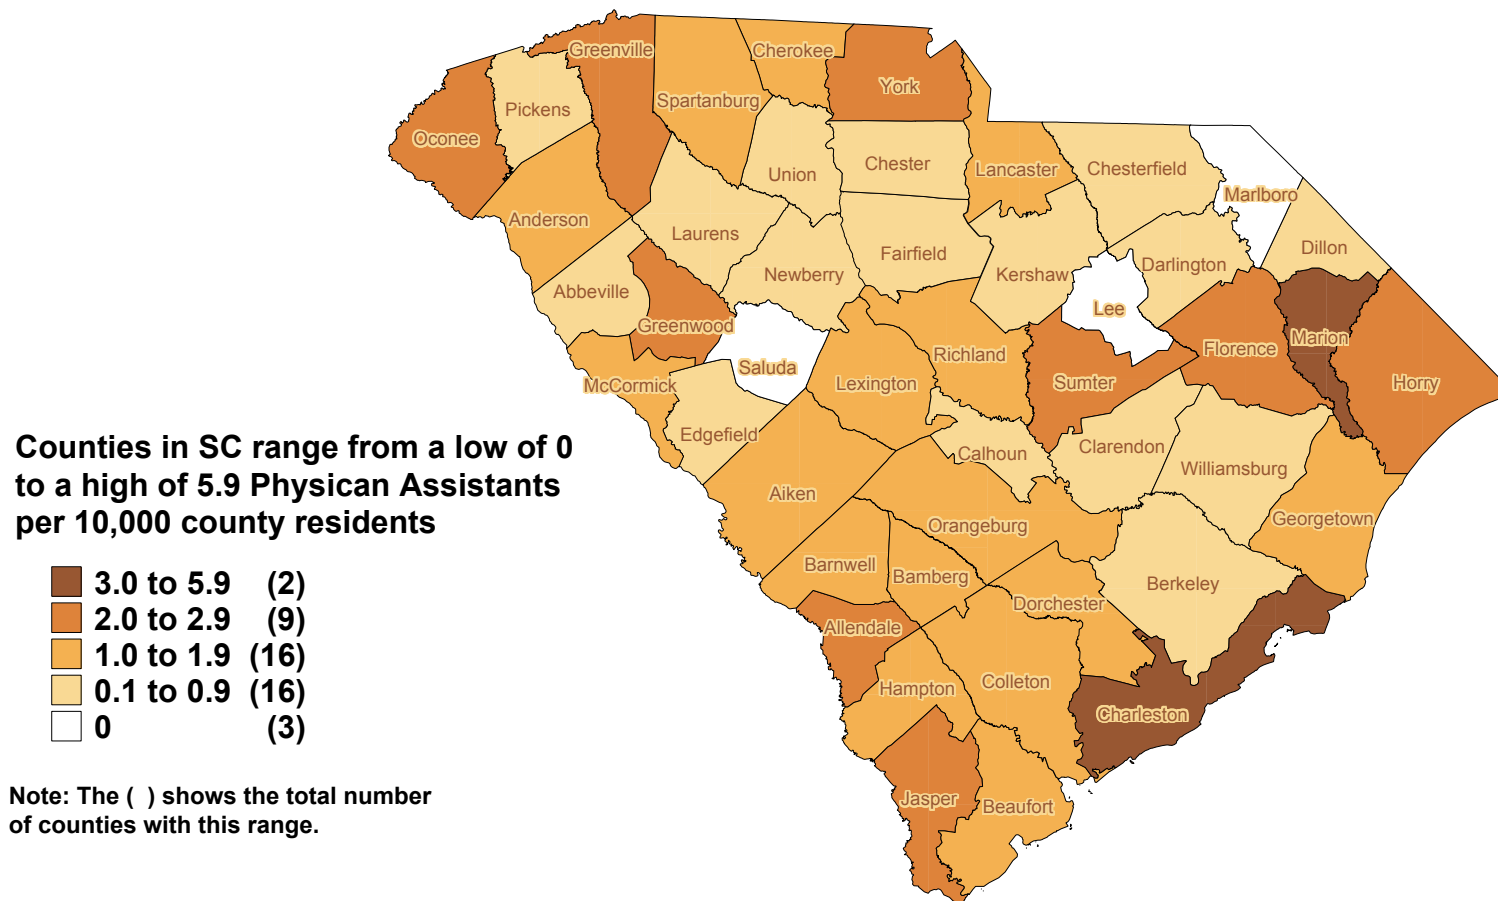

## Physician Assistants in South Carolina by Primary Practice Location

*This information is based on all Physician Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

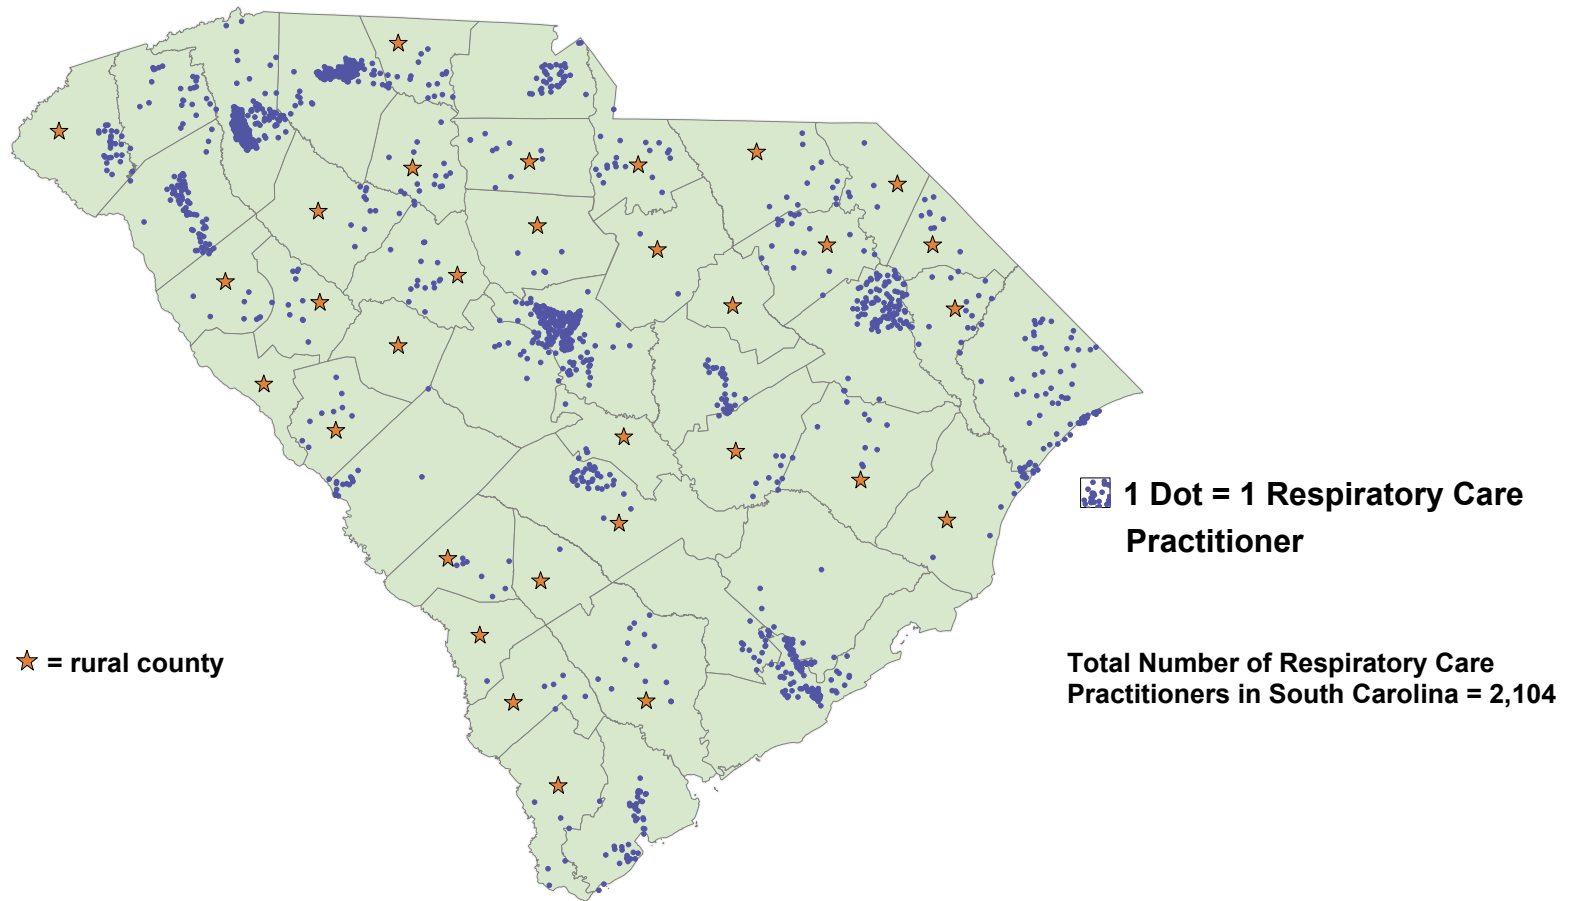

## Concentration of Physician Assistants Per 10,000 Population

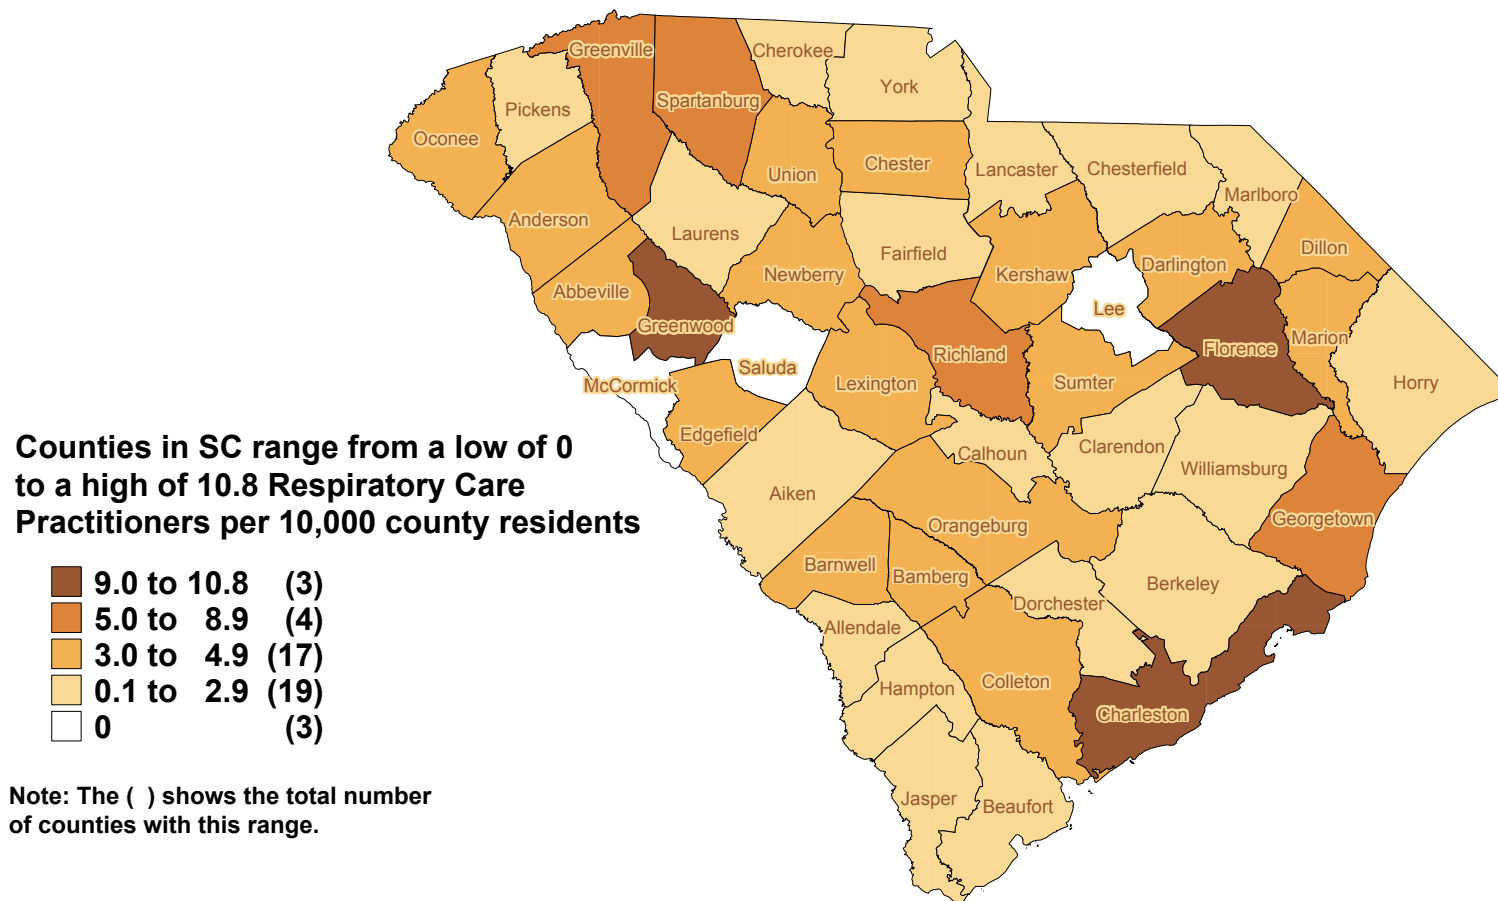

*This information is based on all Physician Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2011. The county practice locations are those reported as the primary practice site.*

## Respiratory Care Practitioners in South Carolina by Primary Practice Location

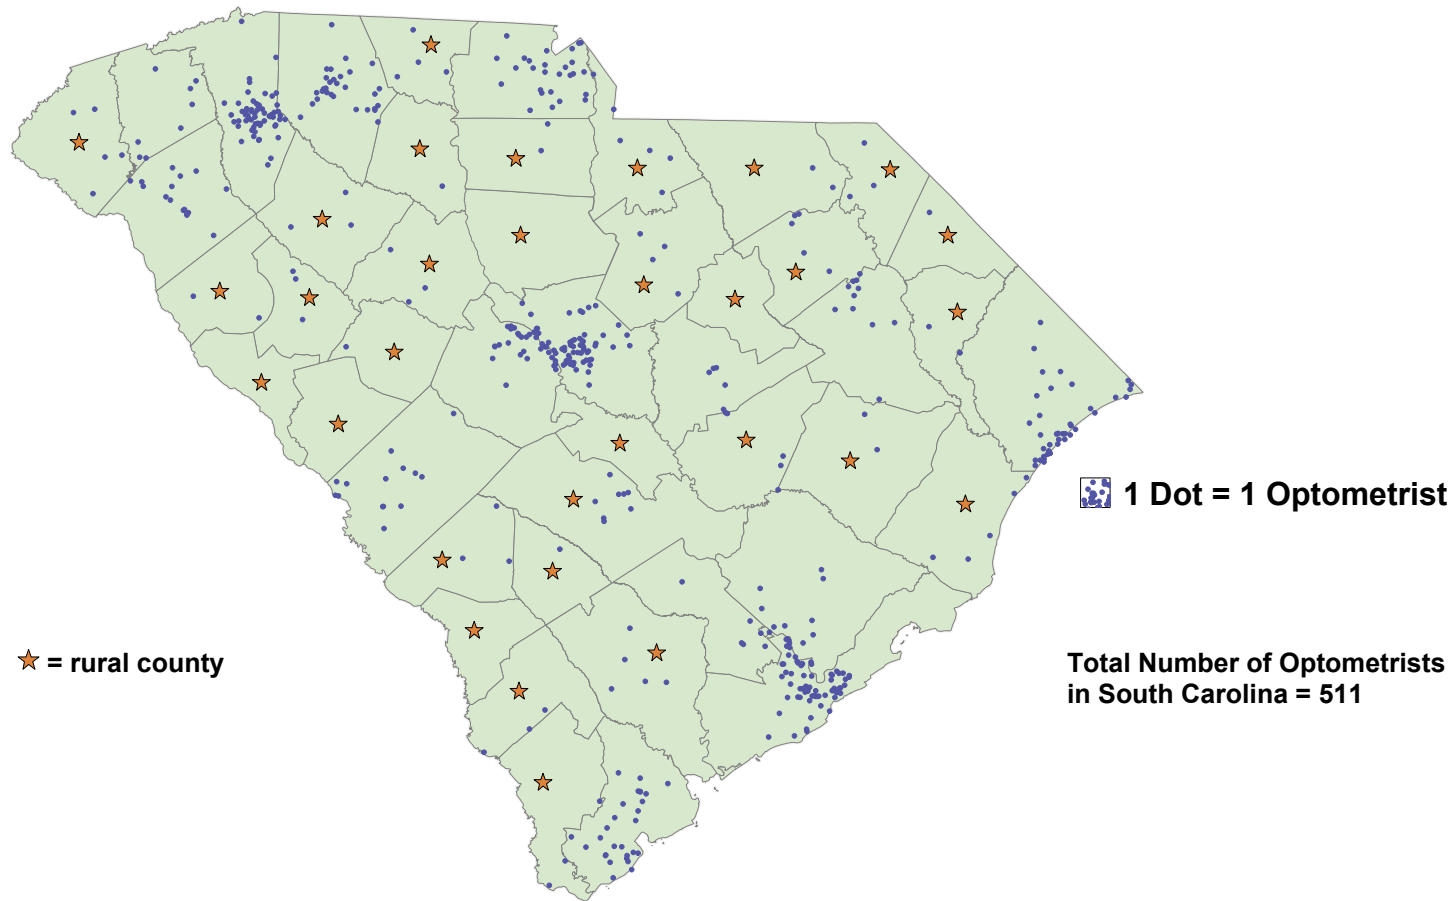

*This information is based on all Respiratory Care Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Respiratory Care Practitioners Per 10,000 Population

*This information is based on all Respiratory Care Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2011. The county practice locations are those reported as the primary practice site.*

## Optometrists in South Carolina by Primary Practice Location

*This information is based on all Optometrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 09/30/2011. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those with a population density of 155 or fewer persons per square mile, based on 2010 census counts.*

## Concentration of Optometrists Per 10,000 Population

Counties in SC range from a low of 0.0 to a high of 1.9 Optometrists per 10,000 county residents

- 1.5 to 1.9 (3)
- 0.9 to 1.4 (14)
- 0.5 to 0.8 (17)
- 0.1 to 0.4 (6)
- 0 (6)

Note: The ( ) shows the total number of counties with this range.

*This information is based on all Optometrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 09/30/2011. The county practice locations are those reported as the primary practice site.*

### Total Number of Physicians Reporting Primary or Secondary Practice Sites by County

County	# whose primary practice is in this county	# who have a subsidiary practice in this county

Note that this is a count of Optometrists, not a count of practice sites within the county.*

# Appendix I: Data Definitions and Sources

## *Regional Definitions*

**Area Health Education Centers (AHECs)** - Area Health Education Centers (AHECs) are academic and community partnerships that provide health career recruitment programs for K-12 students and increase access to health care in medically underserved areas. The South Carolina AHEC develops and supports programs designed to increase the number of young people who aspire to become healthcare professionals, emphasizing underrepresented ethnic minority groups and the economically disadvantaged; facilitate clinical rotations for health professions students in rural and underserved areas; increase the physician workforce by sponsoring graduate medical education residency training programs; enhance clinical competence by providing educational programs to healthcare providers near their workplace; and increasing the healthcare workforce by maintaining programs to recruit and retain primary care providers. In South Carolina, the AHEC Program Office supports 4 regional centers which collectively serve all areas of the state.

Source: Website of the South Carolina AHEC, <http://www.scahec.net>

**Health Professional Shortage Areas (HPSAs)** - The federal Health Resources and Services Administration Shortage Designation Branch within the U.S. Department of Health and Human Services identifies geographic areas, population groups, or facilities which have unmet healthcare needs as Health Professional Shortage Areas (HPSA). These designations provide a means of prioritizing where limited federal resources should be focused. HPSA designations are granted in three areas: primary medical care, dental care and mental health. A HPSA designation may affect an entire county (labeled as “whole”), or only part of a county (labeled as “partial”). When no geographic area or population group within a county has been defined as a HPSA then the HPSA designation for that county is labeled as “none” in this book.

Source: HPSA designations downloaded on October 17, 2012 from the U.S. Department of Health and Human Services, Health Resources and Services Administration Shortage Designation Branch website: <http://hpsafind.hrsa.gov/HPSASearch.aspx>

**Perinatal Regions** - Perinatal assessment regions support a geographically structured approach to assuring risk-appropriate care for all mothers and infants with a goal of improving perinatal outcomes and reducing infant mortality. There are four perinatal regions and five regional perinatal centers in SC: Low Country Region, Medical University of South Carolina; Pee Dee Region, McLeod Regional Medical Center; Midlands Region, Palmetto Richland Memorial Hospital; Piedmont Region, Greenville Hospital System and Spartanburg Regional Medical Center.

Source: Downloaded October 10, 2011 from the SC DHEC website: <http://www.scdhec.gov/health/mch/rpu/perinatal.htm>

**DHEC Planning Regions** – Within the South Carolina Department of Health and Environmental Control (DHEC), the Central Office Health Services area establishes the administrative and organizational means by which health policies, programs and services are implemented in the communities of our state. To accomplish this mission, the state is divided into 8 separate planning regions. Each region has several county public health departments under its jurisdiction.

Source: Downloaded October 10, 2011 from the SC DHEC website: <http://www.scdhec.gov/hs/epidata/BRFSS/2008/genhlth.html>

**Workforce Investment Board Regions** - The State Workforce Investment Board (SWIB) provides direction to the South Carolina Department of Employment and Workforce on workforce development issues, particularly those pertaining to implementation of the Workforce Investment Act. Twelve regional Workforce Investment Boards work directly with local businesses, agencies and other partners to deliver services and programs. These regional boards provide oversight of the Workforce Investment Act in their area and oversee local SC Works Centers which include a variety of workforce partners and programs.

Source: Regional WIB service areas were downloaded October 18, 2012 from [http://www.workforcesouthcarolina.com/media/2961/local\\_wib\\_contact\\_information081210.pdf](http://www.workforcesouthcarolina.com/media/2961/local_wib_contact_information081210.pdf).

**Metropolitan Statistical Areas (MSAs)** - Metropolitan and micropolitan statistical areas are geographic entities defined by the U.S. Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population. A micropolitan area contains an urban core of at least 10,000 but less than 50,000 population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core. Any county that is not designated a metropolitan or micropolitan area is designated as a non-metro area. The most recent designations are based on 2009 population estimates. New designations based on 2010 census counts will be released in 2013.

Source: Downloaded October 17, 2012 from the U.S. Census Bureau website: <http://www.census.gov/population/www/metroareas/lists/2008/List1.txt>

**Rural / Urban Areas** - The South Carolina Department of Commerce, the Office of Research and Statistics, and many other state agencies use an adjusted population density model to identify rural and urban areas of the state. Under this model counties with 155 people or fewer per square mile are considered rural. A review of this model and comparison with other methods can be found in "Developing a Rural Definition: Analysis of South Carolina Counties" published by the SC Department of Commerce, Division of Research, DP-2008-001, January 2008, available at: <http://sccommerce.com/resources/document-directory/rural-definition-developing-rural-definition-south-carolina-analysis>.

Source: Population density figures based on 2010 census figures were calculated and provided by the SC Office of Research and Statistics.

### *Vital Statistics*

**Resident Births** - The number of all births recorded in 2010. Births are allocated to the county of the mother's residence.

Source: Data were generated and downloaded July 25, 2012 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/birthtable.aspx>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**Resident Deaths** - The number of all deaths recorded in 2010. Deaths are allocated to the county of residence of the decedent.

Source: Data were generated and downloaded July 25, 2012 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/death2table.aspx>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**Total Pregnancies Number and Rate** - The total number of pregnancies is an estimate based on the sum of live births, abortions, and fetal deaths. Rates are calculated per 1,000 women age 15 – 44 in the area. Data reported here are from 2010.

Note that state-wide pregnancy counts and rates include information not assigned to any specific county, and thus the sum of the county figures do not sum to the state-wide totals. This also affects regional area figures which are based on the sum of the counties included in each region. Pregnancies which are included in the state-wide totals but are not assigned to a specific county are thus not included in the regional area sums.

Source: Pregnancy data were generated and downloaded September 15, 2012 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/pregnancy/input.aspx>. Rate figures were also generated and downloaded from the same SC DHEC

SCAN website. Regional aggregate counts of pregnancy and pregnancy rates were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level pregnancy figures. Regional rates were calculated using 2010 Census population counts for women age 15 – 44 in the area.

**% of Births <2500 Grams** - This is the percent of births in 2010 to mothers with a residence in a specific county in which the baby's birth weight was below 2500 grams.

Source: Tables were generated and downloaded July 25, 2012 by specifying data for birth weights ranging from 0 – 2499 grams on the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/birthtable.aspx>. Percentages were calculated by dividing number of low birth-weight babies by total number of live births in county. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**Teen Pregnancies Number and Rate** - Based on reported pregnancies, live births and abortions among women age 10 - 19 in 2010. Rates are calculated per 1,000 female population 10 – 19 years of age in the area.

Note that state-wide teen pregnancy counts and rates include information not assigned to any specific county, and thus the sum of the county figures do not sum to the state-wide totals. This also affects regional area figures which are based on the sum of the counties included in each region. Teen pregnancies which are included in the state-wide totals but are not assigned to a specific county are thus not included in the regional area sums.

Source: Pregnancy data were generated and downloaded July 25, 2012 by specifying data for maternal age 10 – 19 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/pregnancy/input.aspx>. Population data for the rate calculations were generated and downloaded by specifying data for females age 10 – 19 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/populationtable.aspx>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**White Infant Mortality Rate** – This rate is defined as the number of infant deaths per 1,000 annual live births to women who report their race as White. Due to low numbers in some counties in the single year statistics, we report a rate calculated from years 2008-2010

Source: Rates and frequencies were generated and downloaded July 26, 2012 by specifying data for Race of Child = "White" from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/mch/infantmortality/input.aspx>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**Black Infant Mortality Rate** - This rate is defined as the number of infant deaths per 1,000 annual live births to women who report their race as Black. Due to low numbers in some counties in the single year statistics, we report a rate calculated from years 2008-2010.

Source: Rates and frequencies were generated and downloaded July 31, 2012 by specifying data for Race of Child = "Black" from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/mch/infantmortality/input.aspx>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

### *Health Status and Behaviors*

**Cancer Deaths** – All deaths resulting from cancer in 2010, based on death certificate data.

Source: Data were generated and downloaded August 9, 2012 by specifying all cancer deaths from the "Deaths 1999-2010" option on the SC DHEC SCAN website <http://scangis.dhec.sc.gov/scan/bdp/tables/table.aspx?>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**% of Adults Diagnosed with Heart Disease** - This is the percentage of adults who answered Yes to: "Has a doctor, nurse, or other health professional EVER told you that you had angina or coronary heart disease?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% of Adults Diagnosed with Hypertension** - This is the percentage of adults who answered Yes to: "Have you ever been told by a doctor, nurse or other health professional that you have high blood pressure?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% of Adults Diagnosed with Diabetes** - This is the percentage of adults who answered Yes to: "Have you EVER been told by a doctor that you have diabetes?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% of Adults Who Currently Smoke** - This number is calculated from the Smoking Risk Factor statistic to determine current smoking status among adults, based on responses to the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% Reporting a Sedentary Lifestyle** - This is the percentage of adults who answered No to: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% of Adults Overweight or Obese (BMI > 25)** – This percentage is based on a calculated risk factor for obesity derived from self-reports of Body Mass Index greater than 25 for adults age 20 and over in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

## *Healthcare Facilities*

**General Hospital Beds** – The number of general use hospital beds in licensed hospitals.

Source: Untitled report published August 1, 2012 by the South Carolina Department of Health and Environmental Control, Division of Health Licensing. Downloaded August 29, 2012 from: <http://www.scdhec.gov/health/licen/hrconh.pdf>

**% Hospital Discharges within Home County** – The percent of persons discharged from in-patient hospital treatment inside their county of residence was calculated by dividing the number of in-county discharges by the total number of discharges from short-term general hospitals in that county.

Source: Data retrieved on August 30, 2012 from <http://ors.sc.gov/hd/ipoma.php>. This site contains the SC Office of Research & Statistics, Health & Demographics Section data for In-Patient Discharges (Excluding Newborns) Number Served In and Out of County, Calendar Year 2010.

**Skilled Nursing Facility Beds** – The number of skilled nursing and institutional beds in licensed nursing homes.

Source: Untitled report published August 1, 2012 by the South Carolina Department of Health and Environmental Control, Division of Health Licensing. Downloaded August 29, 2012 from: <http://www.scdhec.gov/health/licen/hrnh-cty.pdf>

## *Socio-Economic Factors*

**% of Adults Without Health Insurance** – The Small Area Health Insurance Estimates (SAHIE) program of the U.S. Census Bureau produces and disseminates model-based estimates of health insurance coverage for counties and states. The SAHIE program models health insurance coverage by combining survey data with population estimates and administrative records. SAHIE estimates are based on data from the following sources: American Community Survey (ACS); demographic population estimates; aggregated federal tax returns; participation records for the Supplemental Nutrition Assistance Program (SNAP); County Business Patterns; Medicaid and Children's Health Insurance Program (CHIP) participation records; and Census 2000. The American Community Survey (ACS) insurance question asks "Is this person currently covered by specifically stated health insurance or health coverage plans?" This question replaces the Current Population Survey (CPS) question that was used in prior releases which asked "At any time during the previous year" was the person covered? Note that coverage solely by the Indian Health Service (IHS) does not count as health insurance; i.e., people who were only covered by IHS in the previous year are counted as uninsured.

Source: The estimates presented here for adults only – those age 18 to 64, based on 2010 data sources from the US Census SAHIE website: <http://www.census.gov/did/www/sahie/index.html> downloaded August 8, 2012. County percentages and regional percentages were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**% Unemployed** - 2010 annual average rate of unemployment at the state and county level. These numbers are not seasonally adjusted.

Source: US Bureau of Labor Statistics (<ftp://ftp.bls.gov/pub/special.requests/la/laucnty10.txt>). Annual rates for 2010 were used. Downloaded on August 24, 2012. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**% of Households With Income < \$25,000** - This is the percentage of adults who reported their annual household income from all sources was less than \$25,000 in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**% With High School Education or Less** - This is the percentage of adults who reported the highest grade or year of school completed as less than college level in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Provided by SC DHEC/PHSIS/SC BRFSS. The county-level values reported here are estimates generated by pooling 3 years of BRFSS data: 2008, 2009, 2010. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. State and regional statistics are based solely on 2010 survey results.

**# Medicaid Eligible** - Number of persons determined to be eligible for Medicaid coverage by the South Carolina Department of Health and Human Services in the state during fiscal year 2010-2011.

Source: Unpublished county-level data provided on request by SC DHHS on September 05, 2012. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

**Per Capita Income** - Personal income is the income that is received by persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. Per capita income is calculated as the personal income of all residents in a given area divided by the resident population of that area. In computing per capita personal income, the Bureau of Economic Analysis uses the Census Bureau's annual midyear population estimates.

Source: U.S. Department of Commerce, Bureau of Economic Analysis, Regional Economic Accounts, Local Area Personal Income, Table CA1-3 for South Carolina. We reported the 2010 figures. Downloaded August 29, 2012 from: <http://www.bea.gov/regional/reis/>. Regional aggregate counts were calculated by the Office for Healthcare Workforce Analysis and Planning from county-level figures.

## Appendix II: Regional Definitions

### *Area Health Education Centers (AHECs):*

Counties in South Carolina are assigned to AHEC service areas as follows:

Lowcountry AHEC . . . . .	Allendale Bamberg Barnwell Beaufort	Berkeley Calhoun Charleston Colleton	Dorchester Hampton Jasper Orangeburg
Mid-Carolina AHEC . . . . .	Aiken Cherokee Chester Fairfield	Kershaw Lancaster Lexington Newberry	Richland Union York
Pee Dee AHEC . . . . .	Chesterfield Clarendon Darlington Dillon	Florence Georgetown Horry Lee	Marion Marlboro Sumter Williamsburg
Upstate AHEC . . . . .	Abbeville Anderson Edgefield Greenville	Greenwood Laurens McCormick Oconee	Pickens Saluda Spartanburg

***Metropolitan Statistical Areas (MSAs)***

Counties in South Carolina are categorized as follows:

Metropolitan . . . . .	Aiken Anderson Berkeley Calhoun Charleston Darlington Dorchester Edgefield	Fairfield Florence Greenville Horry Kershaw Laurens Lexington	Pickens Richland Saluda Spartanburg Sumter York
Micropolitan . . . . .	Beaufort Cherokee Chester Colleton Dillon	Georgetown Greenwood Jasper Lancaster Marlboro	Newberry Oconee Orangeburg Union
Non-Metro . . . . .	Abbeville Allendale Bamberg Barnwell	Chesterfield Clarendon Hampton Lee	Marion McCormick Williamsburg

*Rural and Urban Areas*

Using an adjusted population model, where counties containing 155 people or fewer per square mile are considered rural, counties in South Carolina are categorized as follows:

Rural counties . . . . .	Abbeville	Dillon	Lee
	Allendale	Edgefield	Marion
	Bamberg	Fairfield	Marlboro
	Barnwell	Georgetown	McCormick
	Calhoun	Greenwood	Newberry
	Cherokee	Hampton	Oconee
	Chester	Jasper	Orangeburg
	Chesterfield	Kershaw	Saluda
	Clarendon	Lancaster	Union
	Colleton	Laurens	Williamsburg
	Darlington		
Urban counties . . . . .	Aiken	Dorchester	Pickens
	Anderson	Florence	Richland
	Beaufort	Greenville	Spartanburg
	Berkeley	Horry	Sumter
	Charleston	Lexington	York

### *SC Department of Health and Environmental Control (DHEC) Planning Regions*

Counties in South Carolina are assigned to DHEC planning regions as follows:

Region 1 . . . . .	Abbeville Anderson Edgefield	Greenwood Laurens McCormick	Oconee Saluda
Region 2 . . . . .	Cherokee Greenville	Pickens Spartanburg	Union
Region 3 . . . . .	Chester Fairfield Lancaster	Lexington Newberry Richland	York
Region 4 . . . . .	Chesterfield Clarendon Darlington Dillon	Florence Kershaw Lee Marion	Marlboro Sumter
Region 5 . . . . .	Aiken Allendale	Bamberg Barnwell	Calhoun Orangeburg
Region 6 . . . . .	Georgetown	Horry	Williamsburg
Region 7 . . . . .	Berkeley	Charleston	Dorchester
Region 8 . . . . .	Beaufort Colleton	Hampton	Jasper

*Perinatal Regions*

Counties in South Carolina are assigned to Perinatal Regions as follows:

Low Country . . . . .	Beaufort Berkeley Charleston	Colleton Dorchester Georgetown	Hampton Jasper
Midlands . . . . .	Aiken Allendale Bamberg Barnwell Calhoun Clarendon	Fairfield Kershaw Lancaster Lee Lexington	Newberry Orangeburg Richland Sumter York
Pee Dee . . . . .	Chesterfield Darlington Dillon	Florence Horry Marion	Marlboro Williamsburg
Piedmont . . . . .	Abbeville Anderson Cherokee Chester Edgefield	Greenville Greenwood Laurens McCormick Oconee	Pickens Saluda Spartanburg Union

*Workforce Investment Board Regions*

Counties in South Carolina are assigned to Workforce Investment Board regions as follows:

Catawba . . . . .	Chester	Lancaster	York
Greenville . . . . .	Greenville		
Low Country . . . . .	Beaufort Jasper	Colleton	Hampton
Lower Savannah. . . . .	Aiken Barnwell	Allendale Calhoun	Bamberg Orangeburg
Midlands . . . . .	Fairfield	Lexington	Richland
Pee Dee . . . . .	Chesterfield Florence	Darlington Marion	Dillon Marlboro
Santee Lynches . . . . .	Clarendon Sumter	Kershaw	Lee
Trident. . . . .	Berkeley Colleton	Charleston	Dorchester
Upper Savannah. . . . .	Abbeville Lauren Saluda	Edgefield McCormick	Greenwood Newberry
Upstate. . . . .	Spartanburg Colleton	Union	
Waccamaw . . . . .	Georgetown	Horry	Williamsburg
Worklink. . . . .	Anderson	Oconee	Pickens
