

#### **DATA BRIEF - NOVEMBER 2012**

# **Sub-Specialty Physician Workforce by Practice County in 2011**

The tables on the following pages provide estimates of the number of full-time equivalent (FTE) physicians actively practicing in clinical sub-specialty areas within specific counties in South Carolina, based on data provided by the physicians themselves during the most recent biennial license renewal period: April 15 through June 30, 2011.

Many physicians practice in more than one location. As part of the license renewal process, every physician reports the location of each site where they practice and the number of hours per week usually spent at each site. In order to get an estimate of the available workforce within a specific county we have summed the hours worked by any physician that reported having either a primary or a secondary practice site in a specific county.

Because the amount of time spent in practice varies widely across physician type and within sub-specialty groups, the most effective measure of workforce is a translation of hours worked per week into a measure of full-time equivalence. The figures presented in our tables assume that a 40 hour work week equals 1 full-time equivalent practitioner.

Physicians are assigned to sub-specialty groups based on the information they report during the license renewal process. In cases where a physician reports more than one sub-specialty, that physician has been assigned to the sub-specialty area associated with the greatest number of practice hours per week.

Questions about the table contents or methodology should be directed to Linda M. Lacey at the Office for Healthcare Workforce Analysis and Planning, South Carolina AHEC, Charleston, SC.
