

South Carolina Family Medicine Residency Programs

McLeod Health Family Medicine Residency Program & McLeod Health Rural Family Medicine Residency Program

www.mcleodhealth.org

About the Program

Our nationally recognized program offers community-based, training as the only residency program in a 517-bed regional referral medical center. Well-rounded residents leave with training in advanced

ICU, geriatrics, obstetric and pediatric skills. Residents benefit from a strong emphasis on procedures – such as colonoscopy, EGD and central line placement – with an ultrasound curriculum, specialty clinics and classroom instruction. Our residents handle high volume inpatient and outpatient settings, while receiving hands-on experience in population health challenges.

Key Highlights

- An established, unopposed Family Medicine Residency Program at a 517-bed tertiary care medical center
- Family Medicine Rural Training Track program starting July 2020
- Integrated inpatient and outpatient bedside ultrasound
- High volume inpatient and outpatient procedures including a 24/7 resident-run central line placement consult service
- Simulation Lab to include GI Mentor, Simbionix Ultrasound Simulator, and other sim devices
- Open Intensive Care Units allowing residents to manage critically ill patients on pressors and ventilators
- Dental Suite within the Center offering Oral Health rotations to all residents
- International medicine electives encouraged
- Excellent benefits with competitive salary, moonlighting opportunities, and maximum paid time off
