

Pharmacy of the Streets

~ Join us for this Live **WEBINAR** ~

PROGRAM DESCRIPTION:

The adverse effects of illicit drug use have been well-documented. Methamphetamine destroys your teeth, cocaine can cause convulsions, and smoking marijuana irritates the respiratory tract. These short-term consequences pale in comparison, though, to the ultimate price that drug users often pay — **a life that's cut short by substance misuse**. Indeed, there is an inversely proportional relationship between drug use and life expectancy, proving that recovery is often a matter of life and death. This presentation will discuss the impact on the American lifestyle by a specific list of current drugs. The list of various over the counter (OTC) herbal and pharmaceutical products will include kratom, methamphetamine, xylazine, delta 8 THC, delta 9 THC, delta 10 THC, and Wasp dope. These compounds are known as "gas station drugs" and their pharmacological profiles include dangerous adverse drug effects on human growth and development. The discussion will also include information on America's # 1 gas station drug: alcohol

OBJECTIVES: Upon completion of this program, the participant should be able to:

1. Develop a vocabulary of the current herbal and pharmaceutical drugs known as the gas station drugs.
2. Describe the pharmacodynamics and pharmacokinetics of alcohol, Kratom, Ketamine, Delta 8 THC, Delta 9 THC, Delta 10 THC, Xylazine, and Wasp Dope.
3. Recognize the severe adverse drug effects of alcohol, Kratom, Ketamine, Methamphetamine, Delta 8 THC, Delta 9 THC, Delta 10 THC, Xylazine, and Wasp Dope in terms of human growth and development.

Target Audience: Counselor, Therapist, Social Worker, Registered Nurse, Law Enforcement, EMT/ Paramedic, Advanced Practice Registered Nurse, any other Healthcare Professional

FEE: 125 Consortium Member \$150 Non-Consortium Member
