

Static Splinting for Orthopedic & Neurological Conditions

Saturday, April 12, 2025

McLeod Carolina Forest, Building 3 Conference Room A and B
115 McLeod Health Blvd Myrtle Beach, SC 29579

TIMES

8:45 am – 9:00 am Check-in
9:00 am – 12:15 pm Program

DESCRIPTION

Splinting is an intervention for both neurological and orthopedic populations across the lifespan. Almost any upper extremity orthopedic treatment regime can be supported with splinting. Several elements of splinting will be discussed, a hands-on splinting lab will follow in which the participant will demonstrate splinting objectives, the use of anatomical landmarks, and employ proper mechanical and constructive principles in the construction of a versatile wrist cock up splint. Several techniques for basic splinting will be addressed.

OBJECTIVES

Upon completion of this program, the participant should be able:

1. Differentiate the categories of splints and objectives to static splinting.
2. Employ mechanical and construction principles while using anatomical landmarks for splint construction and fabrication.
3. Construct versatile wrist cock up and thumb spica splint of which the construction principles can be generalized to other static splints.
4. Examine the impact of splinting on occupational performance.

FEE

\$125 Consortium \$150 Non-consortium
Deadline to register: 4/1/2025

TARGET AUDIENCE

Occupational Therapist, Certified Occupational Therapist Assistant
