Registration Deadline:
September 20, 2026

DESCRIPTION

Elevate your manual therapy skills to new heights with advanced techniques combined with corrective functional exercises, essential for tackling the most common orthopedic upper and lower extremity conditions. Go beyond conventional learning and discover multimodal approaches to facilitate personalized treatment plans that fit your patient's activities and lifestyle. Experience video enhanced learning during a dedicated lab portion of the presentation that will enrich your clinical toolbox. This course will help you upgrade your skill set, and exceed patient expectations, ensuring maximum satisfaction and outcomes.

OBJECTIVES

Upon completion of this program, the participant should be able to:

1. Discuss the latest evidence-based research concerning the multimodal approach to treating frequent orthopedic conditions.
2. Apply skills to correct and improve gait and motion in patients with common lower extremity conditions through implementation of evidence-based manual therapy interventions.
3. Develop tools and techniques to effectively address compensatory patterns observed in patients that will enhance function, participation in occupation, and ability to execute meaningful ADLs.

INSTRUCTOR

**Dr. John O'Halloran, PT, DPT, OCS,
Certified MDT, Certified SCTM-1
Practitioner**

Dr. O'Halloran has over 30 years experience in the field of orthopedics. He holds a Doctor of Physical Therapy from Temple University. He has extensive experience in combining correctional manual therapy with manipulative therapies. He has presented over 1,300 times both locally and internationally on various orthopedic and sports medicine topics.
