Personality Disorders and Behavioral Health Practices

Patients with personality disorders can present a myriad of difficulties for the mental health professional. The purpose of this workshop is to learn the different characteristics of each DSM-5-TR personality disorder, how to recognize them more efficiently in your practice and to become familiar with treatment strategies. We will also discuss why personality disorders are classified as they are and what changes to those classifications may be made in the future.

SPEAKER

Jane Hart Lewis, MS, LPC, NCC, DBTC

CREDITS

Counselors/Therapists: 6.0

Social Workers: 6.0 Non-social work
